Reorganization as a Catalyst for Cosan's Deleveraging and Value Creation

Mergers & Acquisitions | InFinance
March 2026

Partner: Pedro Stevaux

Manager: Pedro Roschmann

Diego Sapiro | Lucas Neubauer | Vincenzo Romito

Presentation Agenda

I. Cosan Group Overview

II. Compass S.A. and IPO Pricing

III. Conversion of Preferred Shares

IV. Compass Follow-On and Spin-Off Structure

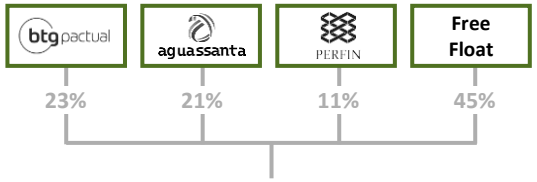

V. Value Creation Through Holding Discount Reduction

Cosan, At-a-Glance

While positioned in strategic infrastructure and energy sectors, the group primarily functions as a capital allocator, with limited cross-asset synergies

Founded in 1936, Cosan is a leading Brazilian infrastructure and energy holding company with core operations in rail logistics (Rumo), fuels and renewables (Raízen), and gas and energy (Compass). Positioned at the heart of Brazil's transportation and energy value chains, the group combines regulated infrastructure with market-driven businesses.

Shareholders

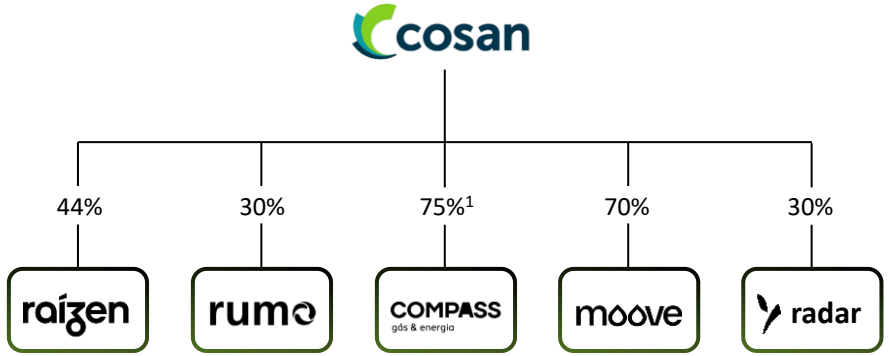

Key Financials

BRL bn	*LTM*
Market Cap	19.6
Dividends Received	2.6
Interest Paid	3.1
Net Debt	9.7
No. of Subsidiaries	5

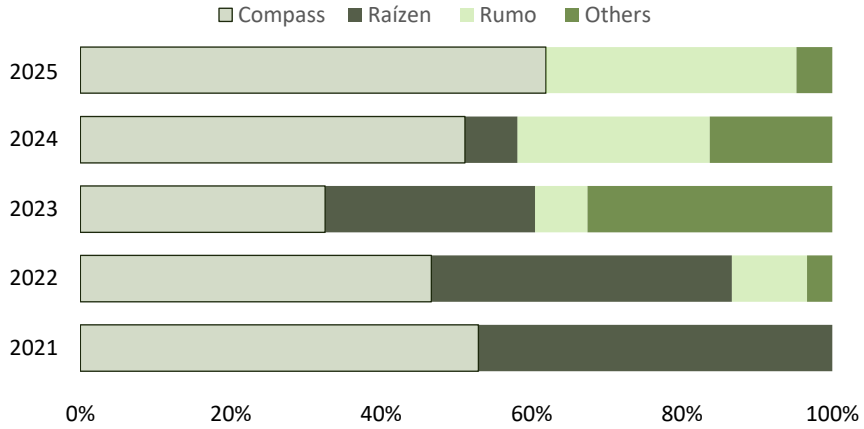

Cosan's Investment Portfolio

Equity holdings structure reflecting Cosan's capital allocation model

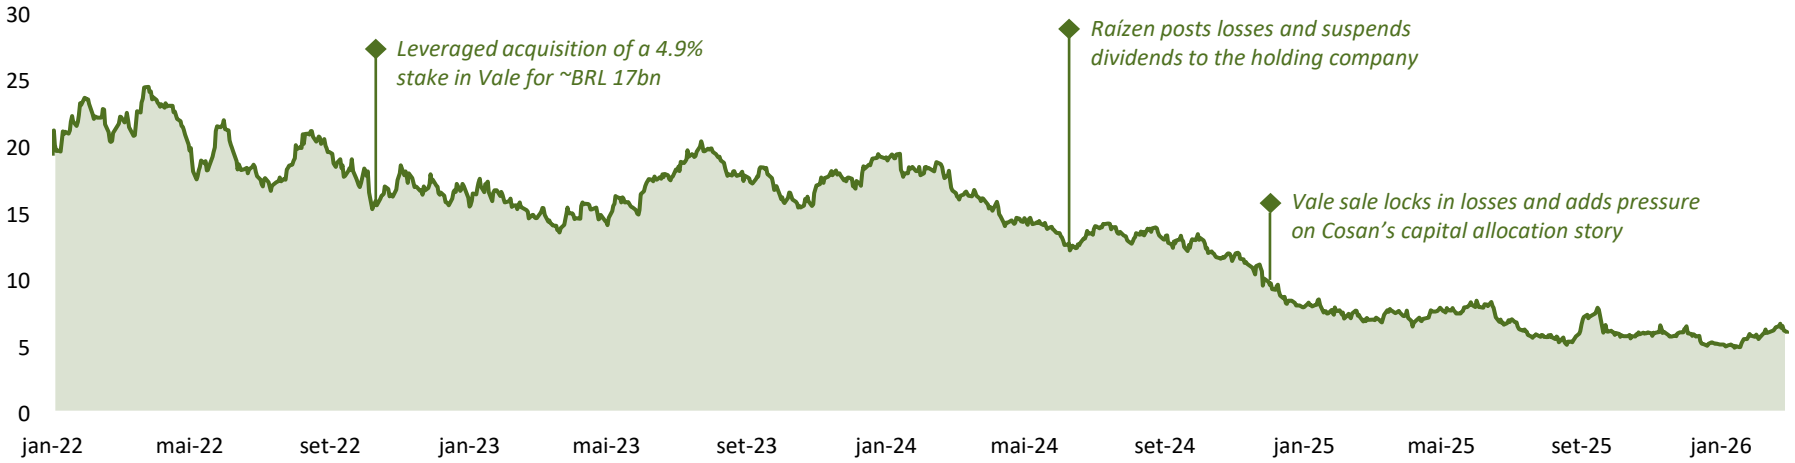

Cosan's Dividends Received Breakdown [%]

Compass stands out as the crown jewel of Cosan's portfolio

Cosan Share Price Performance [BRL]

Over 70% share price decline in the last four years reflects market penalization of capital allocation decisions

Source: Cosan, Bloomberg Intelligence
Notes: (1) Post-IPO Ownership

Addressing the 'Oversized Mistake' in Vale

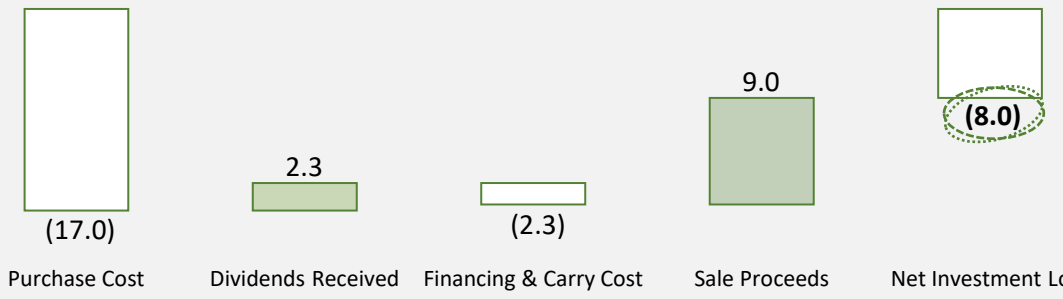

High interest rates and poor investment timing in 4.9% of Vale led to a BRL 7.5bn loss and mandatory deleveraging

Vale S.A. Stock Price Performance - VALE3 [BRL]

Entry near cycle highs and prolonged price volatility drove mark-to-market losses on the position

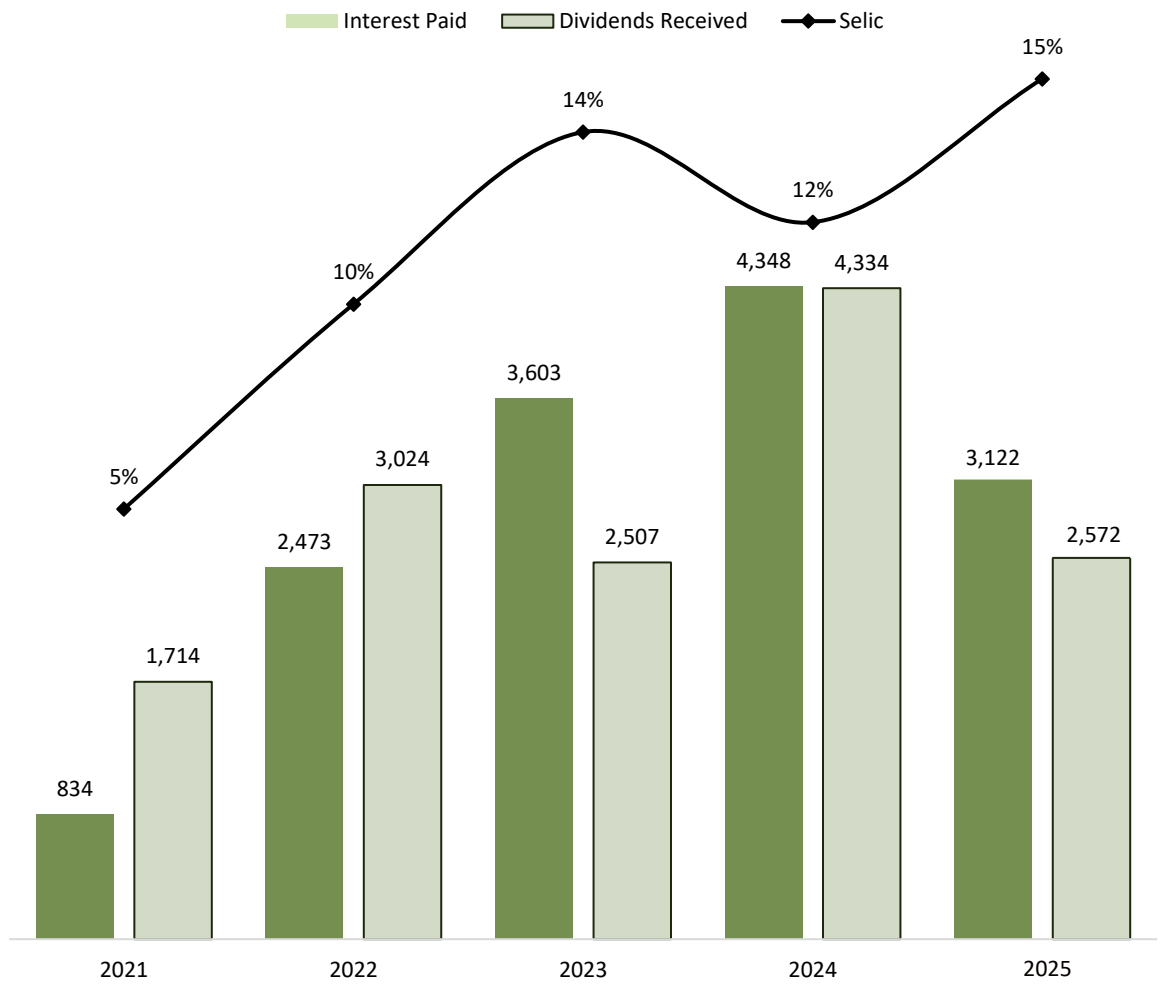

Cosan's Net Investment Loss on Vale Transaction Breakdown [BRL bn]

Interest Paid vs. Dividends Received vs. Selic Rate [BRL mm, %]

Debt servicing costs exceeded dividend inflows as rates surged, creating a snowball effect

Source: Cosan, Bloomberg Intelligence

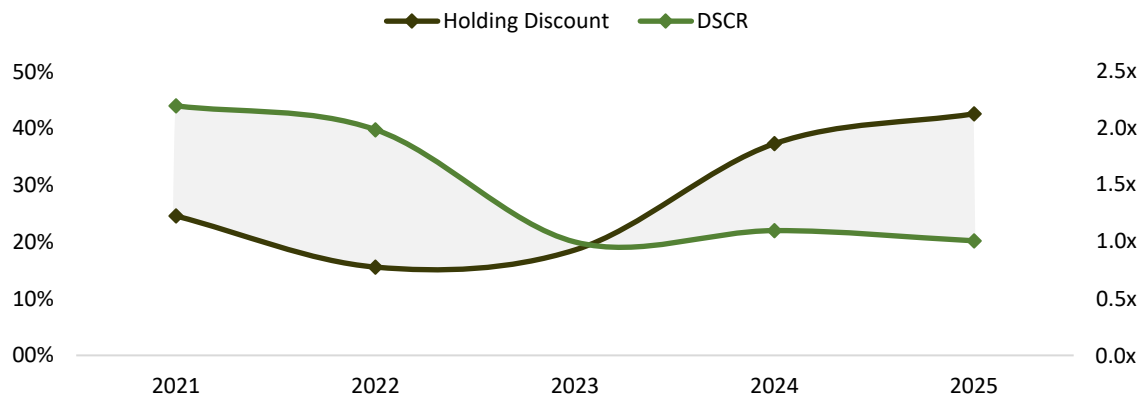

Notes:

Cosan at a Turning Point But Deleveraging Must Continue

High leverage continues to pressure Cosan's valuation and cash flows, reinforcing the need for continued deleveraging despite the recent capital injection

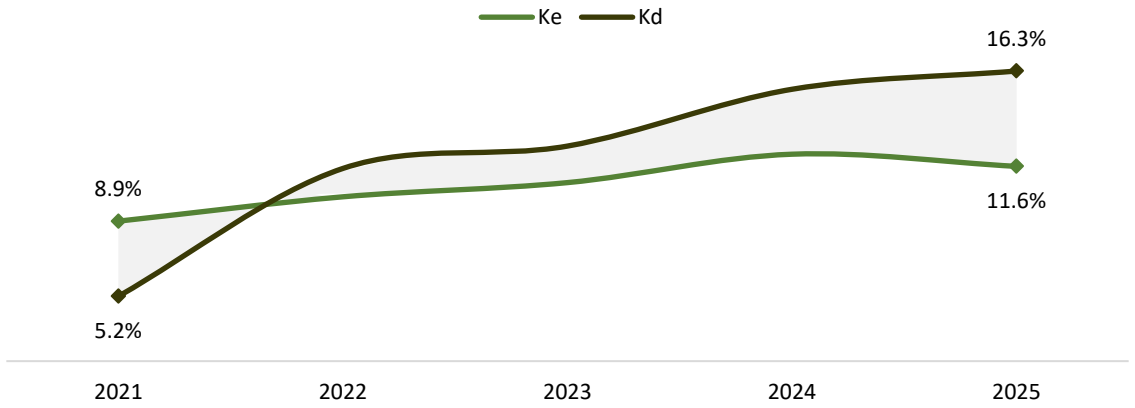

Holding Discount and DSCR Cosan Holding [%, x]

Higher holding-level leverage was penalized through a wider holding discount

Cosan's Cost of Equity vs Cost of Debt [%]

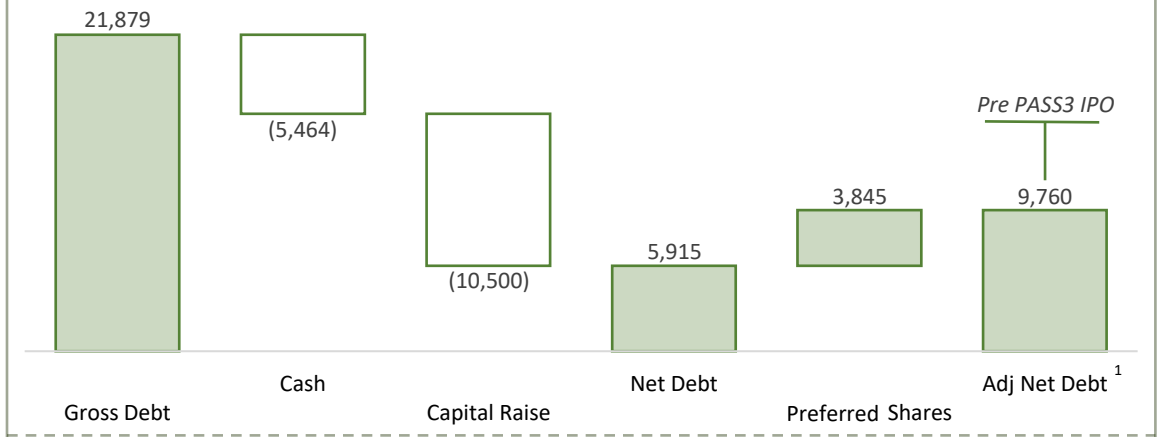

Cost of debt exceeds equity since 2022, with no holding-level tax shield

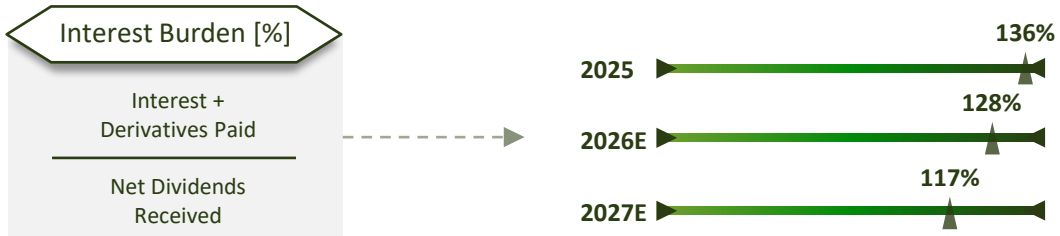

High Leverage Forced Cosan to Seek a BTG-led Equity Injection [BRL mm]

"The capital increase, executed at **the lowest share** price in the past ten years and at the moment of the company's highest leverage in its history, will reduce **more than half** of the corporate debt"

21 Sep, 2025

However, Interest is still expected to **consume a large share** of future dividend inflows:

Notes: (1) Adj. Net Debt as reported in 2025

Gradual Dissociation of the Holding Structure

Recent governance and cost actions indicate a transition toward a leaner structure

Post-Transaction Board Structure

First dilution of Rubens Ometto's control following the 2025 transaction

Holdco Structure No Longer Strategically Justified

No cross-asset synergies and non-cash-generative holdco debt create valuation drag

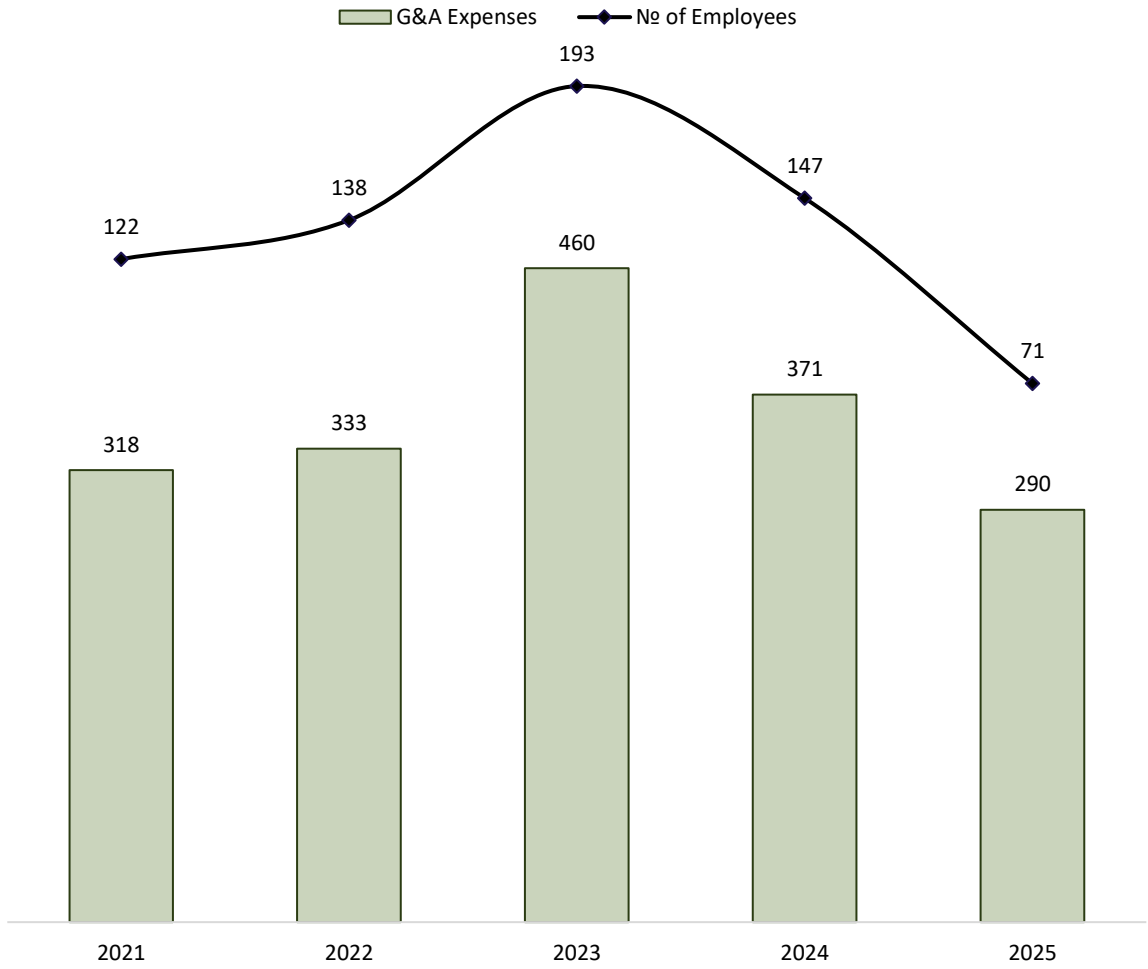

"At this point, the portfolio is already consolidated and there are **no material operational synergies that justify maintaining a centralized capital allocator**. Carrying debt at the holdco level without direct cash generation is structurally inefficient, so **our priority is to move leverage towards zero**."

Gabriel Martins, Head of Strategy at Cosan

Holdco G&A Expense and Headcount Evolution [BRL mm, %]

G&A reduction accompanied by headcount cuts indicates management's focus on simplifying cost structure

Source: Cosan, BTG Pactual

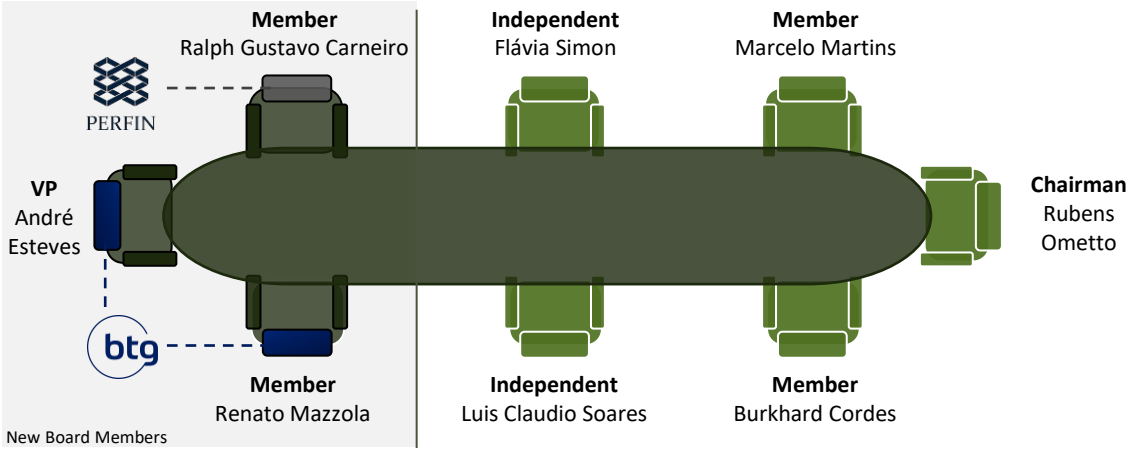

Notes:

Gradual Dissociation of the Holding Structure

First dilution of Rubens Ometto's control following the 2025 transaction

Holdco Structure No Longer Strategically Justified

No cross-asset synergies and non-cash-generative holdco debt create valuation drag

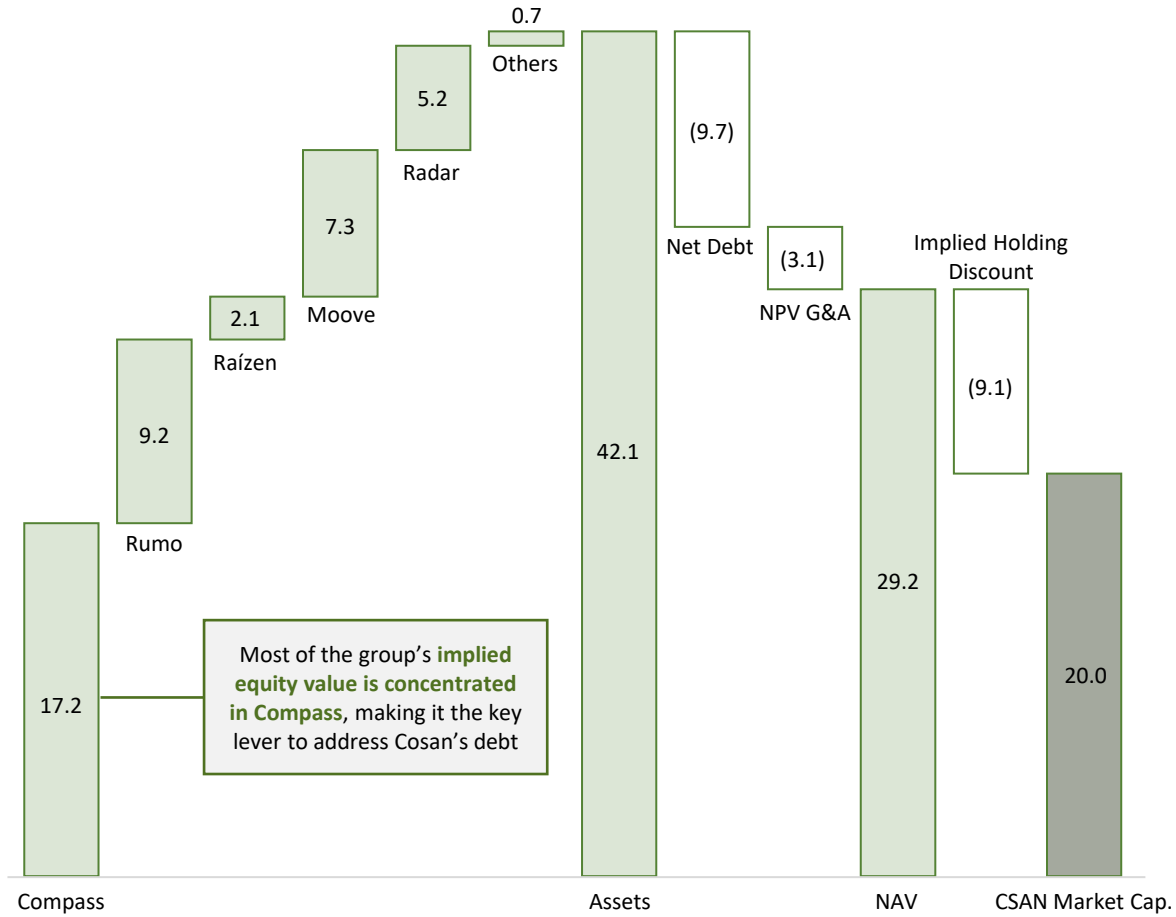

"At this point, the portfolio is already consolidated and there are **no material operational synergies that justify maintaining a centralized capital allocator**. Carrying debt at the holdco level without direct cash generation is structurally inefficient, so **our priority is to move leverage towards zero**."

Gabriel Martins, Head of Strategy at Cosan

Cosan's Market Cap Decomposition[1] and Implied Holding Discount [BRL bn]

Despite value concentration in Compass, the market continues to penalize the holding structure

Source: Cosan, Compass, Rumo, Raízen, BTG Pactual
Notes: (1) Decomposition based on pre-IPO reported data

Compass, in a Nutshell

The context behind Compass' dominant performance in Cosan's portfolio

COMPASS gás & energia

Originating from the expertise of Comgás [acquired in 2012], Compass became an independent company in 2020. With BRL 13 billion invested over five years, it has established itself as Cosan's most successful asset, operating as an integrated platform across the Distribution and Marketing & Services [Edge] segments

Shareholders

Cosan 10	Cosan	bradesco	Others

Compass Natural Gas Distribution Portfolio Across Brazil

Strong control positions across regulated gas distribution markets

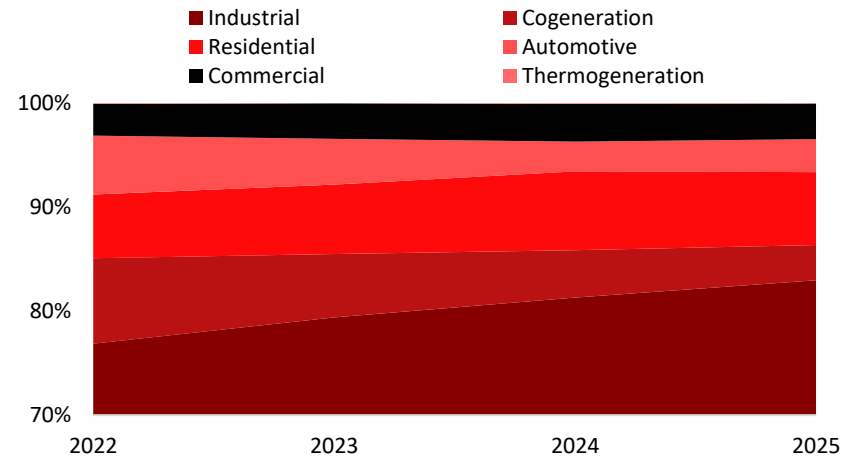

Compass EBITDA, Dividends Paid and EBITDA Mg. [BRL mm, %]

Compass´ consistent cash and dividend generation as are clear IPO draws

Compass' Natural Gas Distribution by Consumer Class [%]

Gradual movements towards residential class explain operating efficiency

Source: Compass, Sulgás, SCGás, Compagás, Commit, Naturgy, BTG Pactual, ARSESP

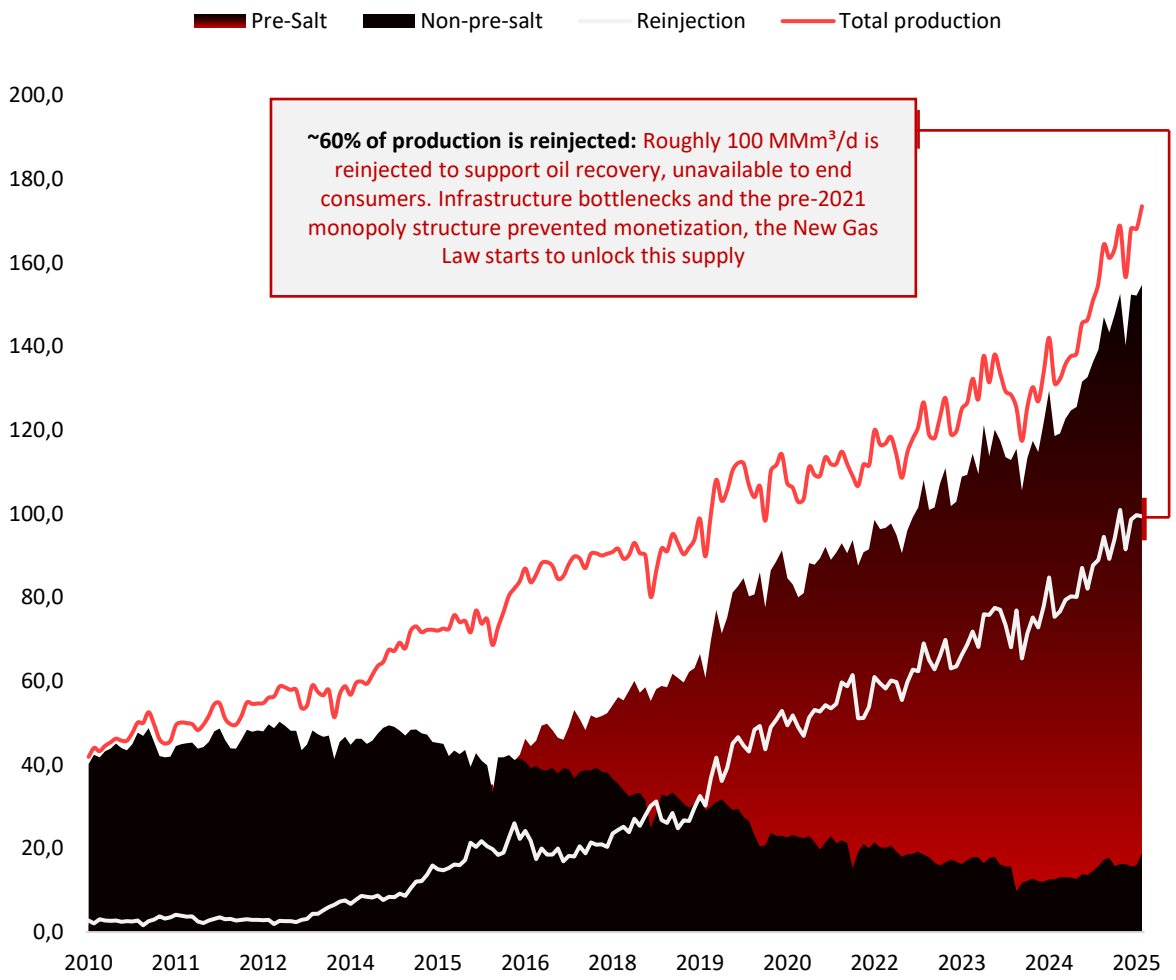

Notes: (1) Cosan Dez, Cosan´s Subholding

Brazil's Gas Paradox

Resource-rich but downstream-poor: Brazil lags peers across infrastructure, energy mix and last-mile customer penetration

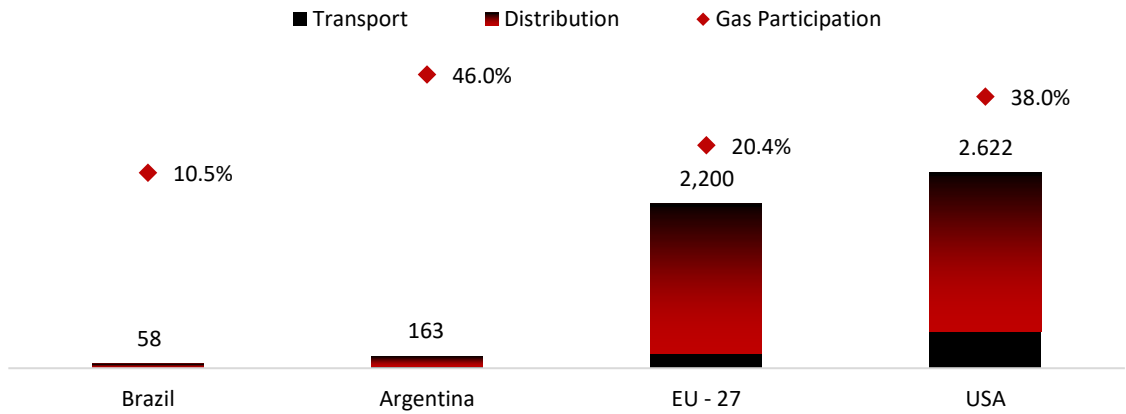

Daily Natural Gas Production in Brazil [MMm³/day]

Pre-salt growth drove record output, but ~60% never reaches the market

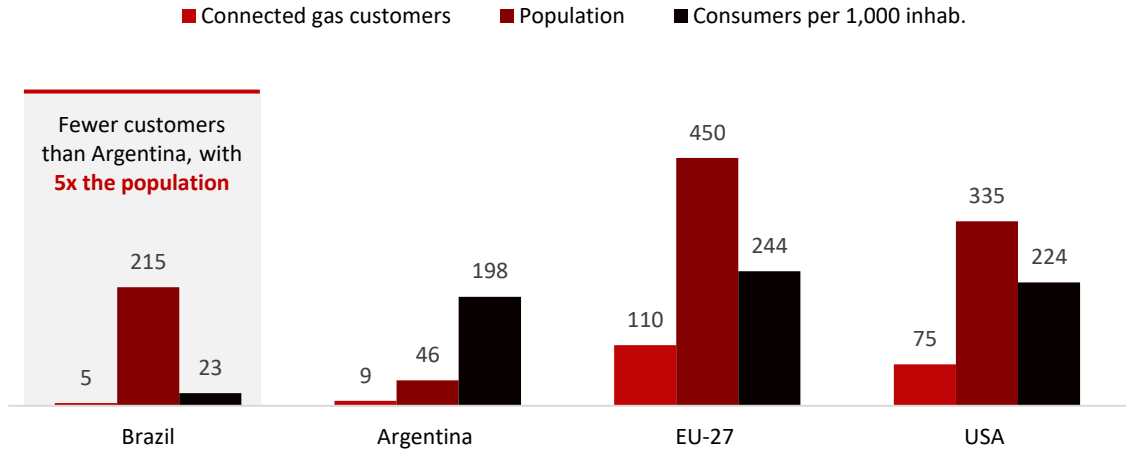

National Natural Gas Pipeline Stretch by Nature [000's km] x Gas [% Energy Mix (2024)]

Lack of infrastrcuture represents an opportunity for local distribution companies with 2021 advances

Connected Gas Customers [mm] x Penetration [Customers per 1,000 Inhabitants]

Only 23 of every 1,000 Brazilians are connected to piped gas, ~10x below peer markets

Source: Compass, Bloomberg Intelligence

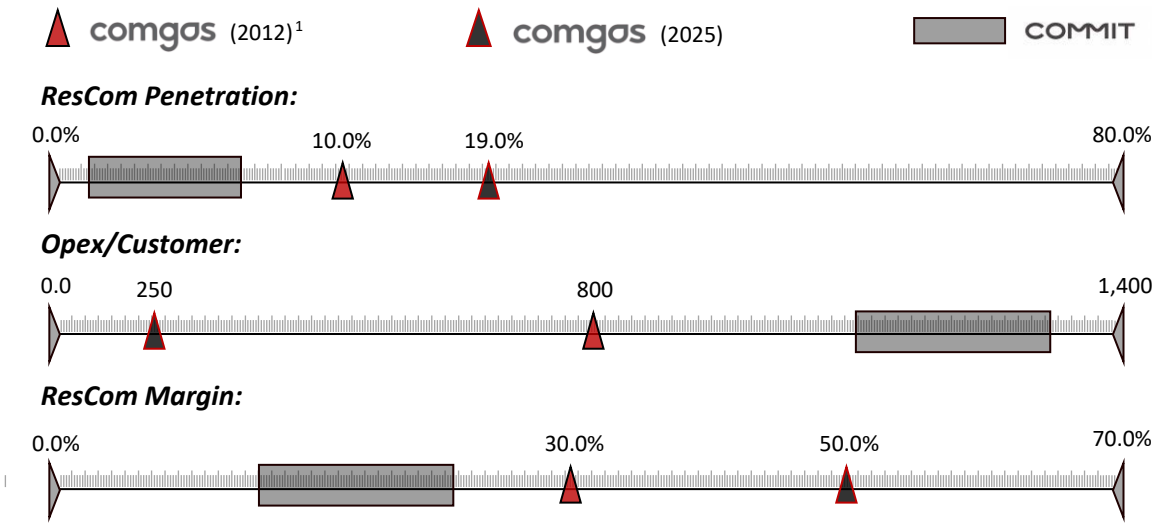

Notes:

Compass's Twin Engines

A proven Comgás execution playbook plus a fast-growing Edge platform, Compass captures across regulated and free segments

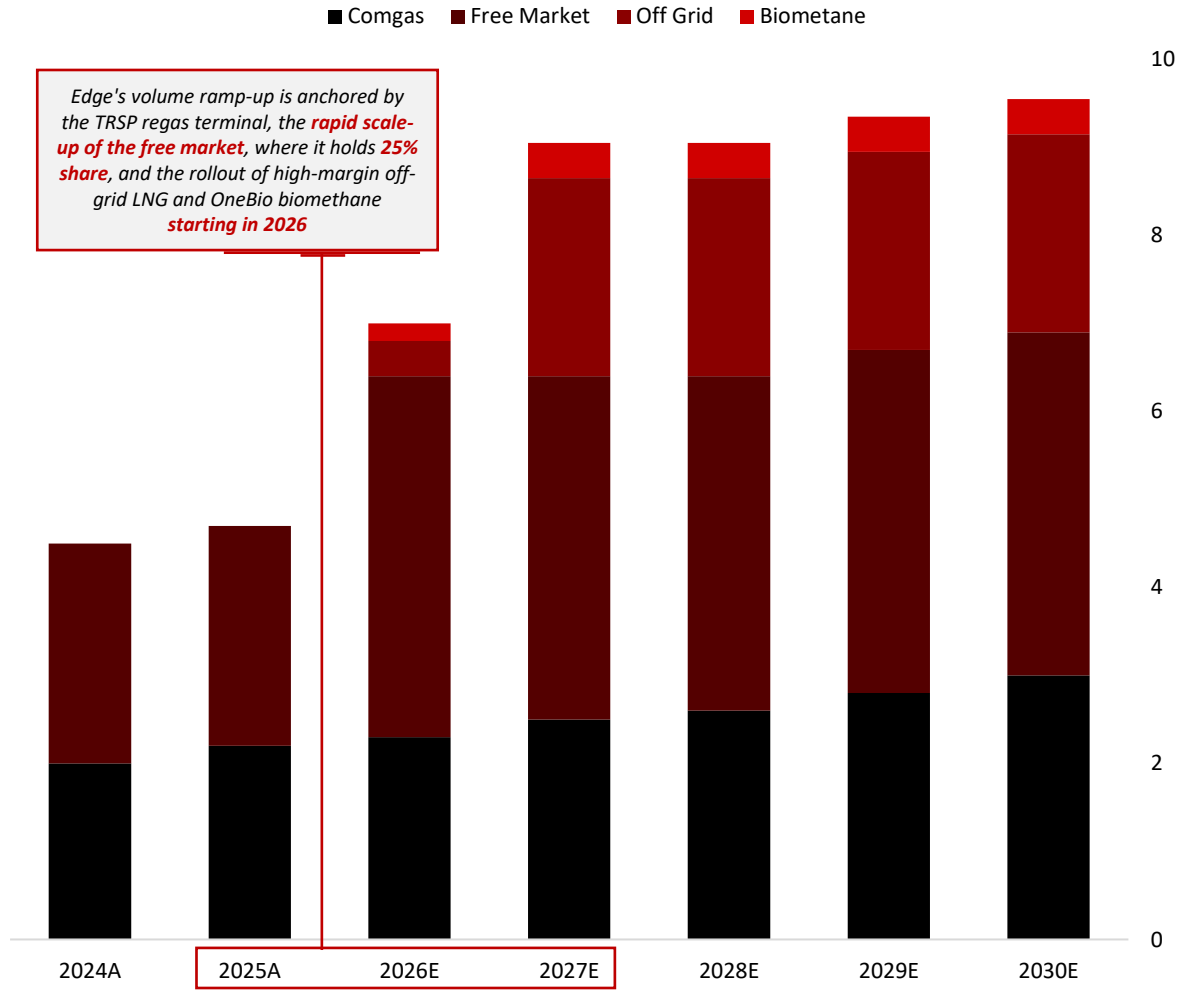

Comgás: a Proven Playbook for a More Open Market

Dimension	Pre-2021	Post-Lei 14.134/2021
Transport	Petrobras monopoly (TBG, TAG, NTS)	Mandatory third-party access (TPA) + entry-exit model
Commercialization	Captive market via state distributors	Free market: large consumers buy directly from producers/traders
Industry structure	Vertically integrated	Forced unbundling, TAG (2019), NTS (2017–21) and Gaspetro (2022) divested
LNG & Biomethane	Marginal, no clear rules	LNG terminals under TPA, biomethane regulated as natural gas

EDGE Projected Gas Volume Growth by Segment [BRL MM m3/d]

Growth is driven by free-market migration and off-grid LNG, expanding EDGE beyond Comgás' regulated base

Source: Compass, Comgás, Commit, EDGE, Bloomberg Intelligence
Notes: (1) 2012 is the year Compass acquired Comgas

PASS3 IPO Pricing | May 7, 2026

100% secondary offering priced at the low end of the range, enabling Cosan to partially monetize Compass and accelerate holding-level deleveraging

Offer Overview

BRL 20.0 bn	BRL 3.2 bn	5.9 x	16.0 %	BRL 28.00
Equity Value	Total Proceeds	EV/EBITDA	New Free Float	Price per Share

	Pre-Offer			Post-Offer	
	Ordinary Shares [mm]	Ownership [%]	IPO [mm]	Ordinary Shares [mm]	Ownership [%]
Controlling Shareholders [Cosan Group]	**628**	**88.0%**	**(90)**	**538**	**75.4%**
Cosan Dez S.A.	486	68.0%	-	486	68.0%
Cosan S.A.	143	20.0%	(90)	53	7.4%
Non-Controlling Shareholders	**86**	**12.0%**	**90**	**176**	**24.6%**
Pre-IPO Financial Investors	86	12.0%	(24)	62	8.6%
New Investors	-	0.0%	114	114	16.0%
Total Shares Outstanding	**714**	**100%**	**-**	**714**	**100.0%**

Key Insights:

Partial monetization without loss of control

Cosan reduced its Compass stake by **12.6 p.p.**, selling **~90mm shares**, while still retaining **75.4% ownership** post-IPO

Secondary proceeds supported Cosan deleveraging

Compass received no primary proceeds; **~BRL 2.5bn** went to Cosan and **~BRL 0.7bn** to other selling shareholders

16.0% free float backed by strong demand

The IPO placed **~114 mm shares**, with demand **3.0x** covered, **100+** investors and **~60%** foreign participation

Notes:

Why PASS3 Priced at the Low End

After a 56-month IPO drought, PASS3 reopened Brazil's IPO window, but scarred investors still required a low-end pricing discount despite returning foreign demand

Brazil IPO Market — Annual IPO Count [#]

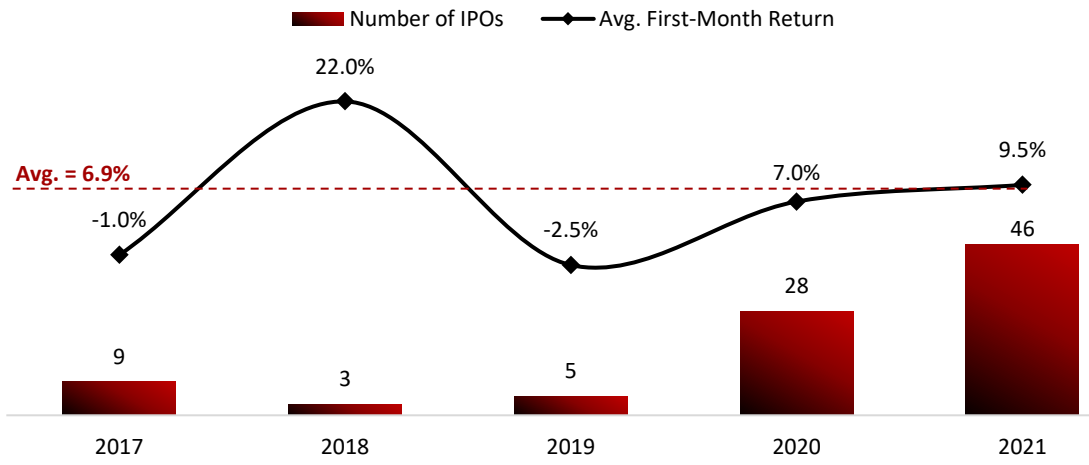

The rate shock closed the window: *Selic rose from 2.0% in Mar-21 to 13.75% in Aug-22, and later reached 15.0% in 2025, pushing investors back into fixed income*

Market depth shrank: *Between 2022–2025, Brazil saw 44 delisting tender offers and the number of listed companies fell from 385 to 335*

Risk appetite deteriorated further after Americanas: *The Jan-23 accounting scandal, foreign outflows and rising delistings reinforced investor selectivity*

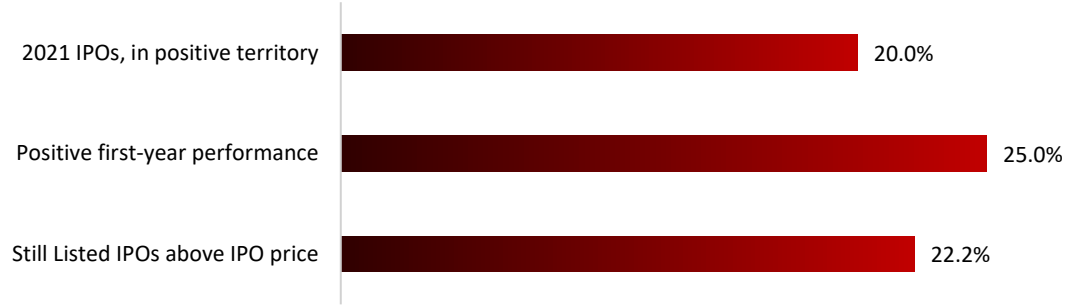

Brazil IPOs and Avg. First-Month Return [#, %]

Positive aftermarket performance suggests IPOs priced with a reopening discount

Investor Scars from Prior IPO Vintages [%]

Scarred IPO investors forced PASS3 to offer a reopening discount despite strong demand

PASS3 Bookbuilding Price Range [BRL/Share]: 28.0 — 35.0

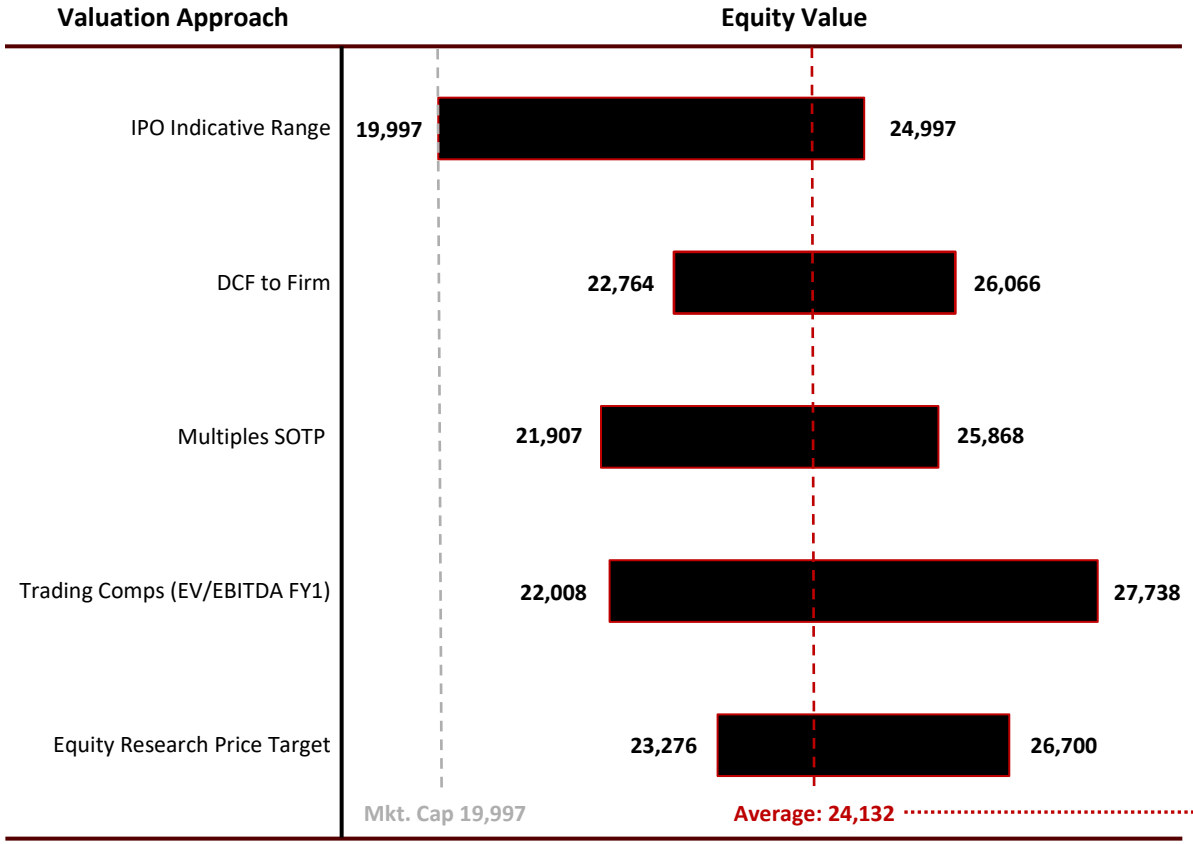

Source: Compass, Bloomberg Intelligence, UF
Notes:

Compass Is Priced for Today, Not for What It's Worth

Compass implied equity value of BRL 24 bn represents a 21% premium to the IPO price, a gap that Cosan is positioned to capture

Football Field Analysis [BRL mm]

Compass undervaluation reflects IPO discount and market timing

Commentary

- Multiples SOTP valuation uses an EV/RAB multiple for DisCos and an EV/EBITDA multiple for EDGE
- EV/RAB multiples of 1.0x–1.3x applied across companies
- EDGE multiples are based on international comps and adjusted by a 0.69x Brazil factor

Sensitivity of Compass Equity Value to EDGE Growth Assumptions [BRL mm]

Even under downside EDGE scenarios, valuation remains above IPO levels

Fulfillment of 2027 Company Target in Off-Grid Volumes [%]

Free Market Growth [%]	55.0%	65.0%	75.0%	85.0%	95.0%
3.0%	22,764	23,525	24,286	25,047	25,808
4.0%	22,826	23,587	24,348	25,109	25,870
5.0%	22,889	23,651	**24,412**	25,173	25,934
6.0%	22,955	23,716	24,477	25,238	25,999
7.0%	23,022	23,783	24,544	25,305	26,066

Compass Trades Below Intrinsic Value

Implied Value:

BRL 33.78
Price per Share

IPO Price:

BRL 28.00
Price per Share

*Across all valuation approaches, Compass converges on **~R$24bn equity value**, implying **BRL 33.78** per share, a **21% premium** to the **BRL 28.00 IPO price**. This gap suggests Compass may be trading **below intrinsic value**, creating a potential opportunity for **Cosan to unlock additional value** from its controlling stake*

Source: Cosan, Compass, Edge, Bloomberg Intelligence
Notes:

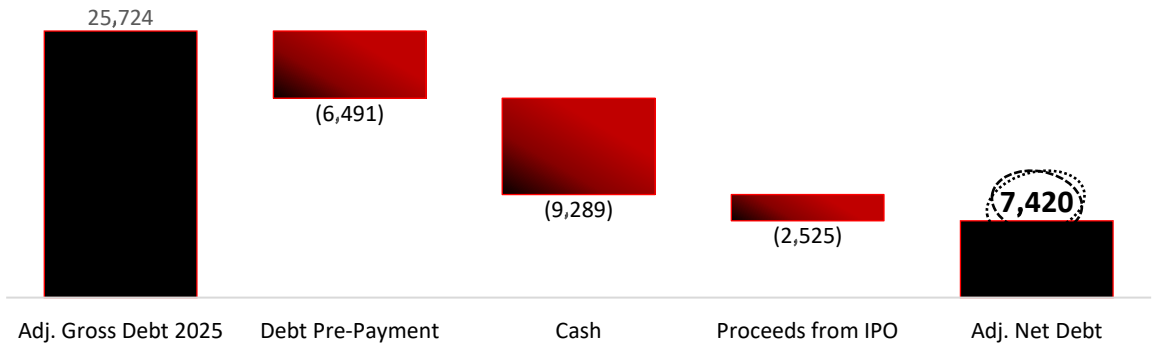

Cosan's Debt Problem Is Not Solved

Even after debt pre-payment, cash usage and IPO proceeds, remaining HoldCo leverage still pressures dividend coverage and keeps deleveraging at the center of the story

Post-IPO Holding Debt Structure [BRL mm]

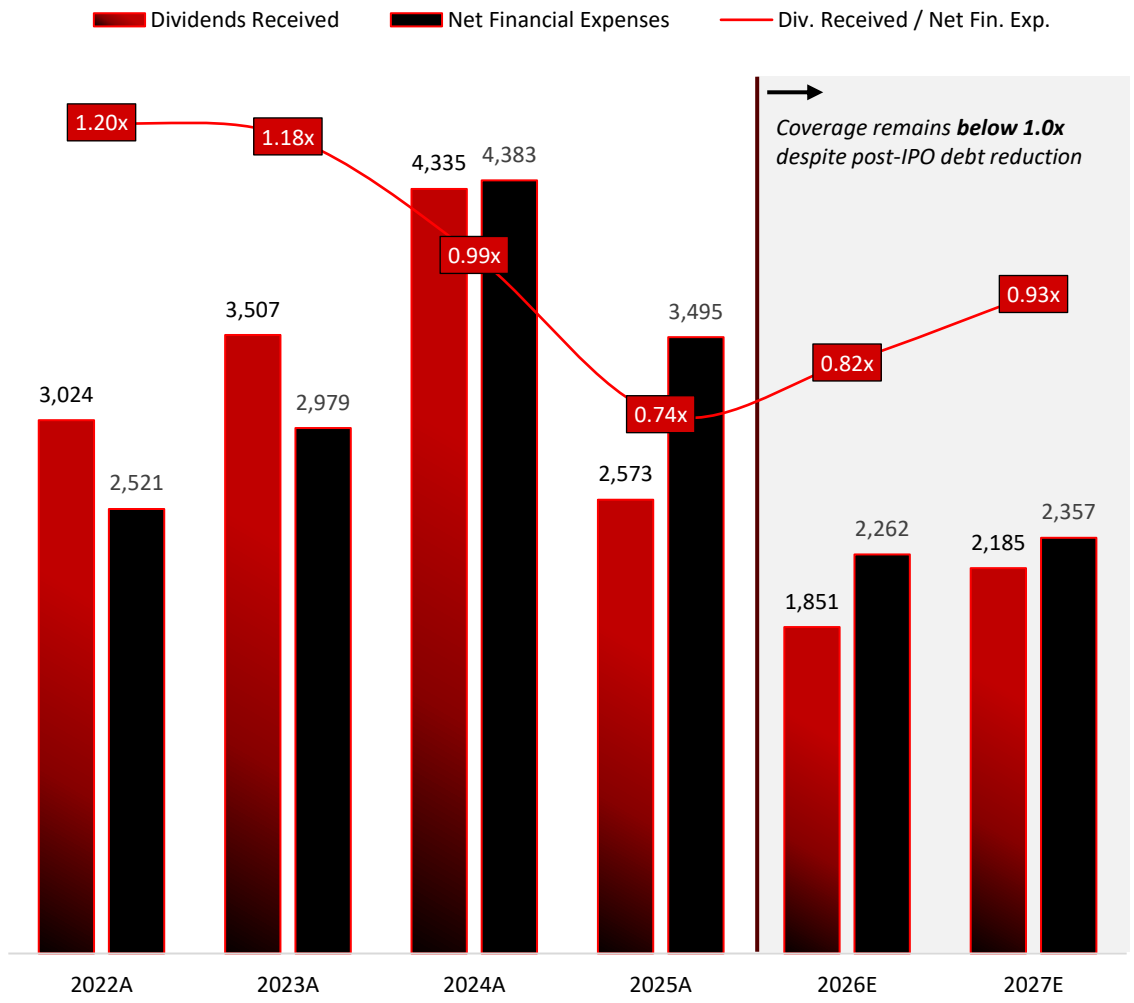

Cosan Holding	Company	2025	Post-IPO
Debentures	Cosan S.A.	12,002	11,436
Bonds	Offshores	8,675	2,786
Others	Cosan S.A.	1,167	1,167
Gross Debt		**21,876**	**15,389**
Preferred Shares Cosan Dez	Cosan Dez	3,845	3,845
Expanded Gross Debt (Ex-IFRS 16)		25,724	19,234
(-) Cash & Securities		(15,964)	(11,814)
Expanded Net Debt		**9,760**	**7,420**

How Cosan Reaches BRL 7.4bn Net Debt [BRL mm]:

Cosan's Dividends Received vs. Net Financial Expenses [BRL mm, x]

Shrinking dividend coverage shows why deleveraging remains central to the equity story

Source: Cosan
Notes:

Two Moves, One Outcome: Zero Holding-Level Debt

PN conversion and Compass spin-off jointly bring Cosan's expanded net debt to zero

1. From PN to ON: Erasing Hidden Leverage

Cosan Dez preferred shares, economically subordinated debt via put options and fixed return accrual, are converted into Compass ordinary equity, removing BRL 3.8 bn from expanded net debt

2. Separating Compass, Closing the Debt

A direct share distribution to existing shareholders plus a secondary offering at 15% discount monetize the residual stake and fully prepay Cosan's net debt

Two Moves, One Outcome: Zero Holding-Level Debt

PN conversion and Compass spin-off jointly bring Cosan's expanded net debt to zero

1. From PN to ON: Erasing Hidden Leverage

Cosan Dez preferred shares, economically subordinated debt via put options and fixed return accrual, are converted into Compass ordinary equity, removing BRL 3.8 bn from expanded net debt

2. Separating Compass, Closing the Debt

A direct share distribution to existing shareholders plus a secondary offering at 15% discount monetize the residual stake and fully prepay Cosan's net debt

Converting Pressure into Deleveraging

Preferred shares previously treated as quasi-debt are converted into Compass ON equity, reducing Cosan's expanded net debt by BRL 3.8bn

Cosan Holding Debt Structure [BRL mm]

Cosan Holding	Company	Pre-Conversion	Post-Conversion
Debentures	Cosan S.A.	11,436	11,436
Bonds	Offshores	2,786	2,786
Others	Cosan S.A.	1,167	1,167
Gross Debt		15,389	15,389
Preferred Shares Cosan Dez	Cosan Dez	3,845	0

(-) Cash & securities		(11,814)	(11,814)
Expanded Net Debt		**7,420**	**3,575**

Shareholders' Agreement Highlights

Despite being legally structured as preferred equity, these instruments effectively ***behave, and therefore are classified, as subordinated debt within Cosan's capital structure, as they:***

Condition 1.

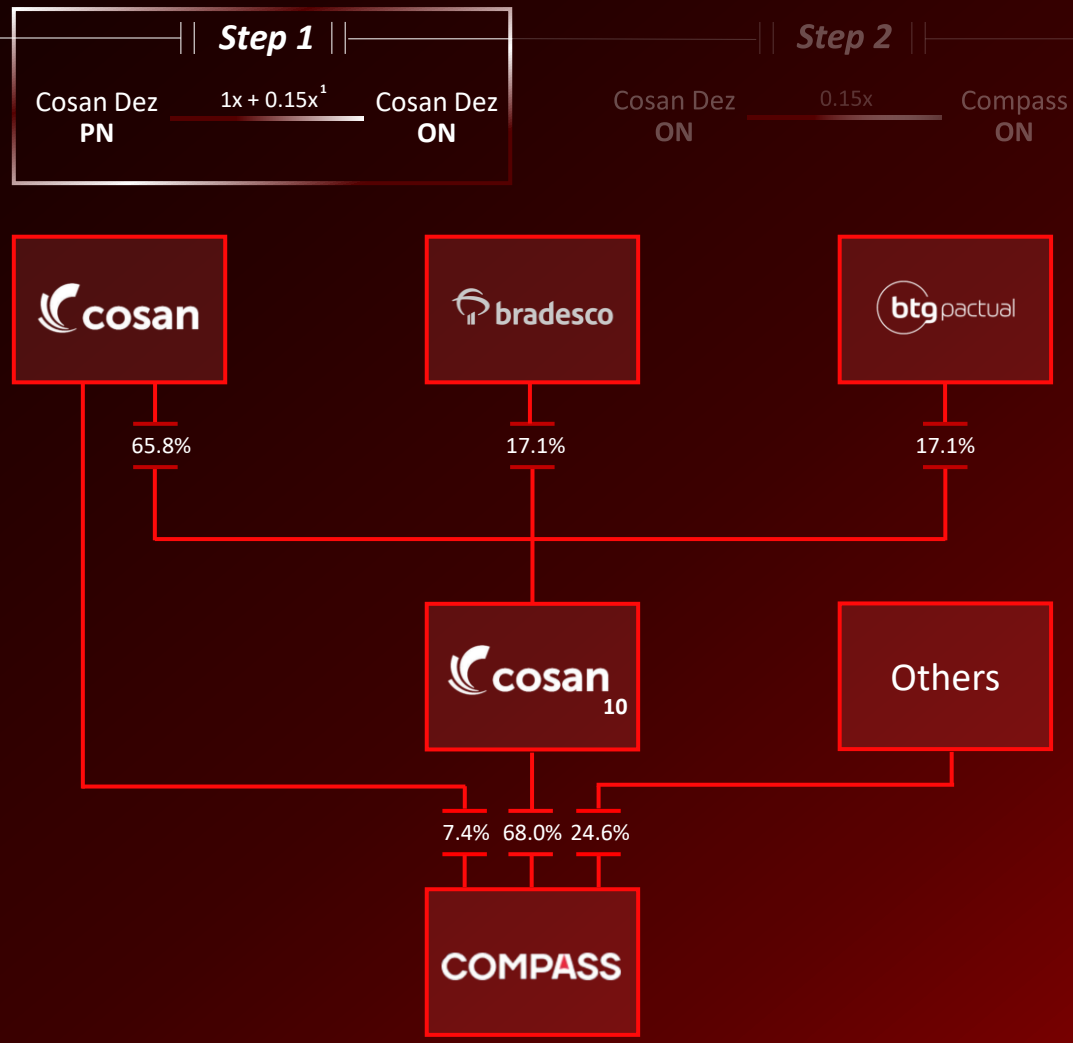

Apply contractual redemption features and a structured exit mechanism, including a ***put option granted to Banco Bradesco BBI and BTG Pactual****, exercisable in tranches from the 5th, 6th and 7th anniversaries of the December 30, 2025 transaction*

Condition 2.

Have embedded fixed return accrual

(Cosan S.A., Related Party Transaction Disclosure – Dec/30/2025)

Share Conversion Overview

Notes: (1) Conversion Premium

Converting Pressure into Deleveraging

Preferred shares previously treated as quasi-debt are converted into Compass ON equity, reducing Cosan's expanded net debt by BRL 3.8bn

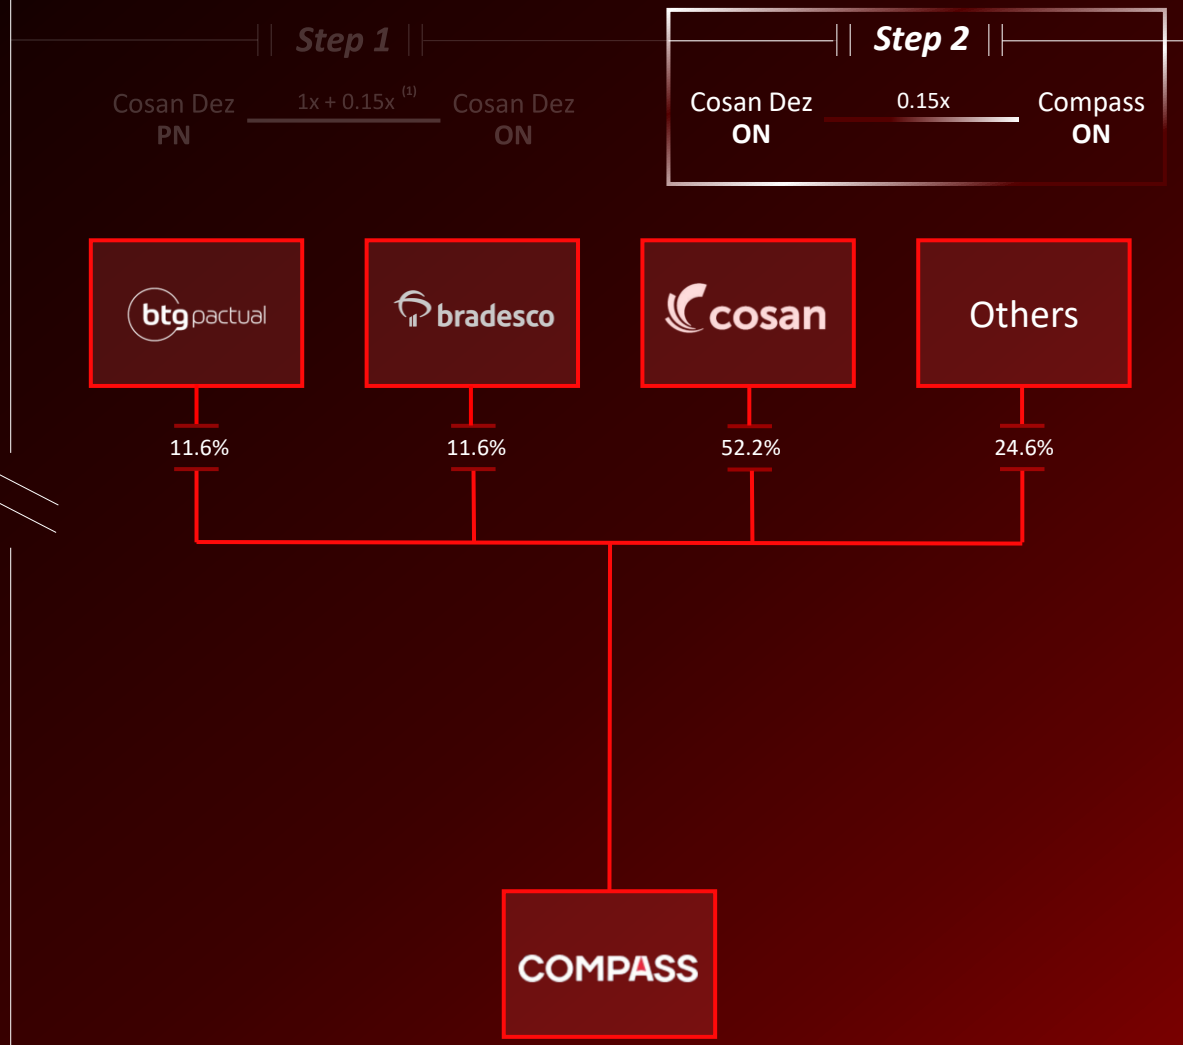

Cosan Holding Debt Structure [BRL mm]

Share Conversion Overview

Notes:

Two Moves, One Outcome: Zero Holding-Level Debt

PN conversion and Compass spin-off jointly bring Cosan's expanded net debt to zero

1. From PN to ON: Erasing Hidden Leverage

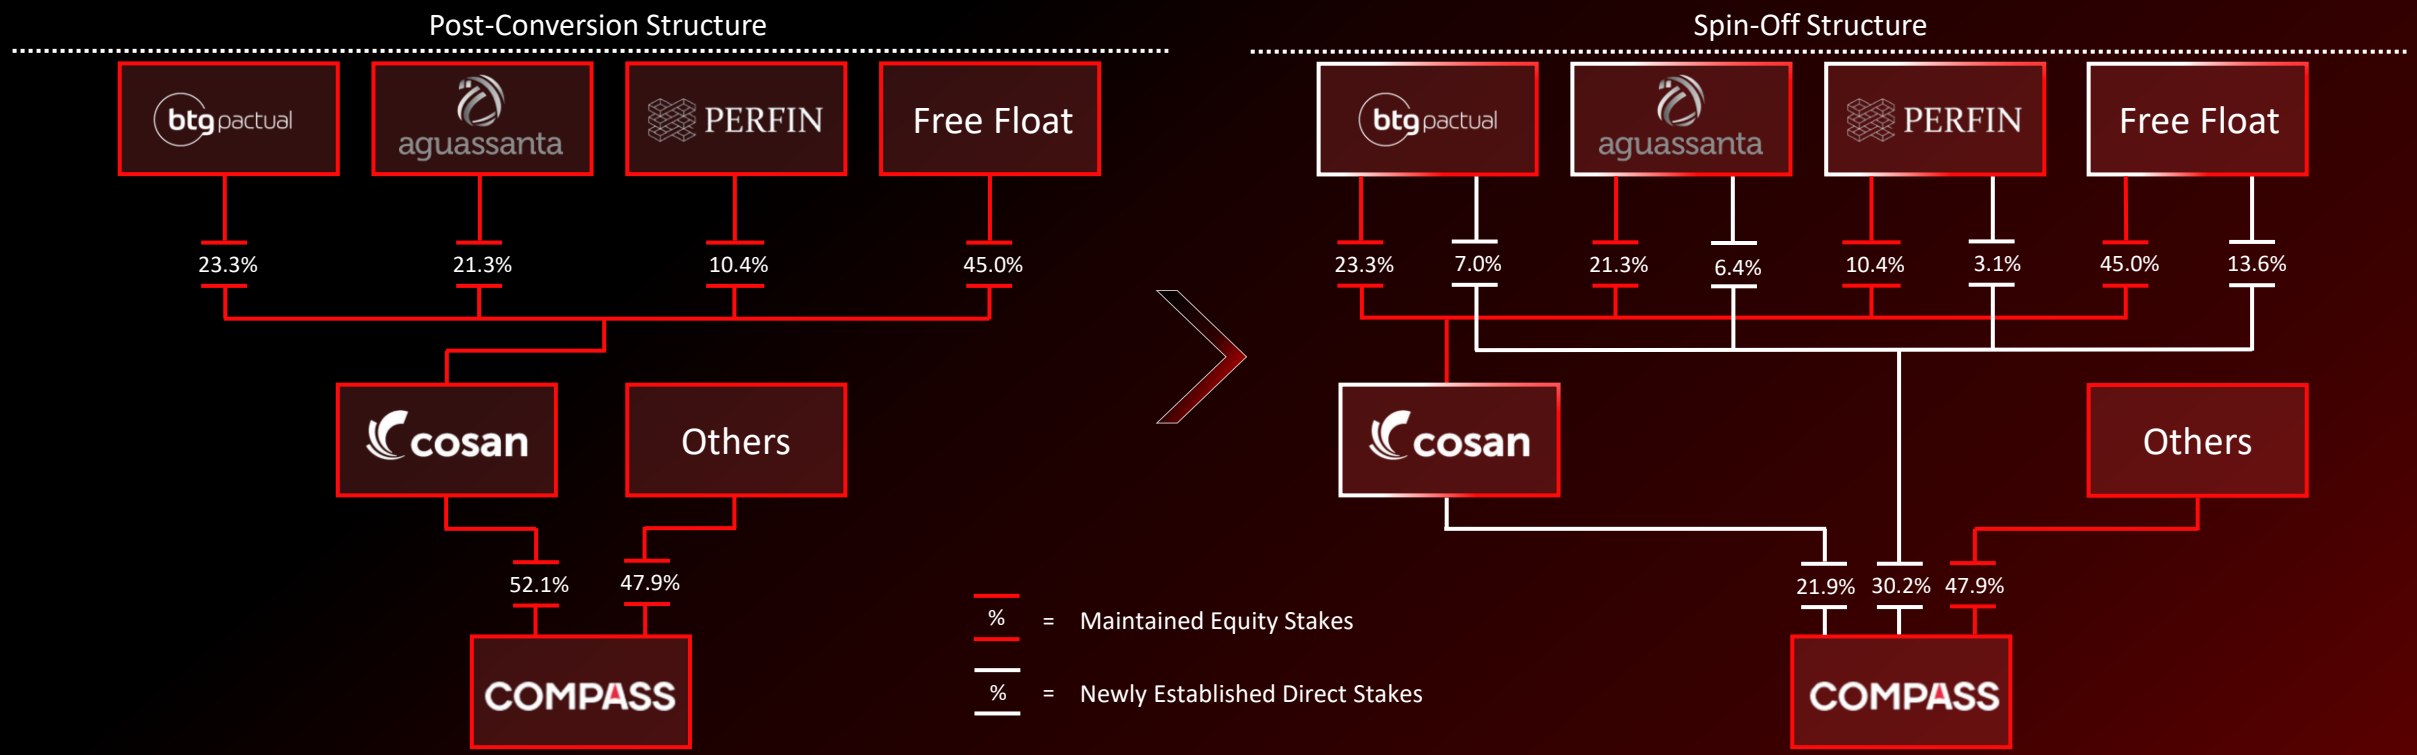

Cosan Dez preferred shares, economically subordinated debt via put options and fixed return accrual, are converted into Compass ordinary equity, removing BRL 3.8 bn from expanded net debt

2. Separating Compass, Closing the Debt

A direct share distribution to existing shareholders plus a secondary offering at 15% discount monetize the residual stake and fully prepay Cosan's net debt

Proposed Spin-Off of Compass to Cosan Shareholders

Transaction separates Compass from Cosan, establishing direct shareholder ownership while enabling Cosan's deleveraging

Transaction Overview:

STEP 1

Distribution of Compass Shares

- Majority of Cosan´s Compass stake distributed directly to Shareholders[1]
- Establishes direct ownership of Compass outside the holding structure

Value Impact [2] :

(+) Shareholders[1] receive Compass shares directly

(-) Portion of Compass remains temporarily at Cosan

STEP 2

Secondary Market Placement

- Remaining Compass stake sold to third-party investors
- Proceeds used to reduce Cosan's holding-level debt

Value Impact [2] :

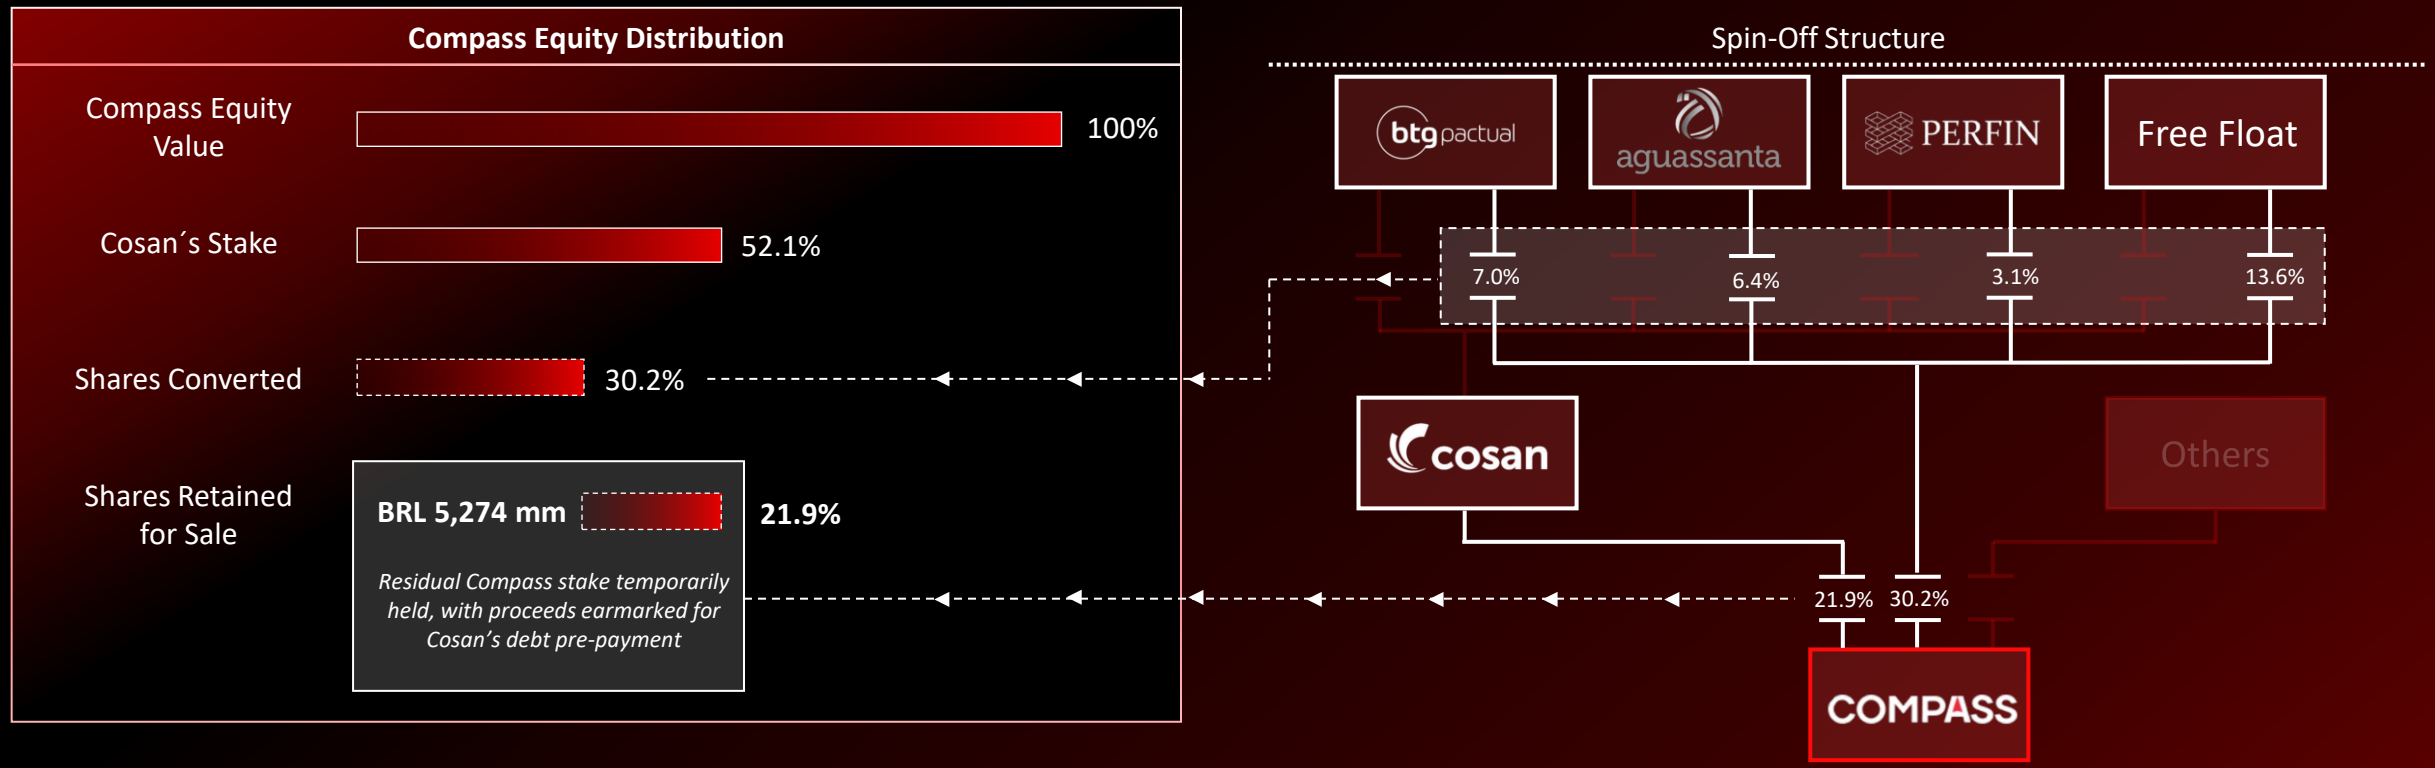

(+) Reduction in Cosan leverage and holding discount

(-) A portion of the Compass stake previously held within Cosan is sold to third-party investors

Notes: (1) Refers to Cosan's existing shareholder base (BTG Pactual, Aguassanta, Perfin and Free Float), (2) Value impact evaluated from the perspective of Cosan's existing shareholders (see note 1)

Splitting Cosan's Compass Stake

30.2% distributed directly to existing shareholders; the residual 21.9% (BRL 5.3bn) is retained for sale, with proceeds earmarked for debt prepayment

Transaction Overview :

STEP 1

Distribution of Compass Shares

- Majority of Cosan´s Compass stake distributed directly to Shareholders[1]
- Establishes direct ownership of Compass outside the holding structure

Value Impact [2] :

- (+) Shareholders[1] receive Compass shares directly
- (-) Portion of Compass remains temporarily at Cosan

STEP 2

Secondary Market Placement

- Remaining Compass stake sold to third-party investors
- Proceeds used to reduce Cosan`s holding-level debt

Value Impact [2] :

- (+) Reduction in Cosan leverage and holding discount
- (-) A portion of the Compass stake previously held within Cosan is sold to third-party investors

Notes: (1) Refers to Cosan's existing shareholder base (BTG Pactual, Aguassanta, Perfin and Free Float), (2) Value impact evaluated from the perspective of Cosan's existing shareholders (see note 1)

Anatomy of the Follow-On

BRL 4.5bn offer sized to fully prepay Cosan's residual net debt, with poison pill and lock-up protecting the new shareholder base

Secondary Follow-On Offering - Key Terms and Conditions

Condition 1 – Poison Pill Provision

No investor may acquire more than a 10% stake through the follow-on, limiting concentration and avoiding control conflicts

Condition 3 – Lock-Up

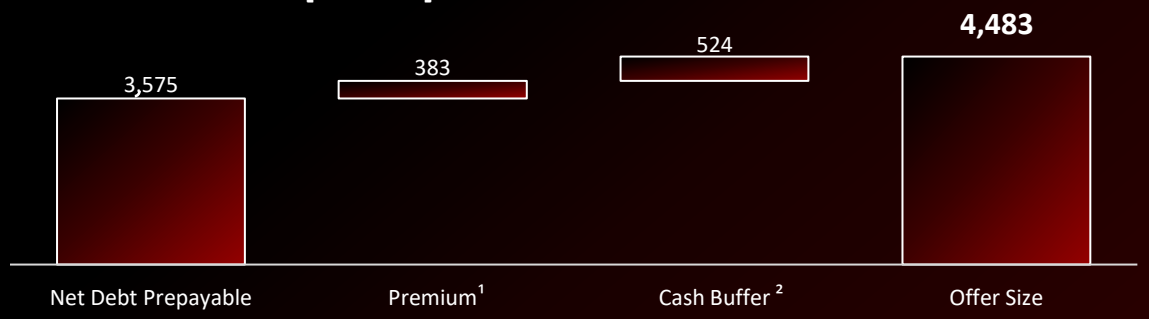

180-day lock-up restricting existing shareholders and management from selling their shares in the secondary market.

Condition 3 – Use of Proceeds

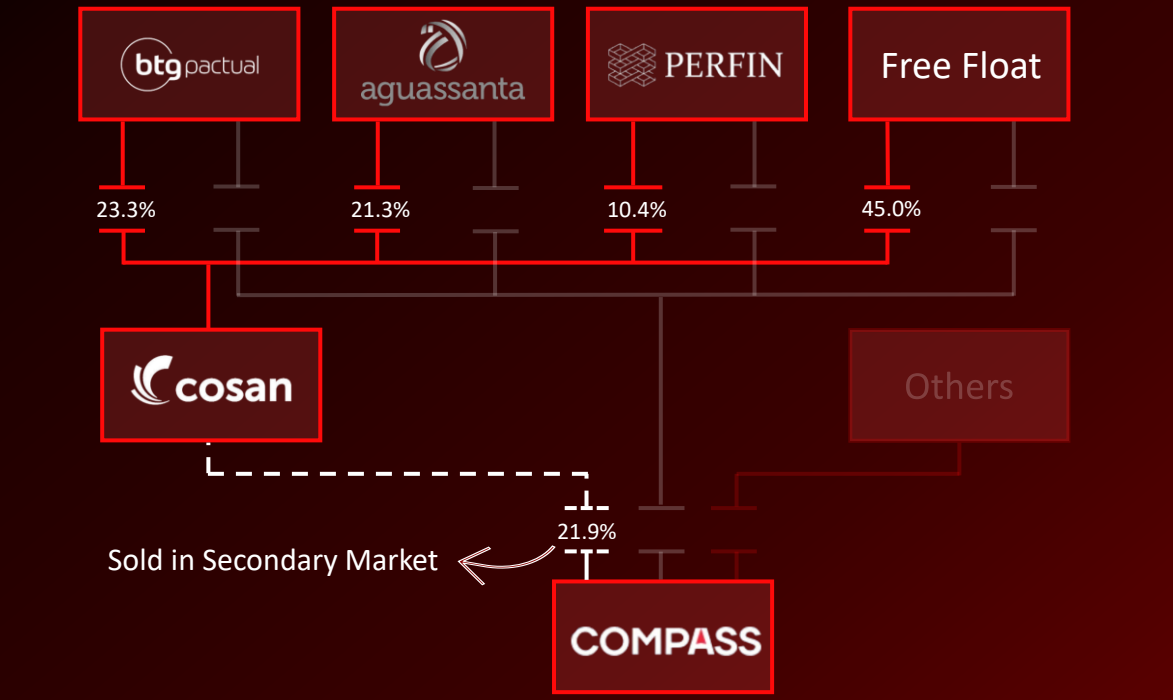

Primary tranche funds are exclusively earmarked for Cosan S.A.´s capital structure optimization.

Spin-Off Structure

Transaction Overview :

STEP 1

Distribution of Compass Shares

- Majority of Cosan´s Compass stake distributed directly to Shareholders[1]
- Establishes direct ownership of Compass outside the holding structure

Value Impact [2] :

(+) Shareholders[1] receive Compass shares directly

(-) Portion of Compass remains temporarily at Cosan

STEP 2

Secondary Market Placement

- Remaining Compass stake sold to third-party investors
- Proceeds used to reduce Cosan's holding-level debt

Value Impact [2] :

(+) Reduction in Cosan leverage and holding discount

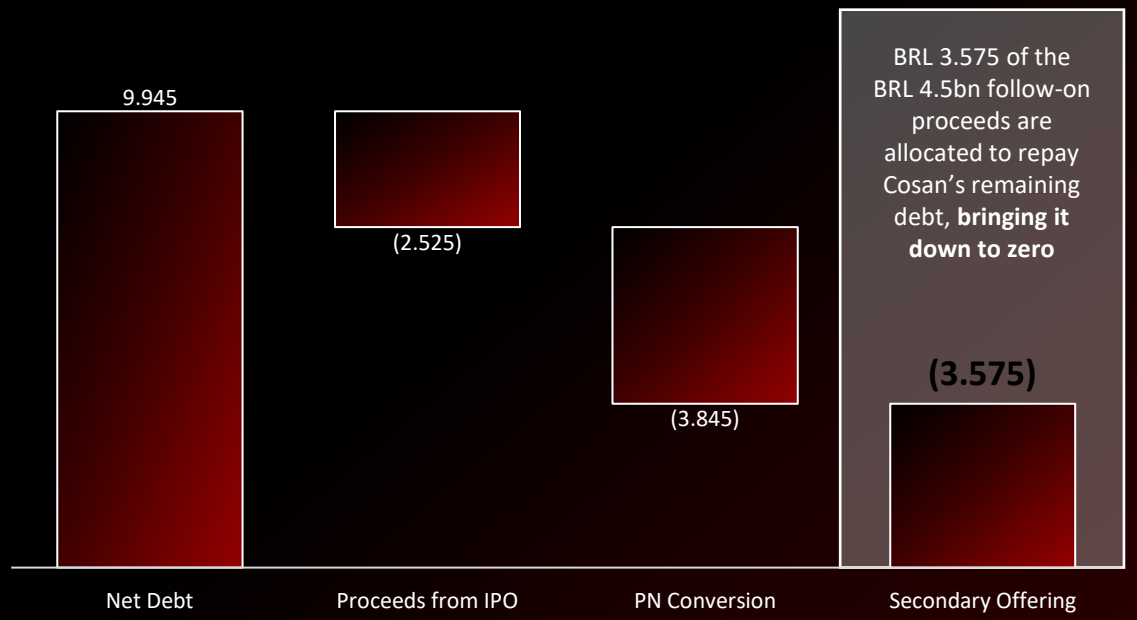

(-) A portion of the Compass stake previously held within Cosan is sold to third-party investors

Notes: (1): Premium required to prepay bonds (2): One year of D&A plus six months of financial results

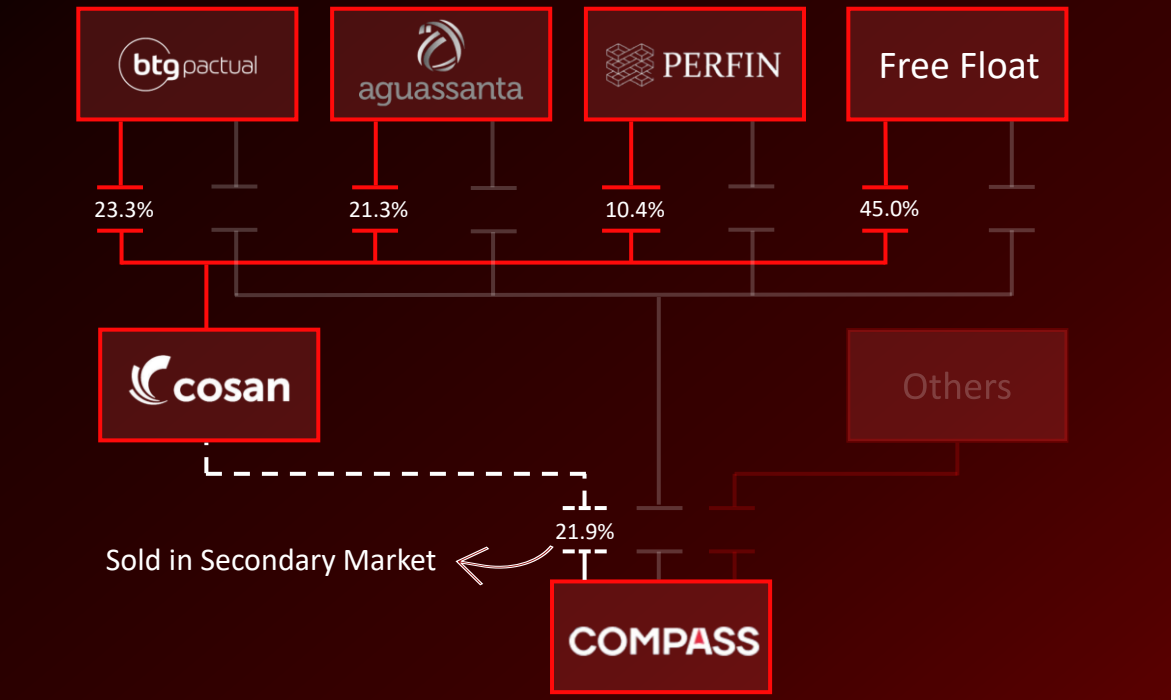

From BRL 9.9bn to Zero

IPO proceeds, PN conversion and the Compass follow-on together extinguish Cosan's holding-level net debt

Debt Reduction from Compass Secondary Sale [BRL mm]

Spin-Off Structure

Transaction Overview :

STEP 1

Distribution of Compass Shares

- Majority of Cosan´s Compass stake distributed directly to Shareholders[1]
- Establishes direct ownership of Compass outside the holding structure

Value Impact [2] :

(+) Shareholders[1] receive Compass shares directly

(-) Portion of Compass remains temporarily at Cosan

STEP 2

Secondary Market Placement

- Remaining Compass stake sold to third-party investors
- Proceeds used to reduce Cosan's holding-level debt

Value Impact [2] :

(+) Reduction in Cosan leverage and holding discount

(-) A portion of the Compass stake previously held within Cosan is sold to third-party investors

Notes: (2) Value impact evaluated from the perspective of Cosan's existing shareholders (see note 1)

Built, Not Bought: BTG's Three-Step Path to Controlling Compass

Conversion, spin-off and follow-on migrate BTG's indirect and preferred exposure into direct control of Compass

Compass Cap Table Evolution [%]

	D0	Post-Conversion	Pro Forma	
Shareholder	**Own%**	**Own%**	**Own%**	**Δ[2]**
Cosan	75.4	52.1	0.0	(75.4)
BTG	0.0	11.6	18.7	18.7
Aguassanta	0.0	0.0	6.4	6.4
Perfin	0.0	0.0	3.1	3.1
Bradesco	0.0	11.6	11.6	11.6
Free Float[1]	24.6	24.6	60.1	35.5

Shareholder´s Agreement Highlights

Art. 1 – Board Nomination Rights

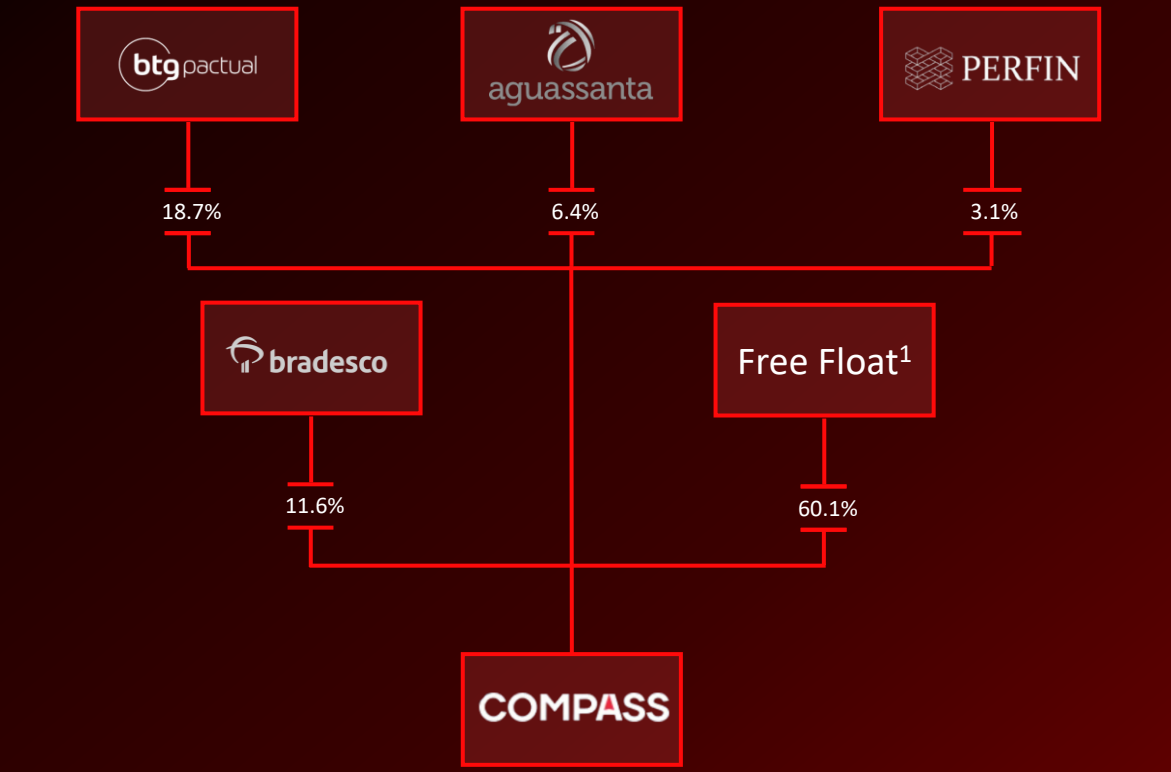

BTG Pactual, as Controlling Shareholder, shall appoint the 4 of 9 of Board members, including the Chairman and Vice-Chairman. Minority investors may nominate one director each, provided minimum thresholds are met.

Art. 2 – Reserved Matters / Minority Veto Rights

Certain strategic decisions shall require prior minority consent:

i. Amendments to bylaws or corporate purpose;
ii. M&A transactions or disposal of core assets;
iii. New indebtedness resulting in Net Debt / EBITDA above 3.5x;
iv. Delisting or corporate reorganizations.

Pro Forma Structure

Notes: (1) Includes Compass minority shareholders and Cosan's free float, both subject to post-IPO lock-up restrictions, (2) Delta relative to D0

Value Creation Across Stakeholders

The reorganization creates upside for shareholders, aligning deleveraging, ownership simplification and future control of Compass

1. Cosan Shareholders' Value Creation

Conversion and spin-off mechanics simplify Cosan's structure, give shareholders more direct exposure to Compass and help reduce the implied holding discount embedded in CSAN3

2. Future Controller's Value Creation

The transaction creates a path for the future controller to gain strategic exposure to Compass while capturing upside from the broader reorganization

Value Creation Across Stakeholders

The reorganization creates upside for shareholders, aligning deleveraging, ownership simplification and future control of Compass

1. Cosan Shareholders' Value Creation

Conversion and spin-off mechanics simplify Cosan's structure, give shareholders more direct exposure to Compass and help reduce the implied holding discount embedded in CSAN3

2. Proforma Controller's Value Creation

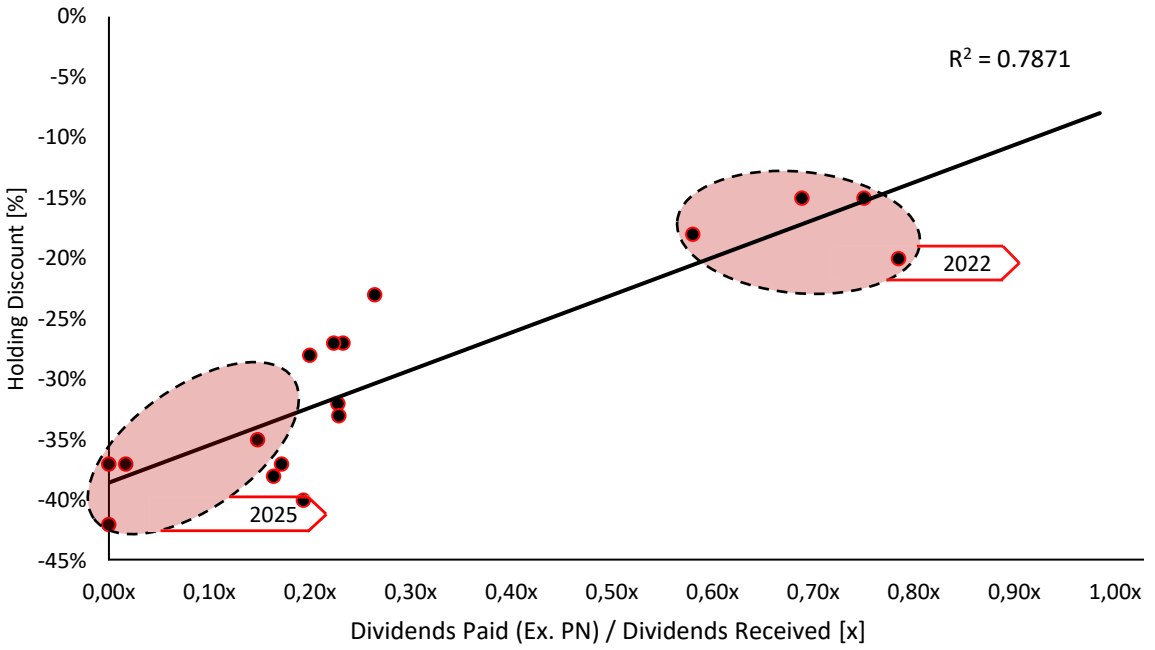

The transaction creates a path for the future controller to gain strategic exposure to Compass while capturing upside from the broader reorganization

Unlocking Value Across the Reorganization

Assuming Compass trades above IPO value, conversion and spin-off mechanics create meaningful upside, with holding discount reduction adding a final layer of value

Cosan's Holding Discount x Dividends Paid (Ex. PN)/Dividends Received LTM [%, x]

Lower dividend leakage reduces the implied holding discount

Holding Discount $_{Est.}$ = [0.310 * (**Dividends Paid** (ex. PN) **/ Dividends Received**)] – 0.385

	[UNIT]	2024A	2025A	Proforma
Dividends Received	[mn BRL]	4,335	2,572	1,108
Holding Expenses[1]	[mn BRL]	(3,401)	(3,133)	(249)
Div. Paid (ex. PN)/Div. Received	[x]	0.19x	0.00x	0.78x
Holding Discount	**[%]**	**40%**	**37%**	**14%**

PASS3 Football Field Average Scenario

Compass Equity Value = **24 bn** | MOIC = **1.28x**

Cosan Shareholders' Value Creation Breakdown [BRL mm]

Reorganization mechanics drive positive shareholder value creation

Cosan Shareholders' MOIC: Stressing Key Variables [x]

New Holding Discount [%]

Offer Discount [%]	10.5%	12.5%	14.5%	16.5%	18.5%
5%	1.35x	1.33x	1.31x	1.29x	1.26x
10%	1.34x	1.31x	1.29x	1.27x	1.25x
15%	1.32x	1.30x	**1.28x**	1.26x	1.24x
20%	1.30x	1.28x	1.26x	1.24x	1.22x
25%	1.29x	1.26x	1.24x	1.22x	1.20x

Notes:

Value Creation Across Stakeholders

The reorganization creates upside for shareholders, aligning deleveraging, ownership simplification and future control of Compass

1. Cosan Shareholders' Value Creation

Conversion and spin-off mechanics simplify Cosan's structure, give shareholders more direct exposure to Compass and help reduce the implied holding discount embedded in CSAN3

2. Proforma Controller's Value Creation

The transaction creates a path for the future controller to gain strategic exposure to Compass while capturing upside from the broader reorganization

BTG's Compass Bet Turns Reorganization into Value Creation

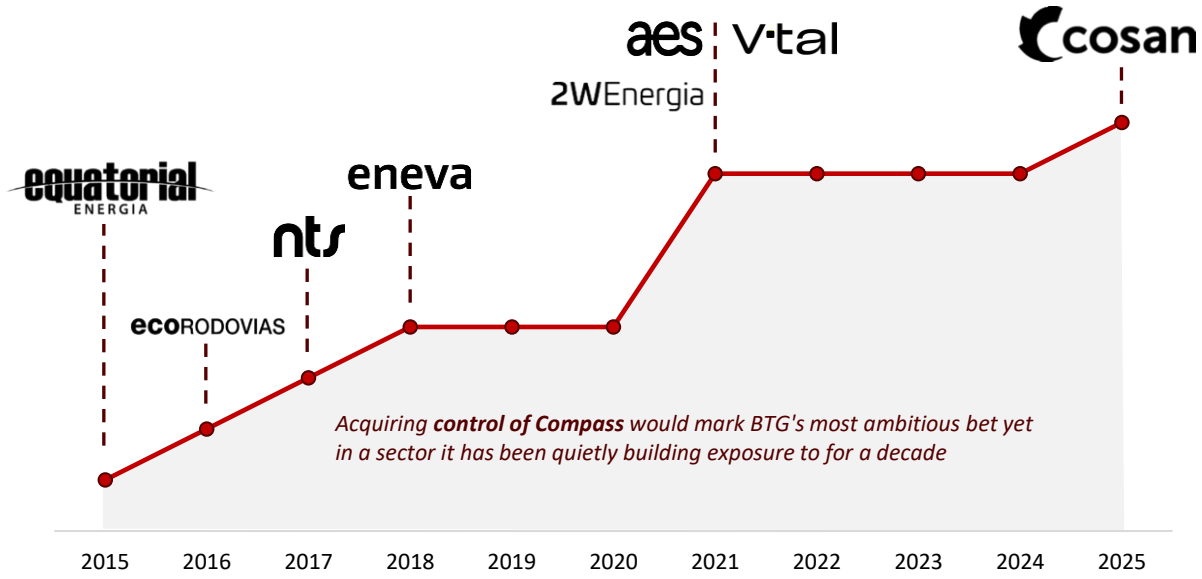

A reorganization of Cosan's capital structure gives BTG direct exposure to Compass while supporting succession

BTG Value Creation Through Reorganization [BRL mm]

BTG's Infra & Energy Portfolio Companies Entered Over Time

A decade of infra exposure sets the stage for a larger Compass move

> "BTG's capital injection was also **structured to address founder succession in the absence of a defined successor**, ensuring long-term continuity through committed long-term partners"

Marcelo Martins
CEO of Cosan

Proforma Structure

Notes: (1) Includes Compass minority shareholders and Cosan's free float, both subject to post-IPO lock-up restrictions

Stepping Back: From Post-IPO to Pro Forma

What changes at each stage, captured in four numbers

*What began as **BRL 7.4 Bn** of holding-level net debt ends with a clean balance sheet at Cosan and **Compass freed from a holding structure** whose limited synergy across portfolio assets was suppressing the value of its subsidiaries. The transaction simultaneously delivers **deleveraging, structural simplification** and a redefined controlling shareholder*

Notes: (1) Includes Compass minority shareholders and Cosan's free float, both subject to post-IPO lock-up restrictions
