Intelbras at glance

Innovation happens where **technology** meets **people**

A **scaled** and **entrenched** platform

Where Intelbras stands out as a company

Intelbras is a company with a presence in **98% of Brazilian municipalities**, more than **80,000 authorized resellers**, and **150,000 retail points of sale**

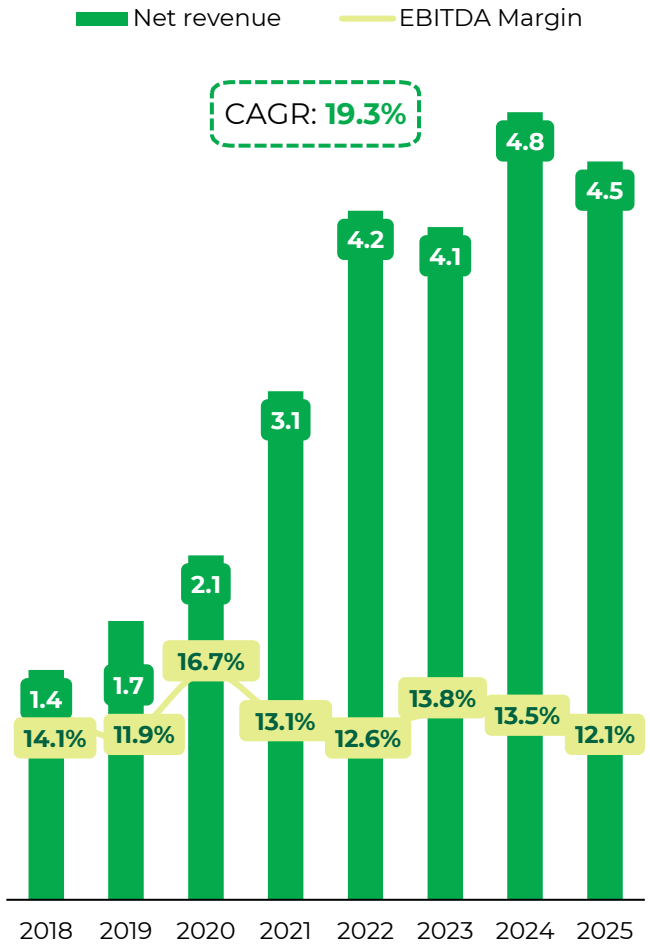

15+ TAC 5-14 TAC 1-4 TAC

- **345** Technical assistance
- **483.8 BRL mn** NOI
- **6200** Employees

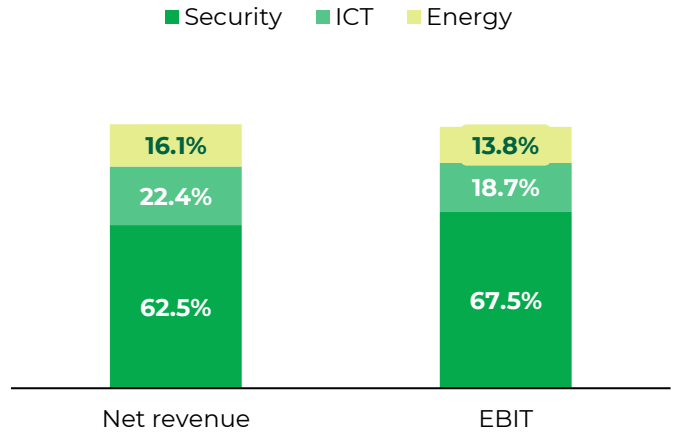

Delivering **consistent growth**

Net revenue (BRL bn), EBITDA margin (%)

Multiple **engines** to sustain it

Net revenue and EBIT by business unit (%)

Security: CCTV, access control, alarms, smart home

ICT: optical networks, switches, routers, structured cabling

Energy: solar on/off-grid, UPS systems, EV chargers

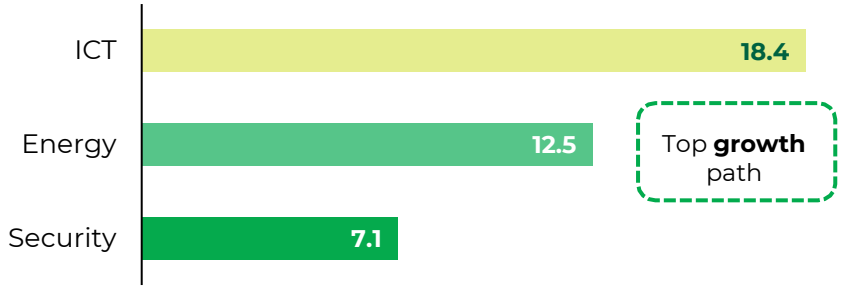

Sources: Company releases

Industry overview

Three growing markets with distinct dynamics, united by shared macro sensitivity

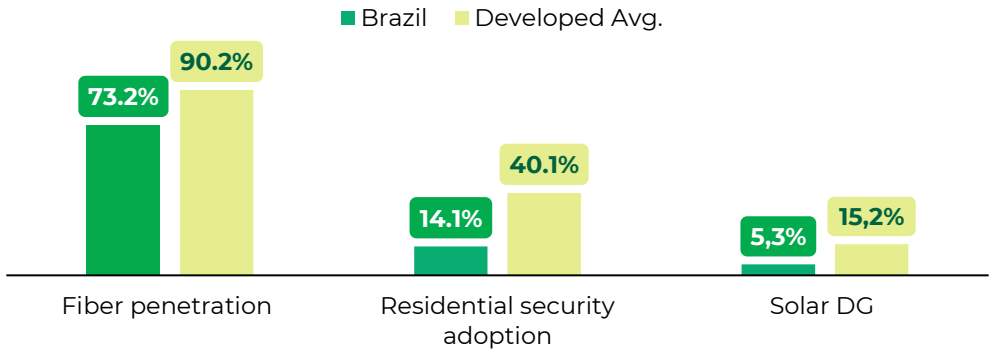

Three addressable markets, **one** clear growth

TAM for each market in 2025 (BRL bn)

Brazil **still lags**, developed markets **runway ahead**...

Adoption (%) benchmark: Brazil vs. developed economies

...driven by **structural tailwinds** in each segment

Key demand drivers per BU, secular, not cyclical

Security

- **49%** of properties remain unmonitored
- **68** million people live in condominiums
- **54%** of SMEs have experienced theft

ICT

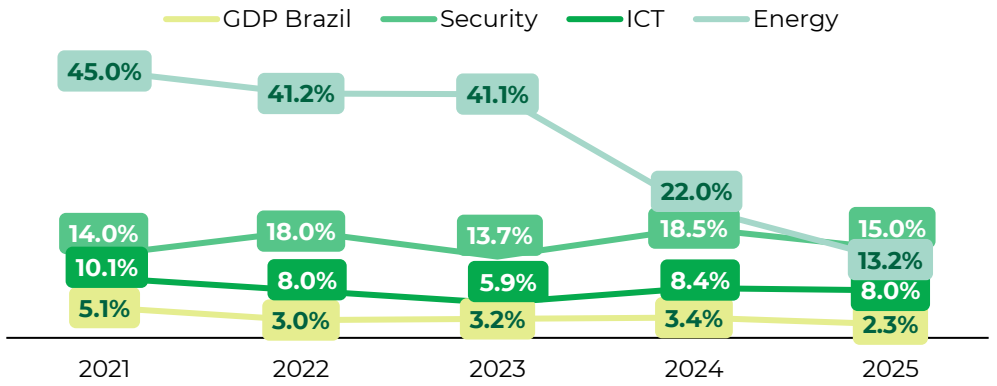

- Brazil is the **9th** largest global ICT producer
- Over **200.000** regional ISP's
- USD **7.44 Bn** in annouced Investments in 5G

Energy

- Solar is the **2nd** source in Brazil's power mix
- **Falling** lithium battery in a solar- storage cycle
- Over **170.000** EVs in circulation

All three markets **structurally outgrow the economy**

Sector growth (%) vs. Brazil GDP growth (%), 2021–2025

Monetizing the network
through portfolio optimization

Unlocking a structural growth avenue
through safety & connectivity

BUY!

intelbras

Channel-driven distribution fueling market leadership

Monetizing the network through portfolio optimization

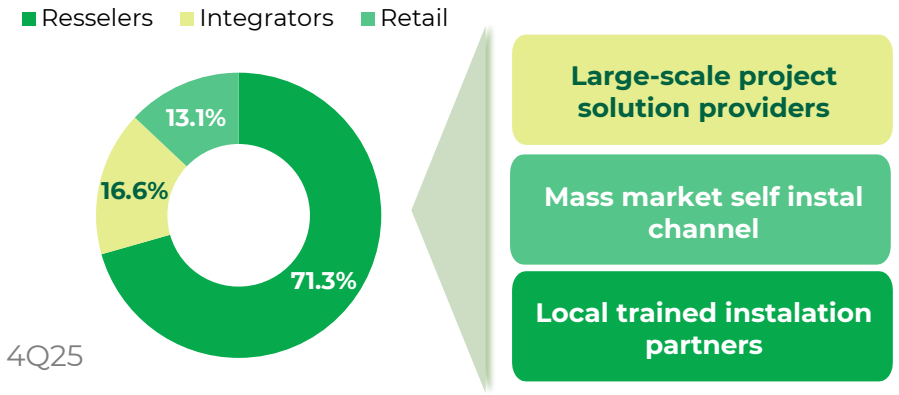

Unlocking a structural growth avenue through safety & connectivity

A strategic channel ecosystem

A multi-layered network ensures nationwide presence and local expertise

A **distribution** dominated by resellers...

B2B sales are driven by resellers, integrators and retail

Altair Silvestre on the power of local presence

Altair Silvestre, former CEO , Intelbras

"*We are a Brazilian company, operating throughout the national territory for 50 years, and I believe that **our presence and respectful relationship with our partners** are what sets us apart in the market*"

...that are pivotely inserted on a **multi-tier channel structure**

Clearly defined roles enable scalable and efficient channel execution

Channel efficiency: Without outsourced distribution, Intelbras would incur **1,02 Bn BRL** annually by distributing in-house

Supplier

Diversified global sourcing to ensure **quality inputs** and **advanced technology**

Intelbras

Central hub for **product development**, **assembly**, and scalable **distribution**

Distributor

Operate as **wholesalers**, buying from the company and **reselling to resselers**

Resseler

SMEs serving end customers, dominating sales through **installation** of Intelbras solutions

Consumer

End customers who purchase from resellers and **generate demand** for the entire value chain

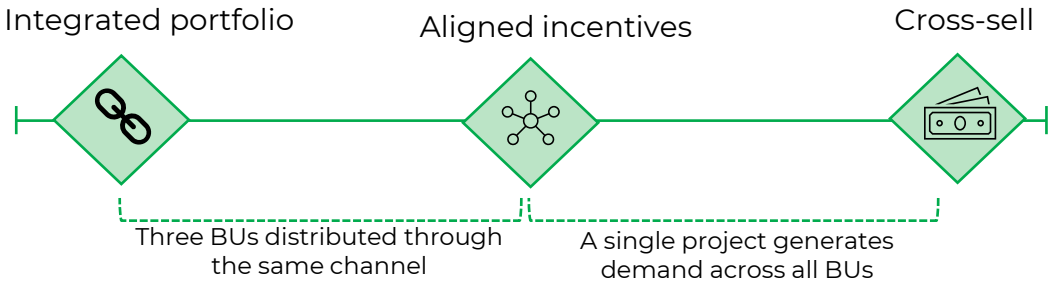

Sources: Company releases, Empiricus podcast

When security meets ICT: a natural cross-sell engine

Shared channels turn portfolio breadth into compounding synergies

One channel, three BUs: the **cross-sell setup**

Integrated strategy for seamless cross-selling

Security naturally **pulls ICT**

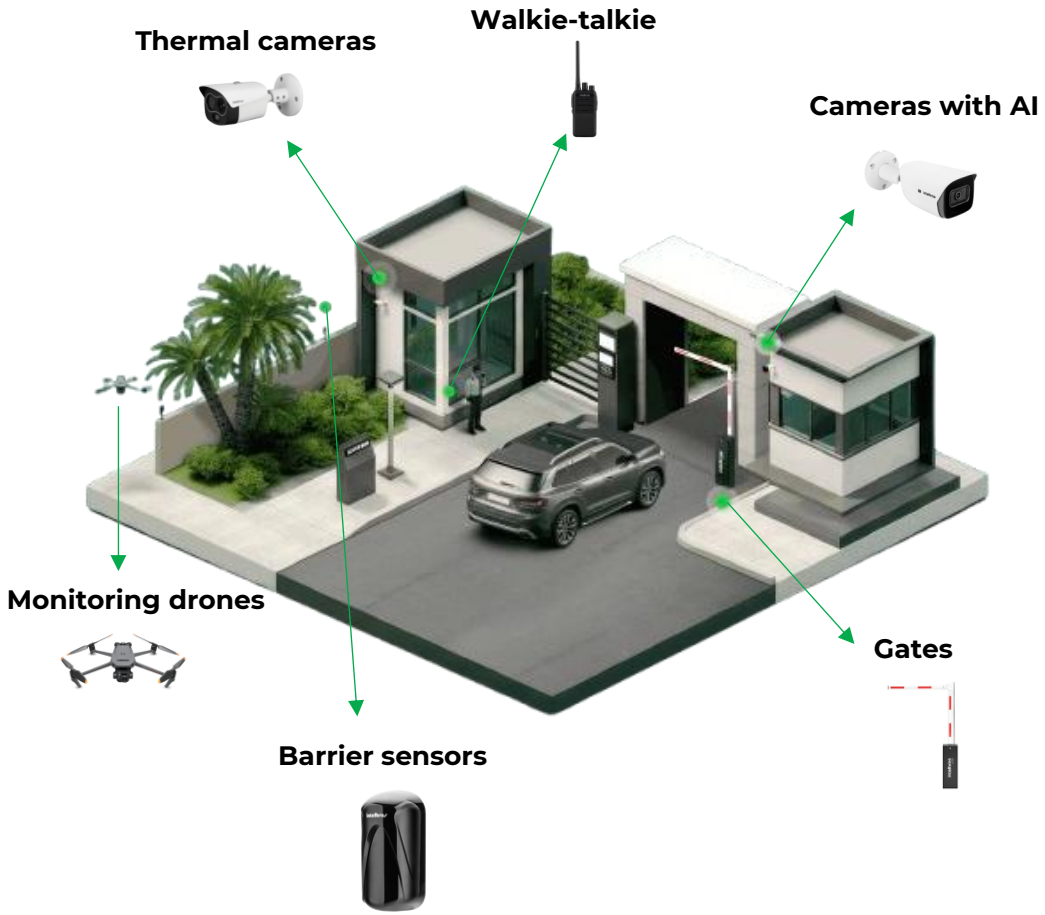

% of security clients with ICT product integration

28 answers

	Products	Cables	GPON	Networks	Wifi
Security	CCTV	68.2%	71.4%	62.5%	48.7%
	Acces control	54.4%	32.2%	25.3%	32.4%
	FDAS	17.1%	11.1%	15.1%	7.1%
	Alarm & Sensor	22.9%	4.9%	1.4%	2.3%

Ecosystem in practice: integrated solutions at work

Security and ICT cross-selling in external environments.

Sources: Intelbras company releases

That is sustained by long-term channel loyalty

Layered incentive programs and proprietary training creates financial and intellectual lock-in across 80k resellers

Incentivizing and **upskilling** the channel ecosystem

ICP and ITEC as incentives to resselers

Intelbras Channel program (ICP):

Offers **bulk discounts** and **points redeemable** for products, travel, and marketing materials

Intelbras ITEC:

950+ courses and **363k** qualifications in 2024, offering tiered technical and commercial training

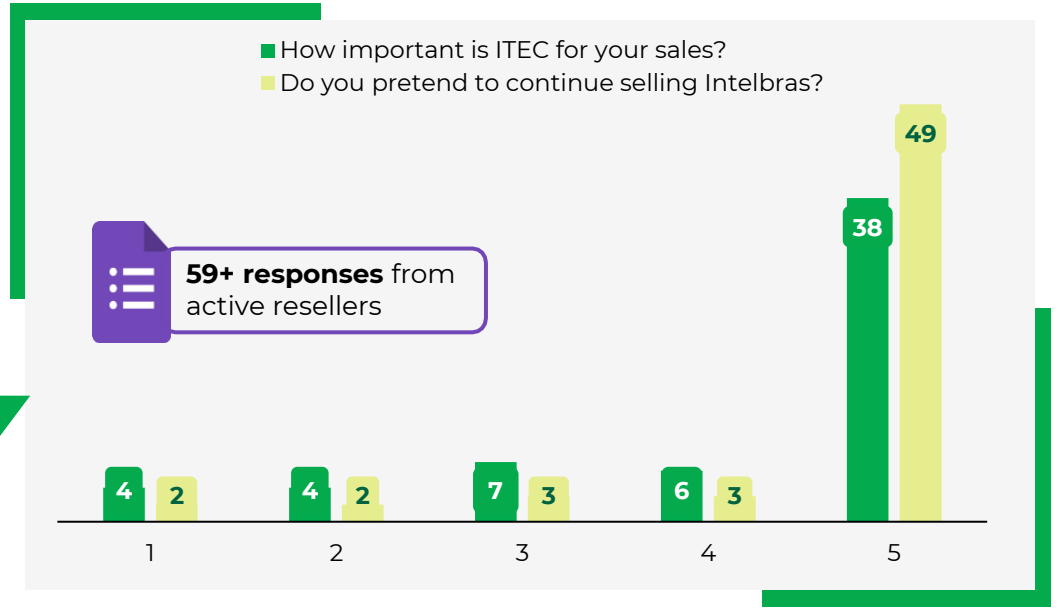

Average **66%** increase in sales!

...raises **intellectual** and **financial switching costs**

Field study in Santa Ifigênia: resellers fidelity towards Intelbras

Felipe Matos on resseler's switching costs

"*Switching brands means losing my **discount tier**, **retraining my whole team**, and even **rebranding my storefront**. It's just **not worth it** when Intelbras already **gives me everything I need***"

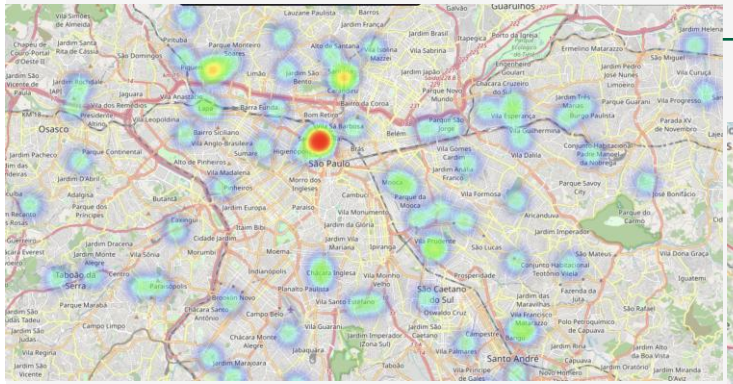

Felipe Matos
Intelbras authorized resseler

Sources: Intelbras company release

Leading to extensive territorial reach

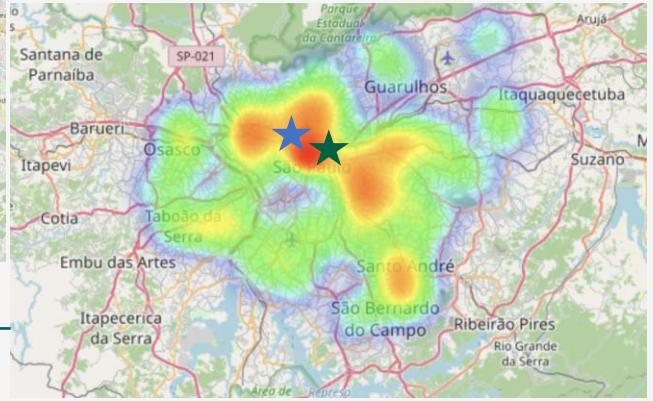

Dominating the last mile: a spatial data comparison of distribution networks

Intelbras leverages a **dense network** of authorized resellers across major hubs to ensure **product availability** and **market saturation**, showcasing superior **channel efficiency**

São Paulo city

São Paulo metropolitan region

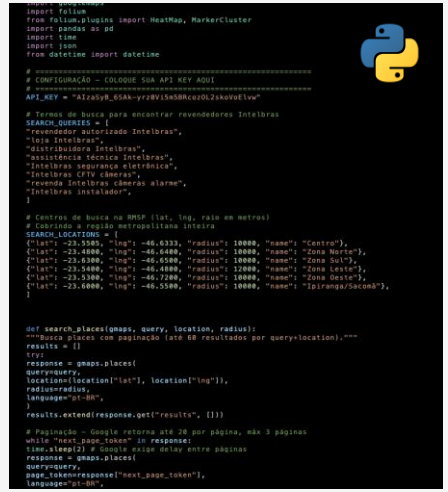

★ DAHUA

★ Hikvision

Advantage in **market penetration,** once peers are highly **concentrated** rather than **pulverized**

Average distance to the nearest reseller is just **1.35 km**, minimizing **shipping costs** and **delivery time**

Average rating per store is 4.7/5

Google API **heat map** representing the **concentration** of Intelbras resselers

Sources: Google API, Dahua, Hikvision and Intelbras company releases

The power of capillarity: Coca-Cola case study

Two industries, one playbook: market dominance built on distribution, not product

A bottler empire, not a beverage company

How Coca-Cola distributes globally

Coca-Cola → **Bottlers** → **Distributors** → **30M + Sale points**

The company **doesn't manufacture** or **deliver**

It licenses **brand** and **concentrate** to bottlers who own **local distribution**

FEMSA · Coca-Cola EUROPACIFIC PARTNERS · Coca-Cola HBC

Allows **global scale** by leveraging **partner capital** and **local expertise**

...that **can't be replicated** by competitors

Capillarity is the real moat, not the product

Similar product and **price**

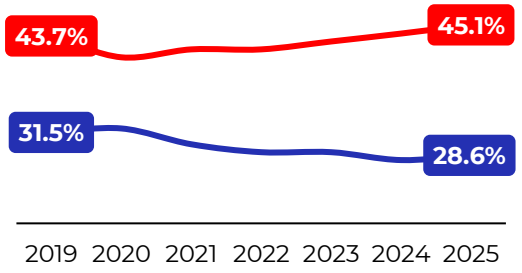

X

R$8,00 R$11,00

But huge **market share gap**

The **moat** is not the **flavor profile**

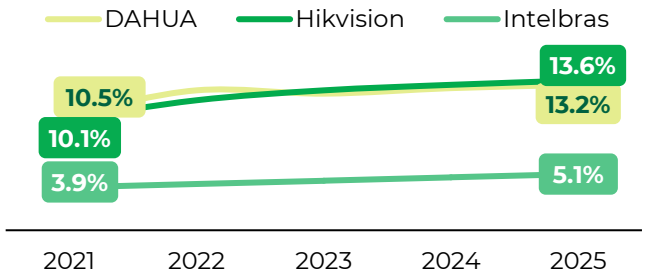

It is the **distribution capilarity**

2.2 bn servings daily consumed!

The same playbook **applied to tech**

Intelbras has no edge in neither technology, nor price

Low **R&D/net revenue** compared to peers

And **high prices**

...where Intelbras thrives as a **market leader**

Competitive advantage lays on its capillary distribution

- Loyal distributors and resellers
- Present In **98%** of municipalities
- **+150k** points of sale

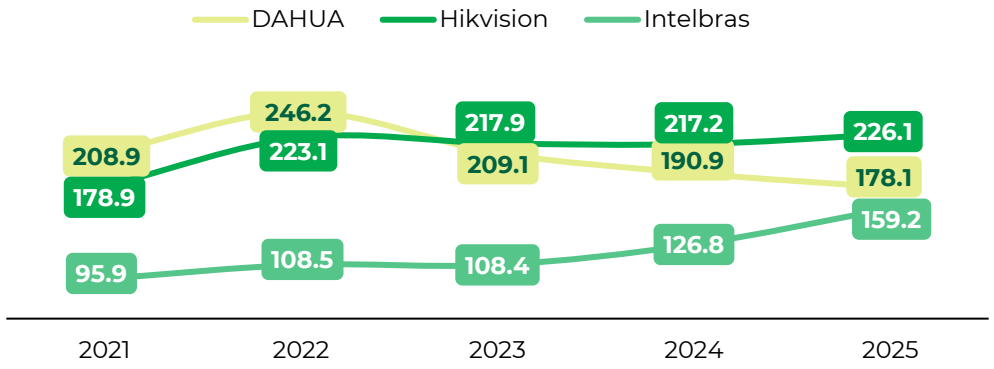

Sources: Company releases, Coca-cola company releases, Mercado livre

Channel strength drives financial resilience

Efficient receivables supports DSO, driving reduced CCC

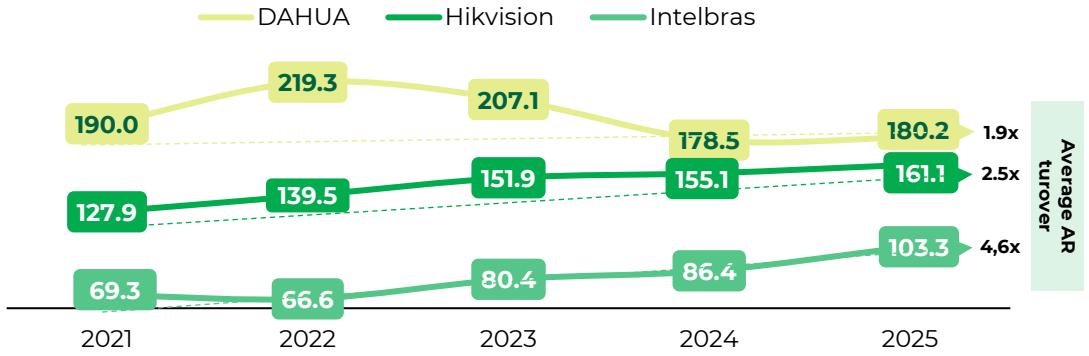

Low **cash conversion cycle**

CCC for Intelbras and its Chinese competitors (in days)

...is driven by low **day sales outstanding**

DSO (in days) and average accounts receivable turnover

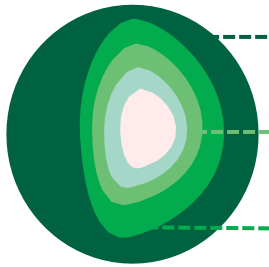

...and explained by **robust distributor relationships**

Exclusive incentives build loyalty and enforce payment discipline

"Mais Verde" program:

Distributors selling Intelbras **exclusively** are granted **2%-9% discounts, preferential marketing** and **launch supports**

Generational loyalty driven by incentives and high switching costs

Supplier bargaining power: resellers comply because losing the brand means losing the business

Ensures payment discipline: 89.6% of receivables current or <30 days overdue

Rafael Boeing on distributor relationship

Rafael Boeing
CFO, Intelbras

"Our enduring distributors network, built over almost fifty years, represents one of our most valuable strategic assets"

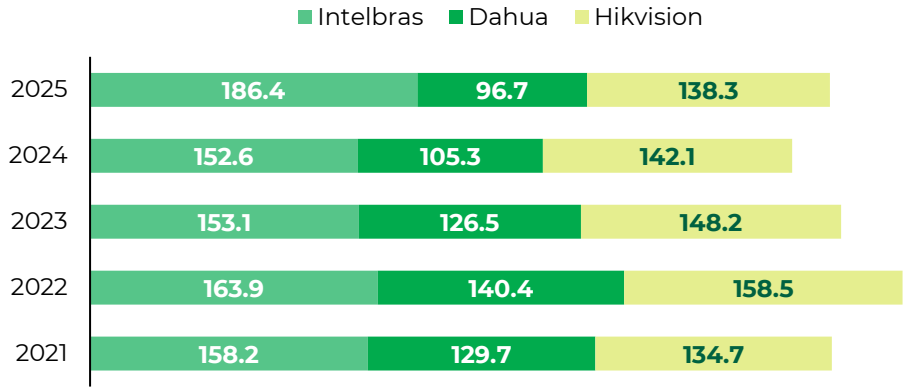

Sources: Intelbras company releases, DAHUA and Hikvision annual reports (2021-2025)

Inventory as a strategic trade-off, not a weakness

Higher DIO reflects logistical complexity, while distributors efficiency preserves cash conversion discipline

An **increased DIO** compared to peers

Days inventory outstanding (in days) for Intelbras and its peers

...driven by **seasonal** and **logistical** factors

Structural and non-recurring drivers of inventory expansion

Logistical

High inventory levels to **serve 98% of Brazilian municipalities**

Long lead time due to **raw material imports** from Asia

Seasonal

2024

Inventory accumulation to **mitigate the impact** of the **Manaus drought**

2025

Strategic inventory reserves maintained during **ERP transition**

...is compensated by **distributors efficiency**

On the other hand, distributor enjoy inventory productivity

Intelbras defines **inventory goals** for distributors → They must keep **DIO** within a range **of 45 to 60 days**

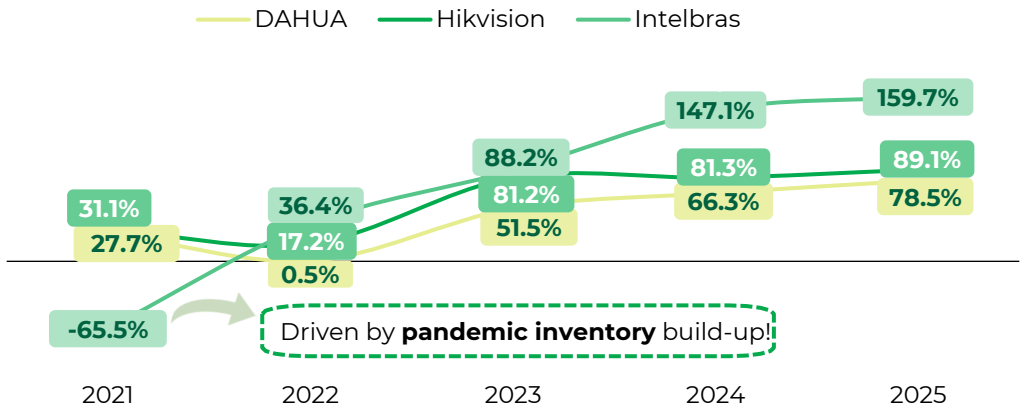

"In practice, **the efficiency at the distributor level compensates for our inventory cycle;** they operate as an Intelbras extension"

Luis Paulo Facciuto
Investor Relations at Intelbras

...leading to **efficient free cash coversion**

FCF / net income (%) for Intelbras and its peers

Sources: Company releases, DAHUA and Hikvision annual reports (2021-2025)

Distribution built the reach, trust built the moat

Loyalty is not a coincidence, it is the output of a system

A system that generates **trust**

Three interlocking drives, one measurable outcome

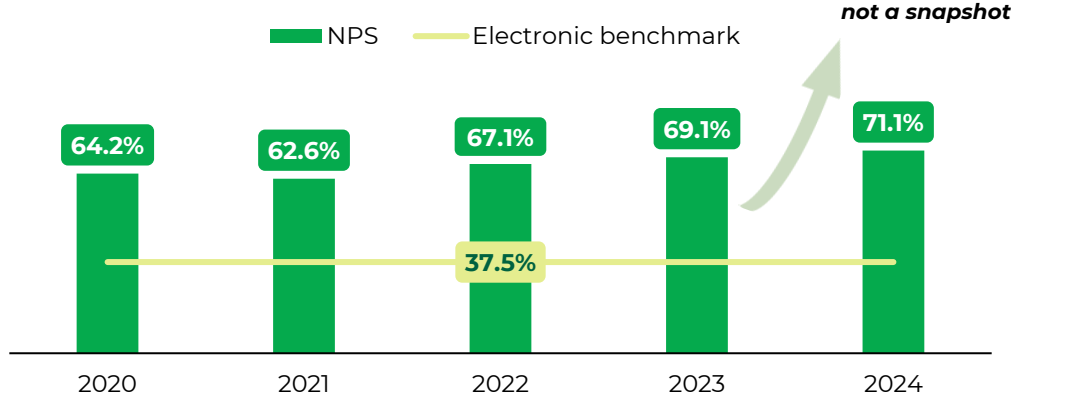

How does Intelbras excel in loyalty?

Capillary Distribution + **Trained Installer** + **Post-sale Support**

Customer Trust

Loyalty that compounds over time

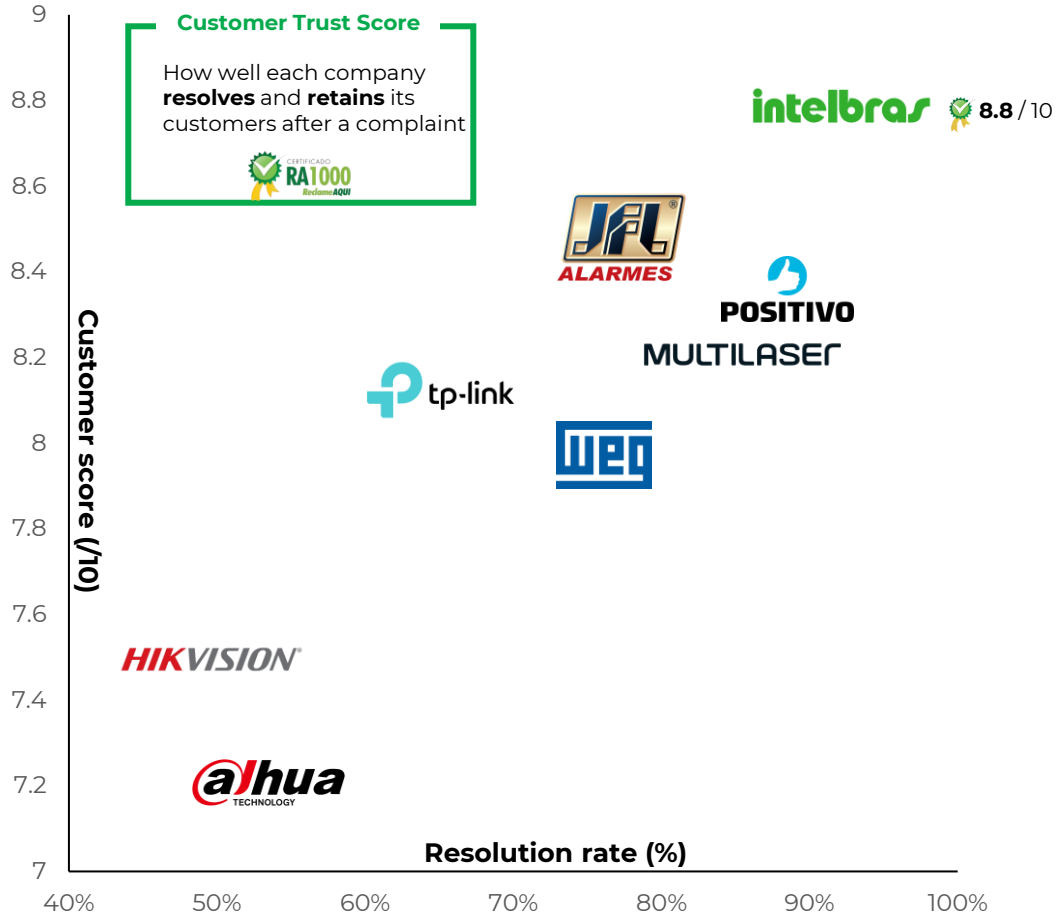

NPS vs. Electronics sector benchmark (%) (2020-24)

+30 p.p. above sector average. ***Loyalty*** *is a trend,* ***not a snapshot***

...and **no competitor** can match

Reclame Aqui score vs. resolution rate, electronics sector, 2025

Sources: Company releases, Reclame Aqui

intelbras

Channel-driven distribution
fueling market leadership

Monetizing the network through portfolio optimization

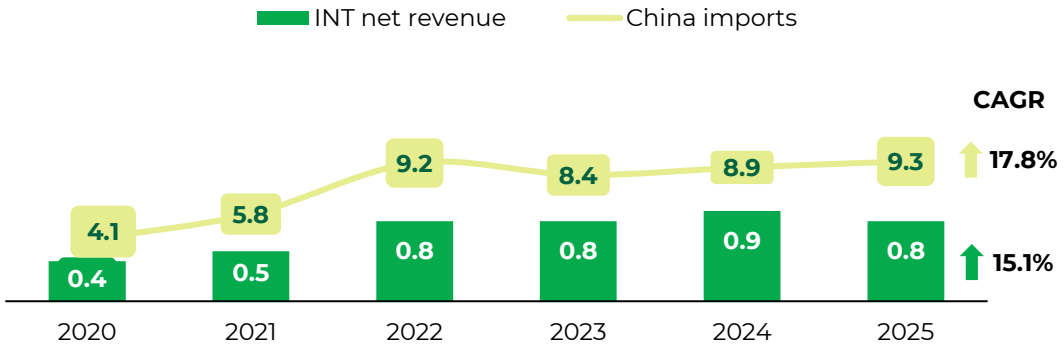

Unlocking a structural growth avenue
through safety & connectivity

The Chinese siege: invisible competitor

Intelbras faces asymmetric pressure two distinct vectors eroding different market segments simultaneously

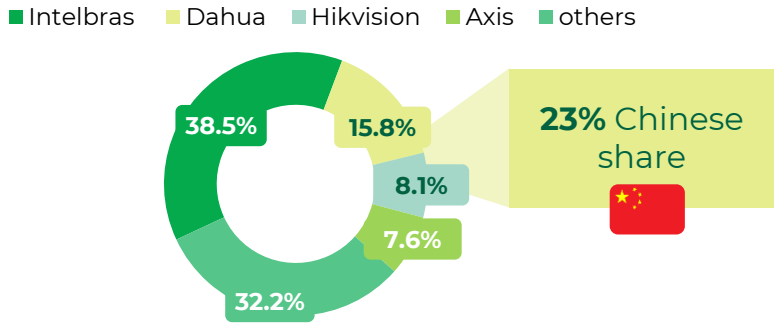

The **import** surge is real

Chinese security equipment imports vs. Intelbras revenue (bn USD)

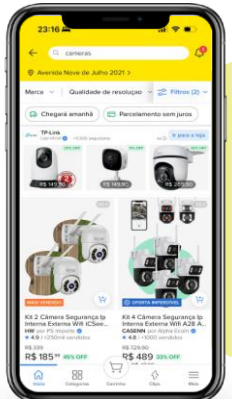

...and **dominated** by two branded giants

Security Brazilian market share (2025)

While the invisible shelf **erodes** the base

The lowest price wins when there is no need for support

Top 5 best-sellers in security camera on Mercado Livre are **unbranded** products

Zero Anatel certification across all top 5

3 of 5 are Chinese, origin products

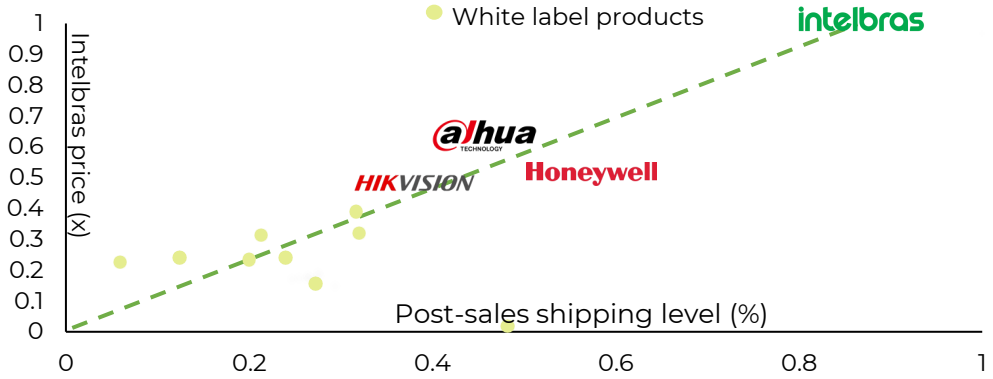

R$**89** vs R$**289**: R$**200** price gap

+ **50k** combined reviews invisible to midi

No installer, no warranty, **self-installed** via youtube

... each threat targets a **different arena**

Price vs. post-sale service, three competitors, three distinct arenas

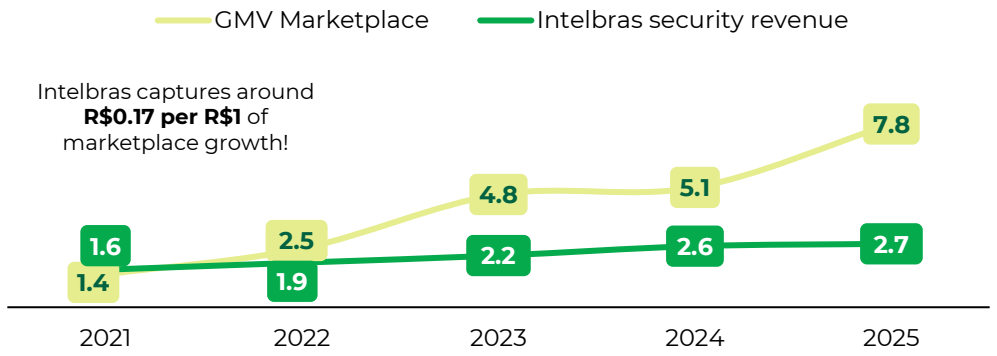

Sources: Company releases, Mercado livre, Abcomm, Reclame Aqui

The threat you can't see in any statistic

White label and Intelbras serve different buyers, but the gap is closing fast

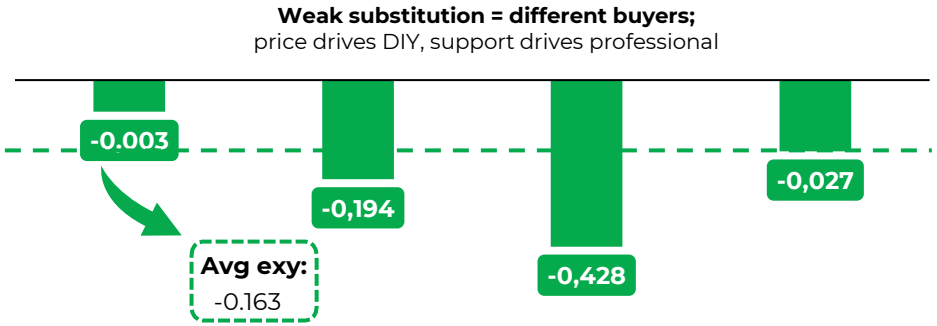

Marketplace outgrows Intelbras 4x

Security marketplace GMV vs. Security BU (BRL bn) (2021–25)

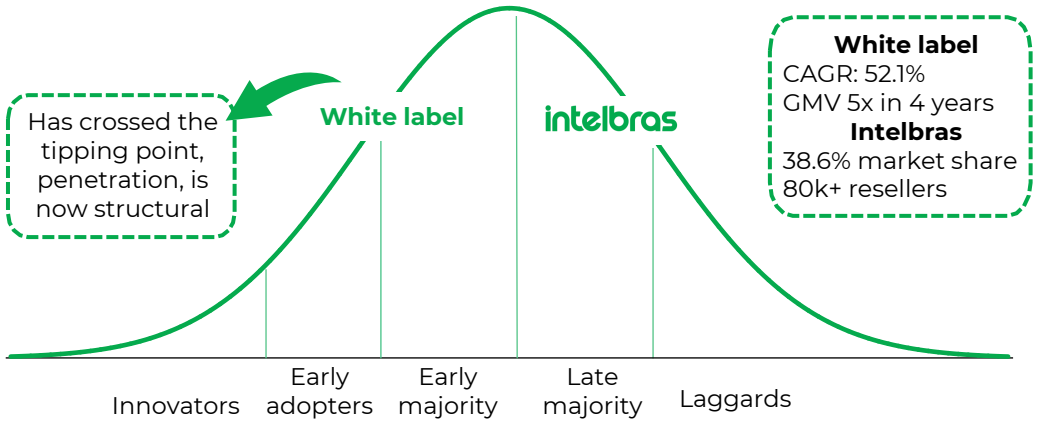

...yet substitution remains **structurally weak**

Cross-price elasticity, white label vs. Intelbras entry level demand

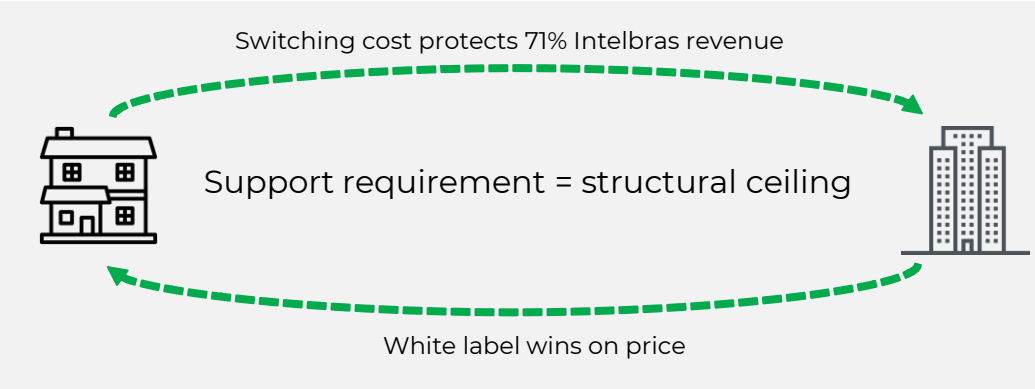

...because white label **targets** a **different buyer**

White label vs. Intelbras: technology adoption stage comparison

... until it crosses into **professional territory**

Professional segment insulated, switching cost is the structural ceiling

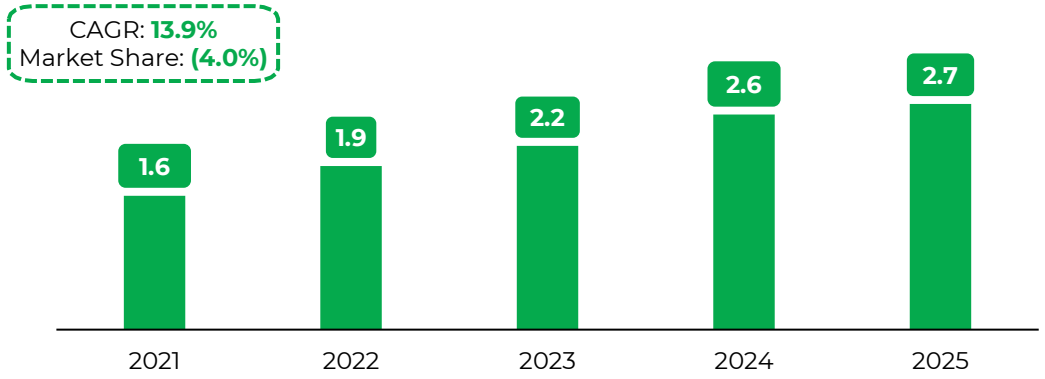

Sources: Company releases, Buscapé, NielsenIQ Ebit

Where pressure hits differently: Security vs. ICT

Same competitive force, two distinct impacts and two very different strategic responses

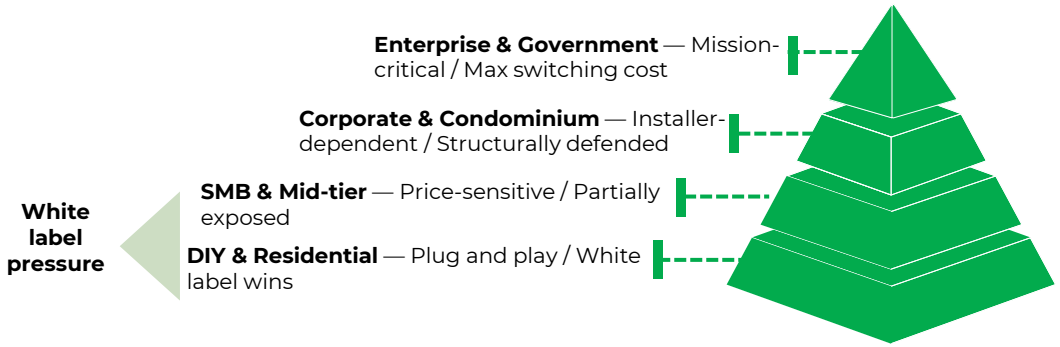

Revenue grows despite **share loss**...

Intelbras Security BU revenue (BRL bn) (2020–2025)

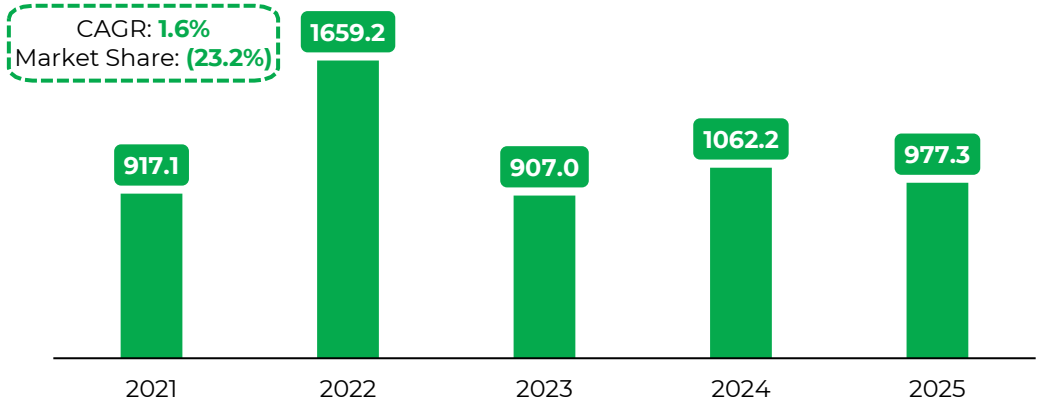

...because not all segments **are equal**

White label erodes the base, switching costs protect the top

ICT **revenue** and **share fall** together

Intelbras ICT BU revenue (BRL mn) (2020–2025)

...in a market where **price** is the only language

Standard deviation of routers prices in São Paulo

σ = 21.4 BRL
15% of average price

Routers and switches are globally documented as price-elastic commodities (**E > 1.5**)

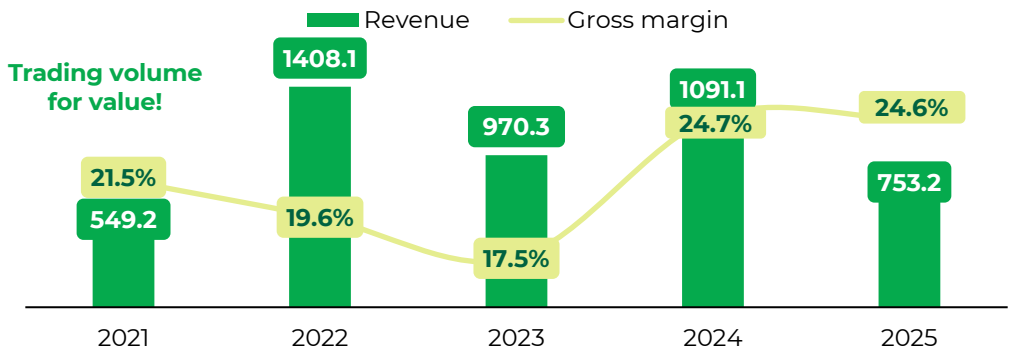

Sources: Company releases, Buscapé, Mercado Livre

The portfolio pivot: cutting revenue to protect returns

The revenue decline is not weakness, it is the visible cost of a deliberate strategic choice

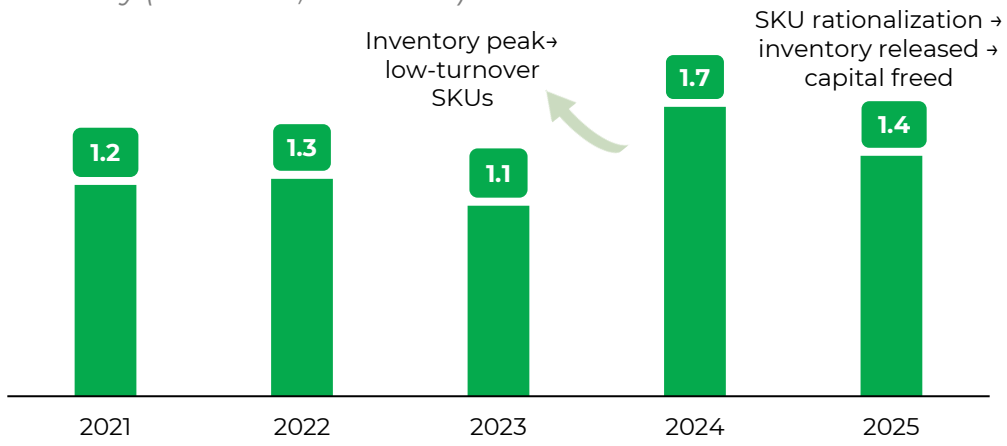

Revenue down, **by design**

Energy BU, revenue (BRL mn) and gross margin (%), 2021–2025

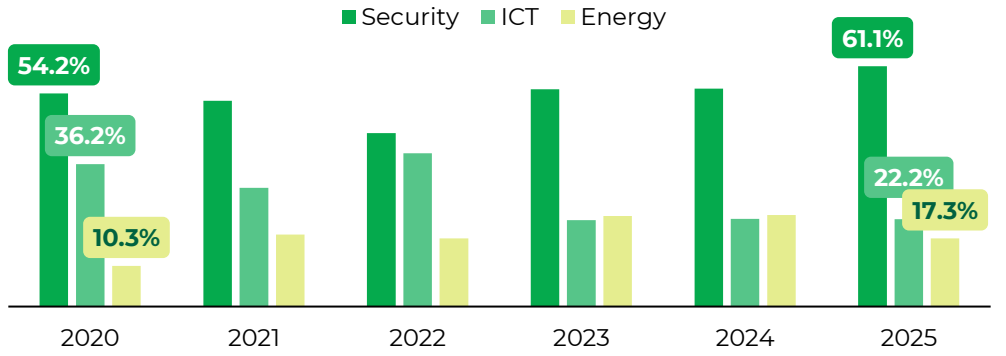

Working capital confirming the logic

Inventory (in BRL bn, 2021-2025)

Shifting the revenue mix **deliberately**...

Revenue Mix by Business Unit (2020–2025)

ICT peaks at 39% *Low-margin mix dominates*

SKU rationalization *Unprofitable lines cut*

Security reaches 61% *High switching-cost BU leads*

Margin quality improves *Less revenue, better returns*

Henrique Fernandez, CEO, Intelbras

"This is not about abandoning growth, but about growing with return, discipline and quality"

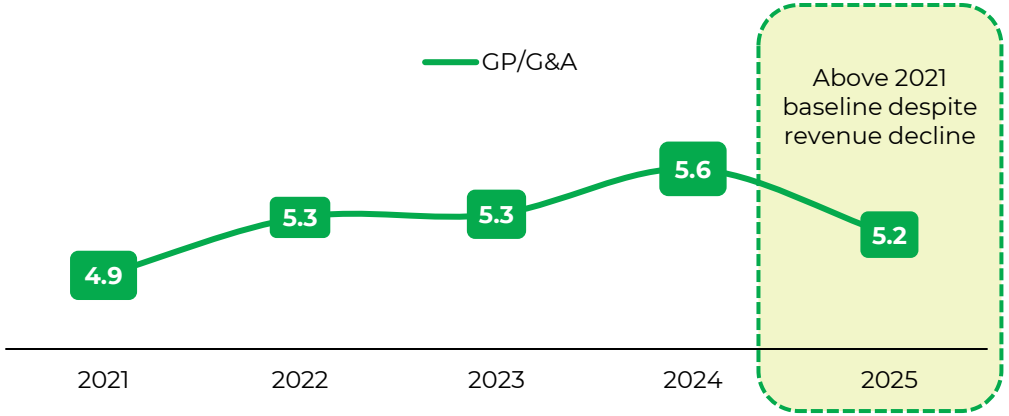

Sources: Company releases

The pivot in numbers: margin over volume

The revenue cut was surgical: productivity held, ticket rose, and the operational structure survived intact

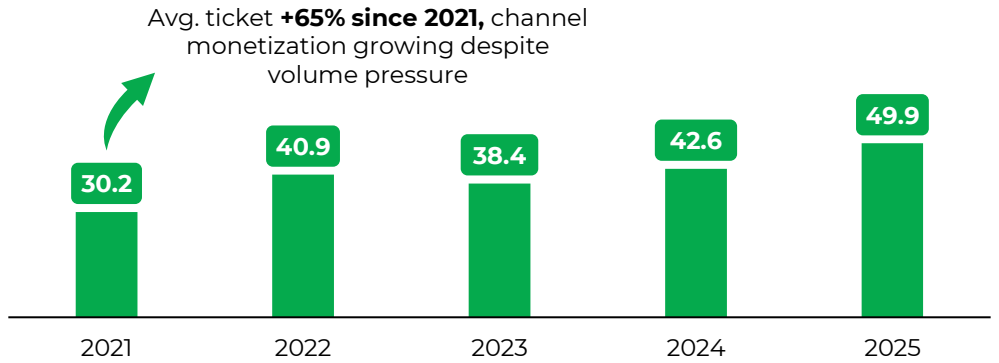

Fewer revenues, **leaner structure**

Gross profit per BRL 1 of G&A expenses (2021–2025)

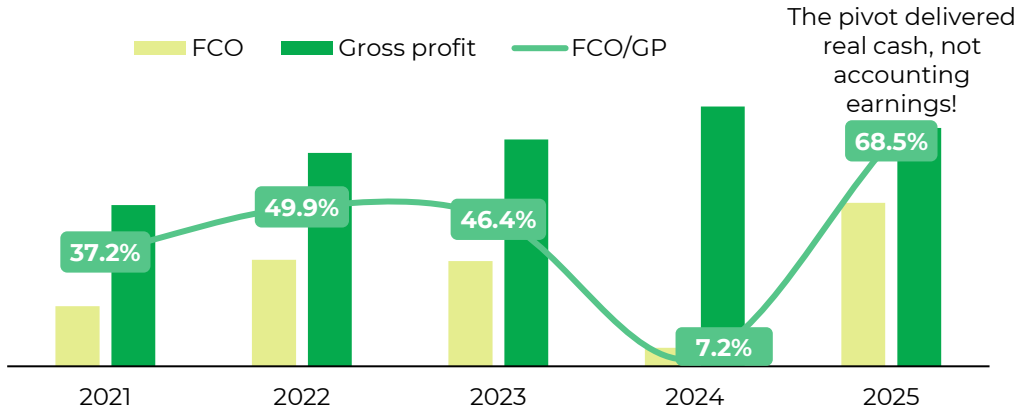

...while the channel **monetizes better**

Average annual ticket per reseller (BRL thsd) (2021–2025)

...confirmed by **cash**, not just **accounting**

Cash conversion of gross profit: FCO vs. gross profit (2021–2025)

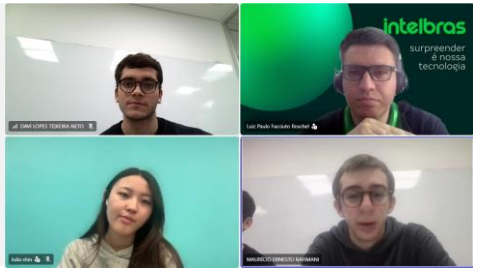

...and management confirms the **inflection is ahead**

Call with Luiz Paulo Facciuto

*"The worst is behind, **portfolio rationalization takes time to compound**, and the next quarters will reflect its **full impact on margin quality**"*

Luiz Paulo Facciuto
Investor Relations at Intelbras

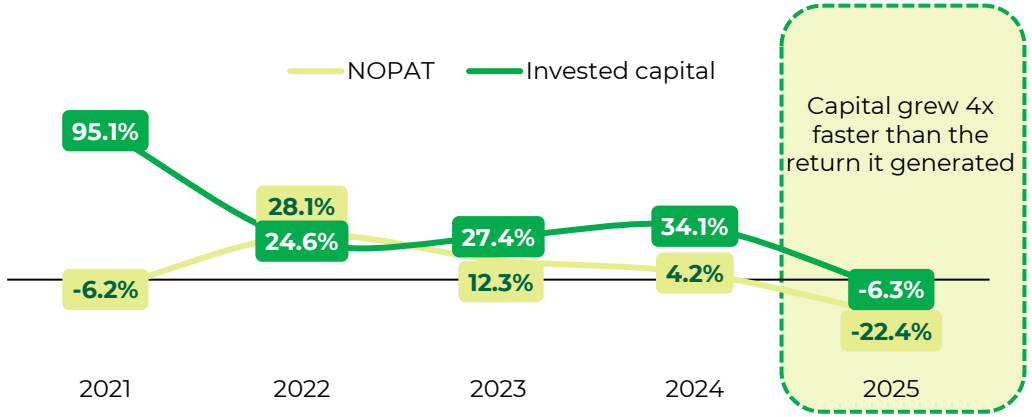

Sources: Company releases

From investment cycle to harvest mode

Capital was deployed aggressively, now it's time to collect

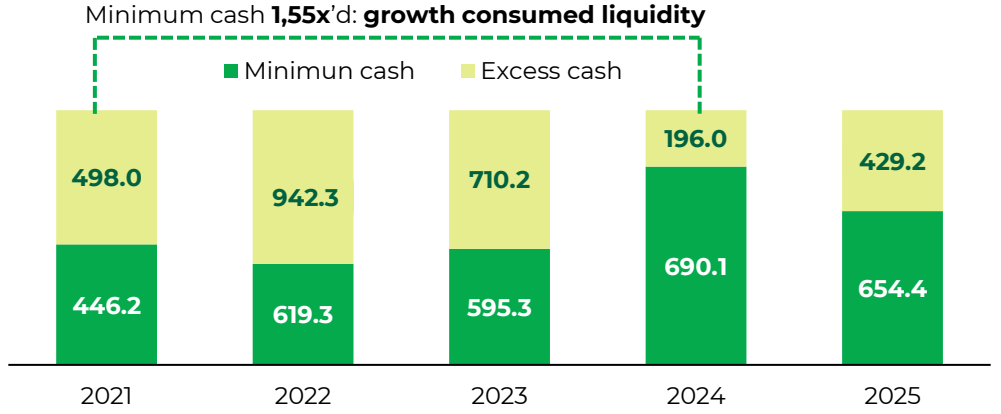

Invested capital **outpaced** returns

Invested capital vs. NOPAT (% YoY)

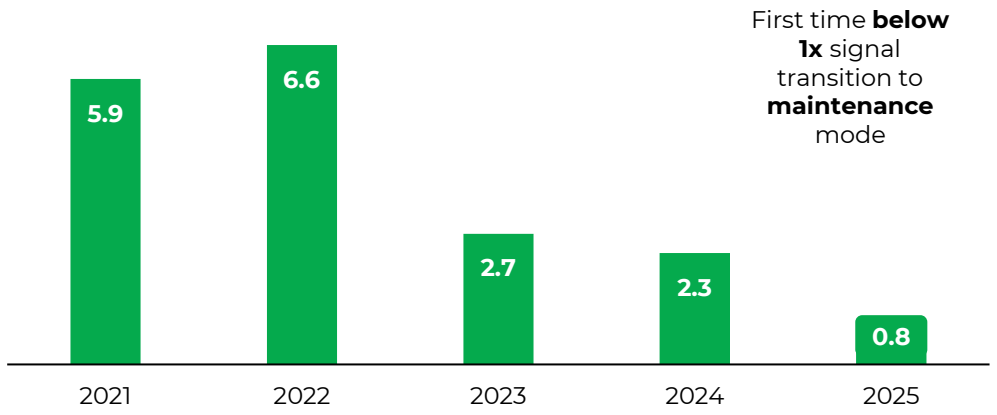

...**depleting** excess **cash** at the cycle peak

Minimum cash vs. excess cash (BRL mn) (2020–2025)

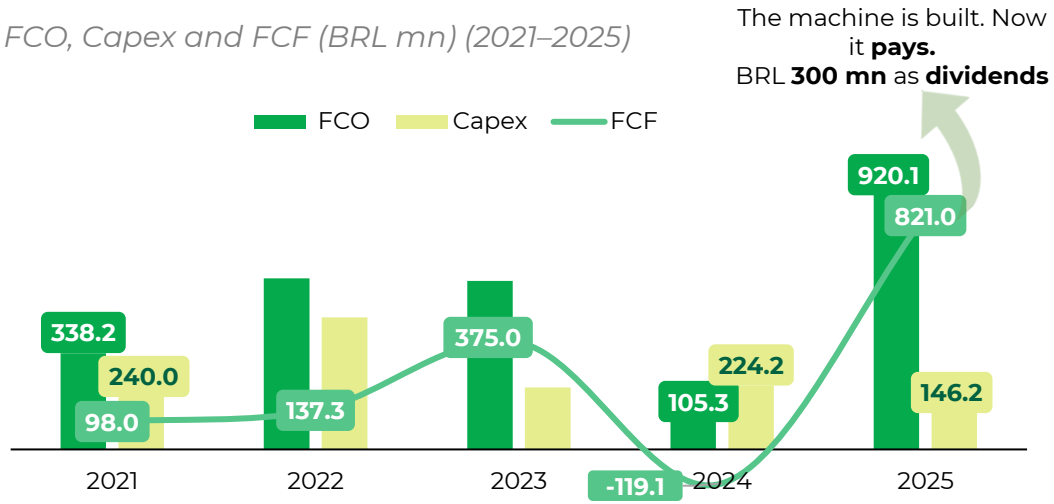

...driving a **capex supercycle** now behind us

Capex/D&A ratio (2021–2025)

...now, **free cash flow** is coming **back**

intelbras

Channel-driven distribution
fueling market leadership

Monetizing the network
through portfolio optimization

Unlocking a structural growth avenue through safety & connectivity

A market that feeds on insecurity

How rising crime perception, strong positioning, and low penetration create a growth flywheel for Intelbras

A **dominant** position

Intelbras' leadership in Brazil's expanding security sector

Key information

43% of market share

BRL 2.73 bn in net revenue

33.2% of gross margin

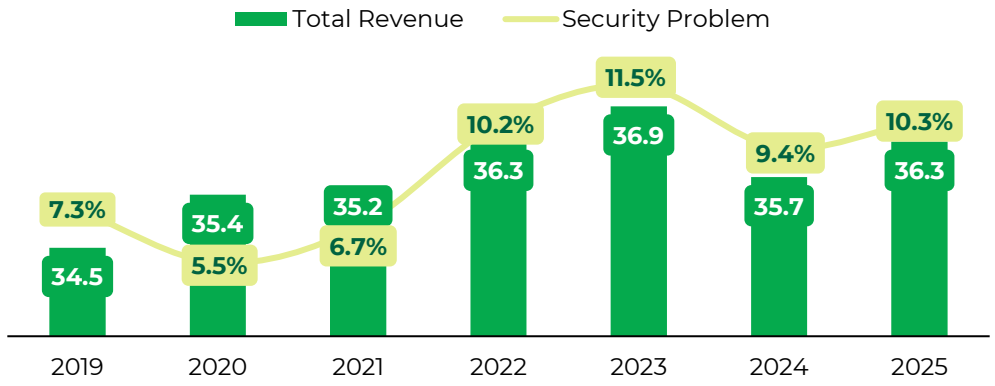

...in market in **expansion**

The security sector reached BRL 15 bn with consistent growth

1. This market has grown by an average of **13% per year** over the **last 5 years**
2. The Brazilian security market is projected to generate approximately **BRL 17 bn** in revenue in **2026**
3. **58%** of people noticed an increase in crime

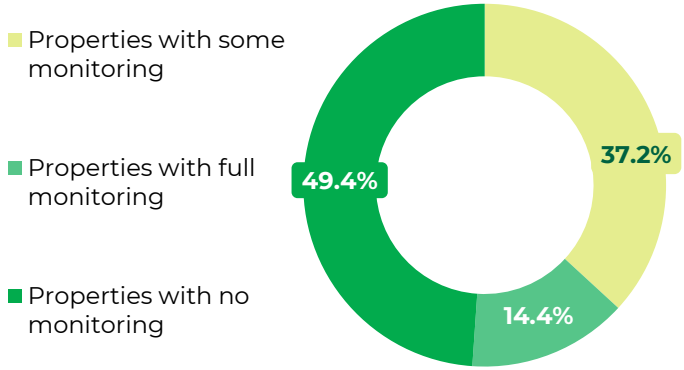

Also a **structural tailwind**

Security revenue (BRL bn) vs. % citing security as main issue

...and a **wide-open frontier**

Level of monitoring in brazilian properties

A largely **untapped market**, with three clear paths to growth

1. Recurring Revenue
2. AI
3. Smart cities

Sources: Company releases, FBSP, Datafolha, Latinobarómetro, ABESE

Khomp: the blueprint for recurring revenue

Turning acquisition into a repeatable recurring revenue engine

Acquiring **recurring revenue** and scaling it

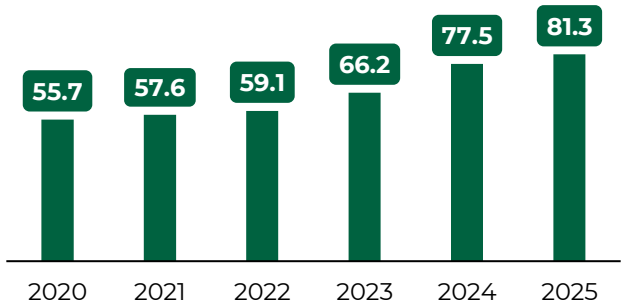

How a single acquisition validated the recurring revenue model

Khomp is a telecommunications and industrial IoT company, representing the acquisition of a proven recurring revenue capability

- Acquired in 2021 for **R$89 mn**
- Gross revenue of **R$455.7 mn**
- Around **40%** in the recurring model (~R$22 million ARR)
- Khomp operated with a small, regionally focused distribution network
- It gained immediate access to a nationwide distribution channel

...then turning **promise** to **track record**

Khomp's gross revenue in the last six years (BRL mn)

Khomp's post-acquisition trajectory is not a coincidence, it is a repeatable mechanism

The opportunity is already inside the company

Software scales without the costs that hardware never escapes

Current ARR R$140mn — 2.64x — **Potential ARR** R$370mn

Software EBITDA margin is **3.9x** higher than that of **hardware**

With Intelbras' scale alone, it's possible to achieve these results

Sources: Company releases

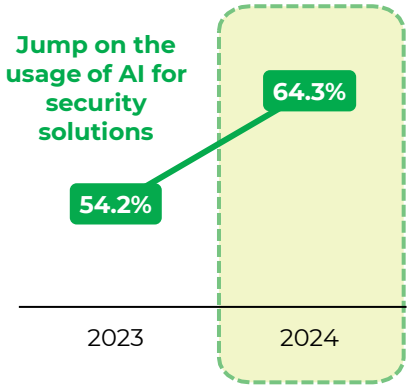

AI is not a feature, it's a business model shift

How AI turns security cameras into subscription platforms

intelbras 2

AI is now center to security solutions

Rapid adoption is reshaping the market

A camera without AI is a commodity

A camera with embedded AI transforms hardware into a platform

And Intelbras is strategically positioned in the market

Intelbras' products with and without AI

VIP 3230 B SL

VIP line · 3000 series
Without AI
R$549.99

VIP 3240 B IA

VIP line · 3000 series
With AI
R$833.23

21% of Intelbras' **security** portfolio uses **AI**

The AI creates data, but **subscription captures value**

Monetizing intelligence unlocks recurring revenue (BRL mn)

How does it work

Without AI:
- Reactive security
- Limited data capture
- No monetizable insights

With AI:
- Continuous data generation
- Behavioral insights
- Monetizable intelligence layer

Intelbras monetizes hardware but **gives data away for free!**

This can be better leveraged to **transform one-off revenue into recurring revenue**

*Simulating the **revenue (BRL mn)** from a **signature-based** framework for **data analysis...***

Price Sensibility \ Potential Demand	48000	56000	64000	72000	80000
800	0.72	0.98	1.28	1.62	2.00
900	0.64	0.87	1.14	1.44	1.78

1100	0.52	0.71	0.93	1.18	1.45
1200	0.48	0.65	0.85	1.08	1.33

Sources: ABESE, Intelbras' website

The rise of smart cities is creating a new battleground

A sizable market with the capacity to unlock an even greater upside.

A structurally attractive market is taking shape

High-ticket, long-cycle projects driving revenue visibility

Smart Cities

Smart cities are one of the main segments of the security sector, with only huge projects

Biggest ticket	Greater stability
BRL 10 mn/month	**5-year contracts**
smartsampa	CIVITAS RIO
+**50,000** cameras	+**20,000** cameras
BRL 117 mn per year	**BRL 180 mn** per year

Currently led by global incumbents

Market share in the segment of smart cities (%)

The leaders in this segment are both listed on the **BIS List**

Disruption is creating structural inflection

Regulatory pressure on Chinese vendors reshapes competition

In May **2019**, **Huawei** was added to the **BIS List**

In October **2019**, **Dahua and Hikvision** were added to the **BIS List**

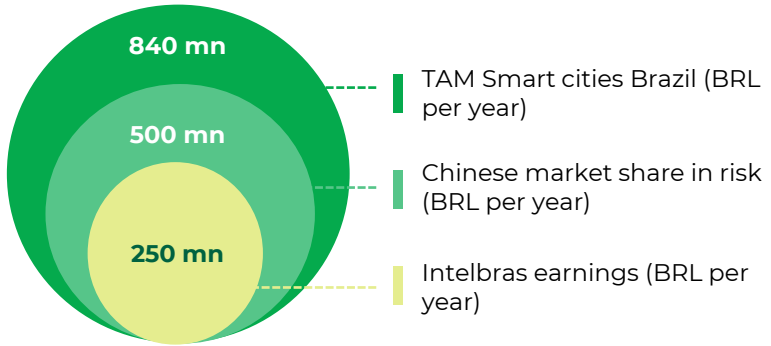

Strong US influence

In **2021**, restrictions against **Huawei** were implemented in **Brazil**

What if?...

Unlocking a compelling opportunity for local leaders

Intelbras is uniquely positioned to capture incremental growth

Intelbras is the leading **local player**, if the pattern persist, it stands to capture the upside

Sources: Company releases; São Paulo City Hall

Growth is not the issue, positioning is

ICT segment keeps expanding, while Intelbras resets its growth engine

A sector that **expands** at the core of **digitalization**

A structural growth driver of Brazil's digital economy

6.5% — **Brazil's PIB** is **ICT segment**

$ 7.44 bn of international investment

5G & data centers **expansion**

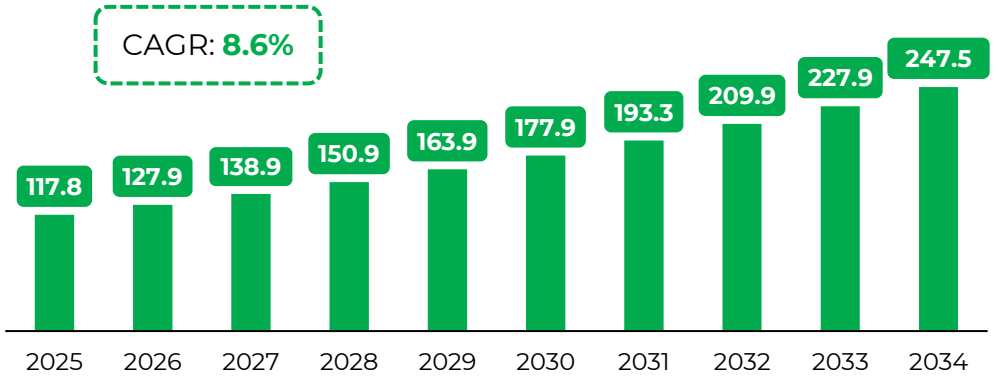

Affonso Nina, Brasscom's Executive Director

"We are looking at a segment that not only **grows** above average but also **leads** the country's digital transformation"

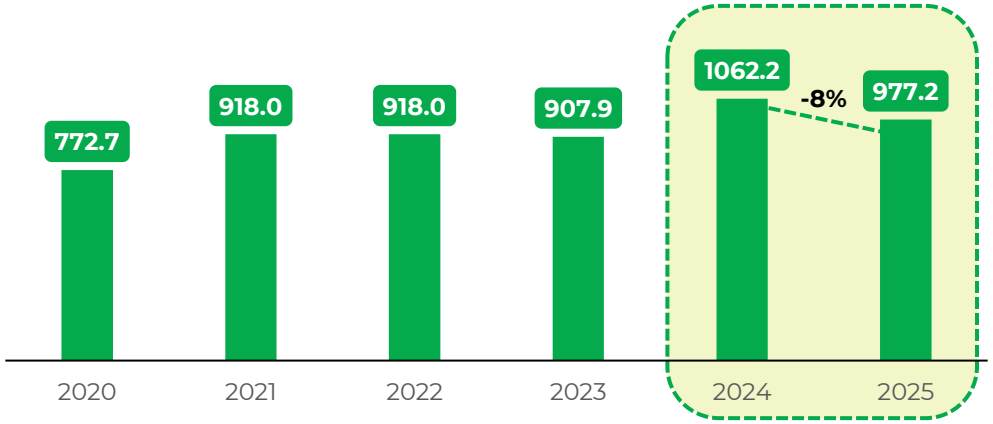

In which expansion translates into **sustained growth**

National ICT market size projection (USD bn)

Yet, Intelbras **breaks away** from sector's trajectory...

ICT segment net revenue over the last 5 years, in BRL thsd

...shifting from **volume-driven** to **margin-led**

Reshaping growth to improve quality and consistency

I — GPON segment as dominant

GPON: ISPs optical network, driven by Brazil's broadband growth

→ **Focus on enterprise**

Enterprise solutions opens a new growth avenue

II — Focus on volume

Scale volume, pressured margins, growth tied to ISP capex

→ **Higher value added**

Higher margin, more resilient revenue

III — Fiber Homes & Intelbras

Exclusive FiberHomes GPON solutions and fiber cable production and sales

→ **GPON market opening**

End of GPON exclusivity: more suppliers, lower concentration risk

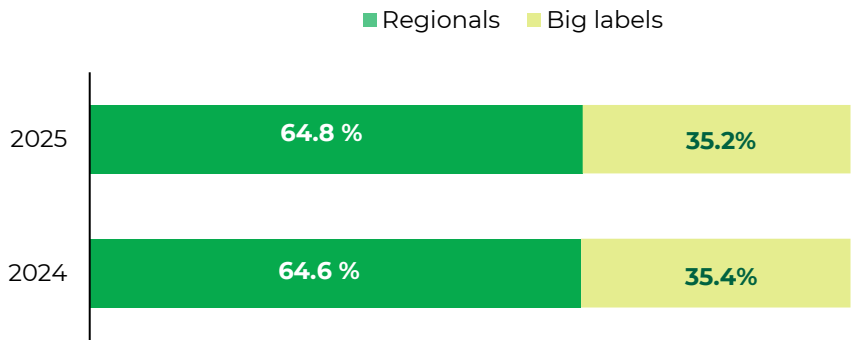

Sources: Company releases, Anatel, Brasscom, Imarc, IBGE.

Positioned to win as the market evolves

Channel dominance and structural advantages align with higher- value demand cycle

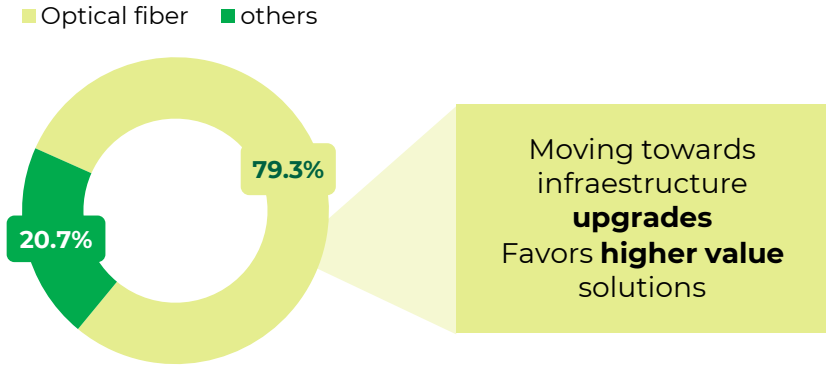

Fragmental ISP landscape favors local player...

Broadband national market-share (%)

...shifting towards **higher-value upgrades**

Brazil has a total of 56.4 mn of broadband connections

And unlocking access **through local production** and **policy**

Turning structural advantages into a defensible competitive moat

"Lei das Tics "
(Lei nº 13969/2019)
+
PPB
(Basic Productive Process)

Regional ISPs can buy **Intelbras** products via **BNDES** financing

And for Intelbras?

- **Preferred vendor:** products are more attractive without price cuts
- **Expands addressable demand:** subsidized credit enables viable purchases
- **Policy drive moat: i**mport-only firms don't qualify for these programs

BNDES financing	**BRL 0.32 bn**
Average tax rate	**3.11% p.a.**
How much does Intelbras save?	**BRL 3.65 bn**

Sources: Company releases, Anatel, Brasscom, Gov.

Why the game has become more favorable

From oversupply to discipline: a more favorable competitive setup

Reinforcing **pricing discipline**

Supporting more stable and predictable margins

Why Brazil became a target market?

- **Asia** holds **52%** of global **fiber** optics market share
- **Cyclical oversupply** drives lower prices and aggressive expansion
- **Brazil's** fiber optical infrastructure is **growing** fast

However...

*GESEX applies **US$ 2.42/kg antidumping aliquot** over Chinese fiber*

Intebras wins

- Imported cables price increases
- International players **exit the Brazilian market**

Less competition + better pricing power

Anti-dumping resets **competitive dynamics**

Higher import costs reduce foreign pressure

Huawei: US$ **0.04/m**		Huawei: US$ **0.084/m**
	After Anti-dumping	
Intelbras: US$ **0.13/m**		Intelbras: US$ **0.13/m**
Gap: US$ **0.09/m**		Gap: US$ **0.046/m**

intelbras

Fiber optics revenue

2025A Market share — **9%** — **0.97 BRL Bn**

After Anti-dumping

From telecom roots to a technology powerhouse

A 50-year journey of reinvention, scaling from hardware origins to an integrated digital ecosystem

A journey defined by expansion and evolution

From PBX pioneer to a full-stack platform, Intelbras grows through innovation, acquisitions and new market entry.

Industry overview

All three markets Intelbras operates in are expanding independently of the economic cycle

Security: structural demand

Unmonitored assets drive growth

Key informations

49% of properties remain unmonitored — an addressable demand frontier that can be captured through the existing channel

68 million people live in condominiums — positioning the residential condo segment as a structurally attractive long-term market

54% of SMEs have experienced theft — an anticíclical driver of corporate demand

ICT fragmentation drives scale

ISPs fuel demand

Key informations

Brazil is the 9th largest global ICT producer — the only Latin American representative in the Top 10

Over 200,000 regional ISPs accounting for more than 50% of the broadband market — a fragmented base that favors localized support

USD 7.44 billion in announced investments in 5G and data centers — a new infrastructure-driven demand cycle

Energy: fast adoption

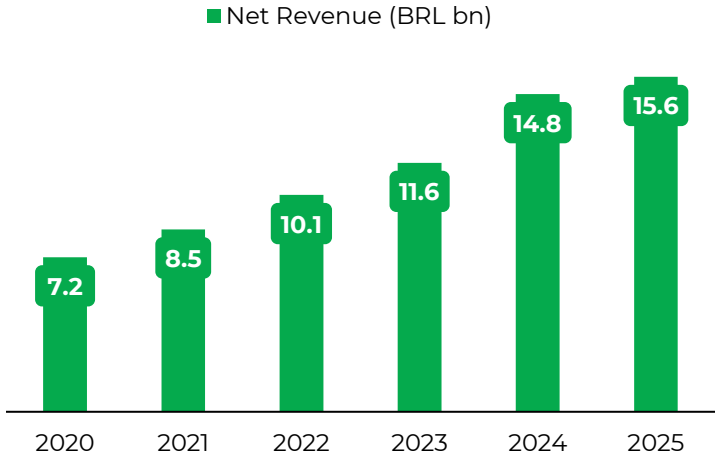

Solar + storage expand ticket

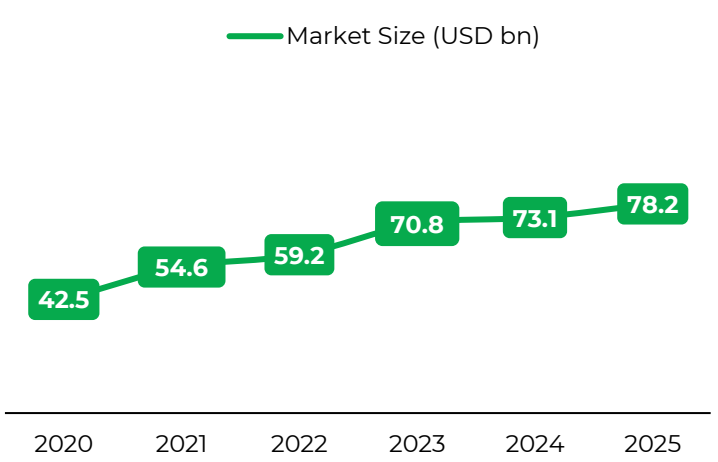

Key informations

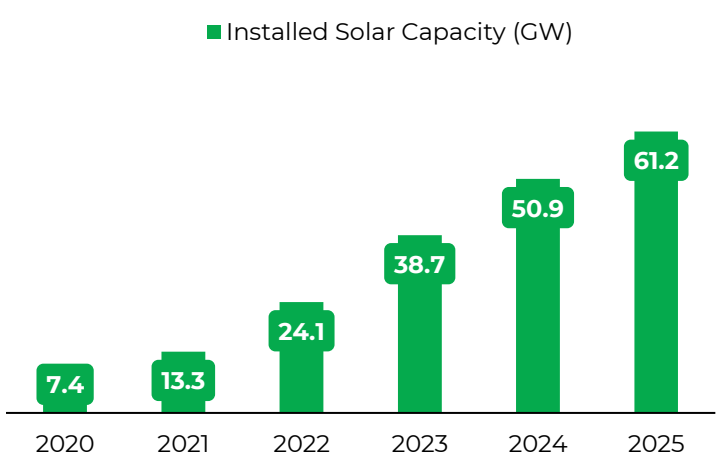

Solar is the second-largest source in Brazil's power mix — a structural energy transition, with 10.6 GW added in 2025

Falling lithium battery costs are ushering in a solar-plus-storage cycle — structurally higher average ticket per project versus pure on-grid solutions

Over 170,000 EVs in circulation, concentrated in condominiums and SMEs — precisely the core customer base of the Intelbras channel

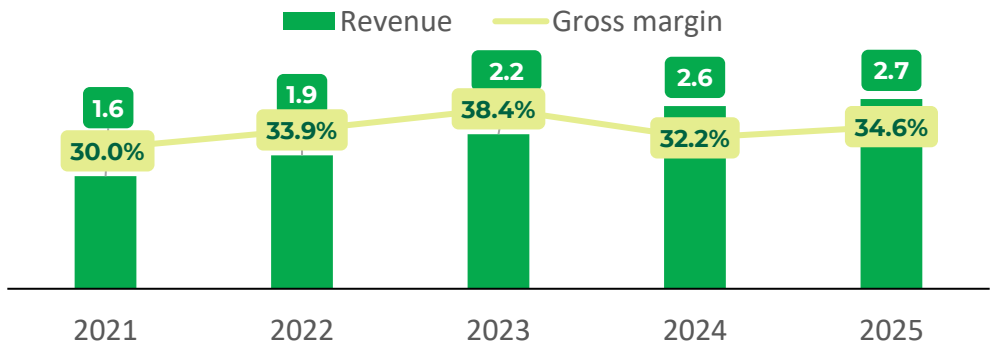

Revenue fell, margin held — the pivot is working

Security leads, ICT resets, Energy recovers; mix shift already shows in margins

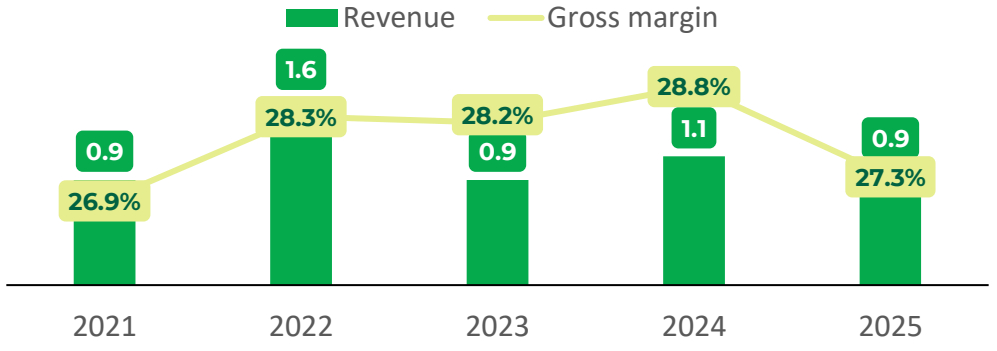

The margin compounder

*Revenue **security** (BRL mn) and gross margin (%) 2021-2025*

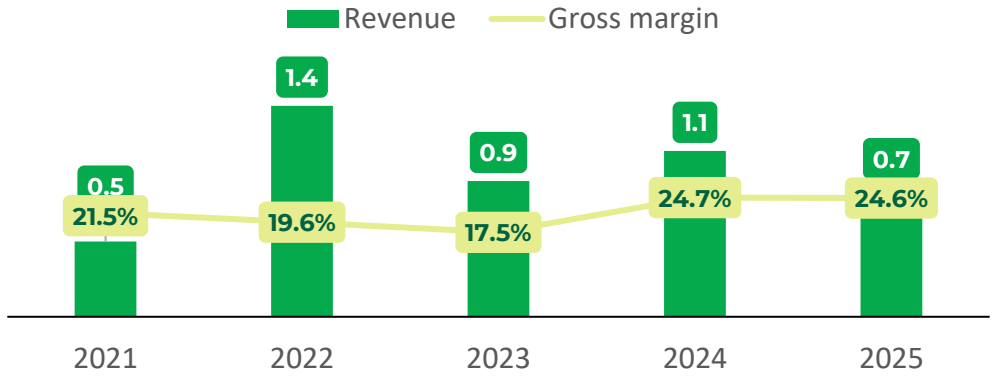

The deliberate reset

*Revenue **ICT** (BRL mn) and gross margin (%) 2021–2025*

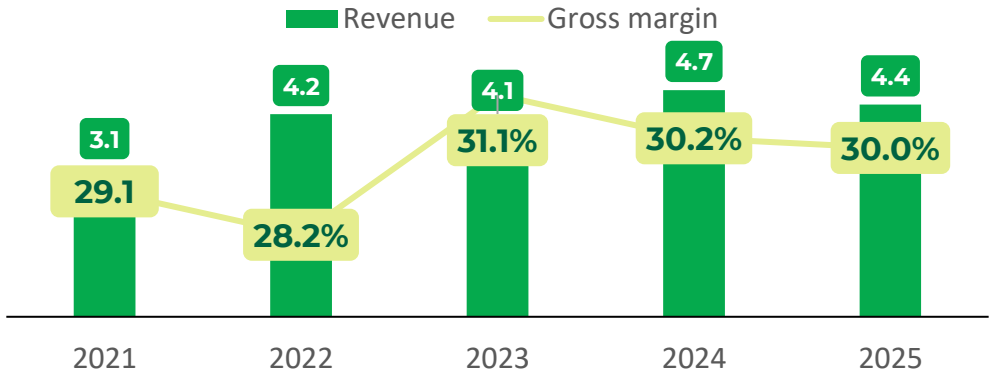

The volatile recovery

*Revenue **energy** (BRL mn) and gross margin (%) 2021–2025*

The mix shift pays off

Net revenue (BRL mn) and gross margin (%) 2021–2025

UEL project: the cross-sell in practice

Cross-sell as a function of complexity

Scale drives complexity

A vast, high-traffic campus operating like a decentralized city

1. **25.000** people per day
2. Campus with **+235 hectares**
3. **High** flow of vehicles

An open, vast, and decentralized space!

Infrastructure lagged behind scale

Fragmented systems limited visibility, control, and response

The security infrastructure did not match the scale and complexity of the campus.

- Difficulty in monitoring critical areas
- Cameras with poor image quality
- Lack of intelligence in the system

Integration unlocks value

One platform integrating security, connectivity, and operations

Intelbras delivered an end-to-end, fully integrated platform—not just a standalone solution

Intelligent video surveillance
111 integrated cameras

Robust network infrastructure
+7 km of fiber optic cable

Centralized command center
Videowall with more than **6 screens**

Integrated operational communication
Radios for communication between teams

Complete and integrated platform
Software + sensors + fire + access control

Short-term disorder for long-term gain: Intelbras's ERP

SAP S/4HANA's go-live dented 1Q25 results — but the structural payoff lies ahead

Datasul was the bottleneck

SAP S/4HANA migration

ERP Datasul (TOTVS)

Although it had supported the company for years, it was beginning to **limit the scale** and **multi-BU planning.**

Limiting **integrated management** of security ICT and Energy

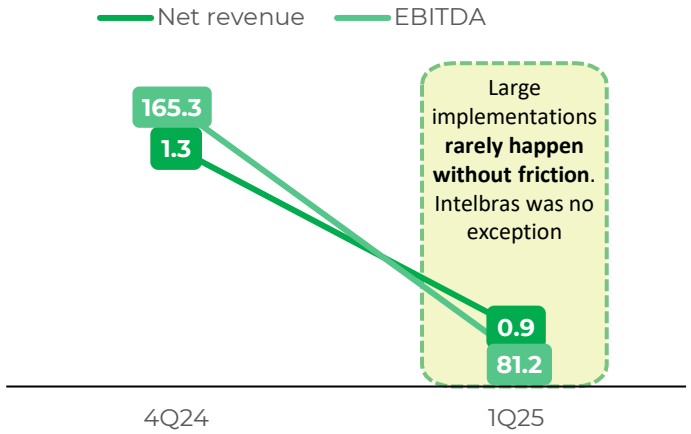

SAP S/4HANA

Trainsition aimed to **unify** the **company's database** on a **real-time processing platform**

Enables holistic view of the **entire supply chai**n, from component **import** to **sales** through the **distribution channel**

1Q25 took the Hit

Net revenue (BRL mn), EBITDA (BRL thsd)

The upside Is structural

Leaner inventory and better governance ahead

Altair Silvestre on ERP transition

Altair Silvestre, former CEO , Intelbras

*"The new **ERP system** brings structural **improvements in governance** and **decision-making** processes. For instance, we should adjust **inventory** levels to an average of **140 to 150 days**."*

Valor

Why?

- **Billing Halts:** Revenue drop due to system downtime and billing delays during go-live.
- **Costs & Expenses:** EBITDA pressure from one-off consulting, training, and adjustment expenses.
- **Information Gaps:** Inventory and logistics friction caused by temporary data inconsistencies.

How?

- **Just in time Inventory Agility:** Real-time demand forecasting reduces stagnant inventory and tied-up capital.
- **Operational Synergy:** SAP facilitates the automated integration of multi-unit orders, streamlining logistics and financial workflows

Distribution built the reach. Trust built the moat

From unmatched reach to measurable loyalty.

The brand recognition at scale

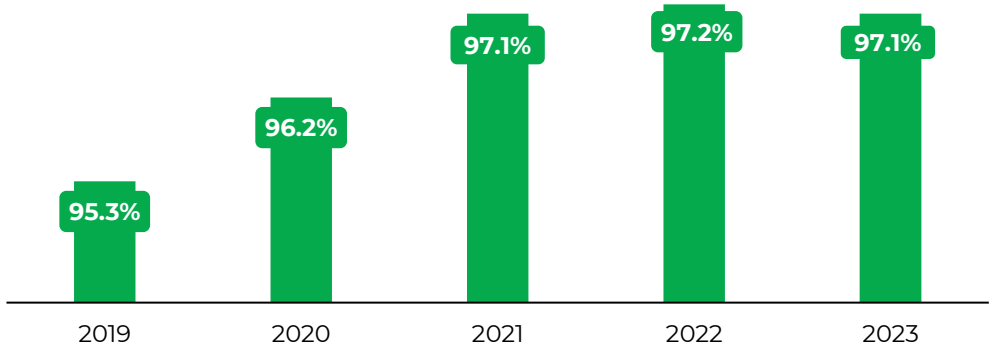

Leadership across categories reinforces brand credibility

...which translates into loyalty

NPS over the last years: a customer loyalty measure (%)

*"If you have extensive **brand knowledge** but your revenue doesn't reflect that level of expertise, it means you have a **huge opportunity** there..."*

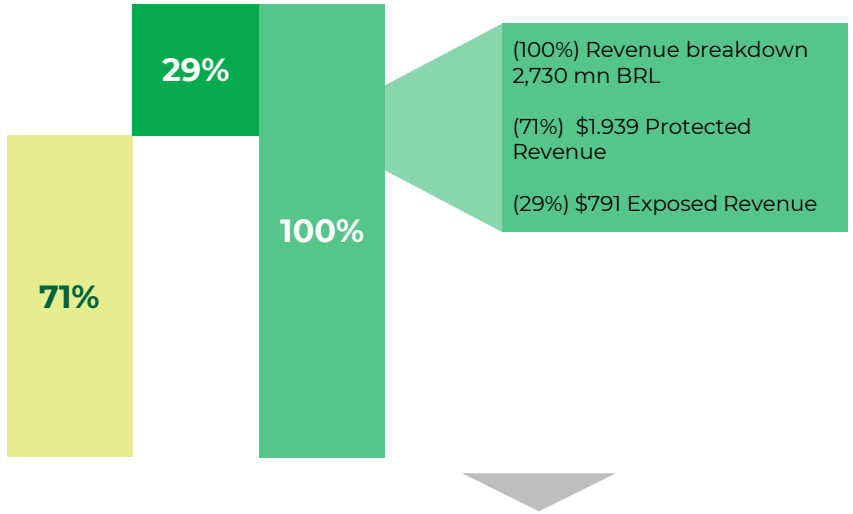

Sonho Grande
Cristiane Correa

Quantifying the white label threat:

71% of Intelbras Security revenue is structurally insulated, white label reaches only the exposed base

Most of security revenue is structurally protected...

Intelbras Security BU revenue breakdown by exposure to white label competition (2025)

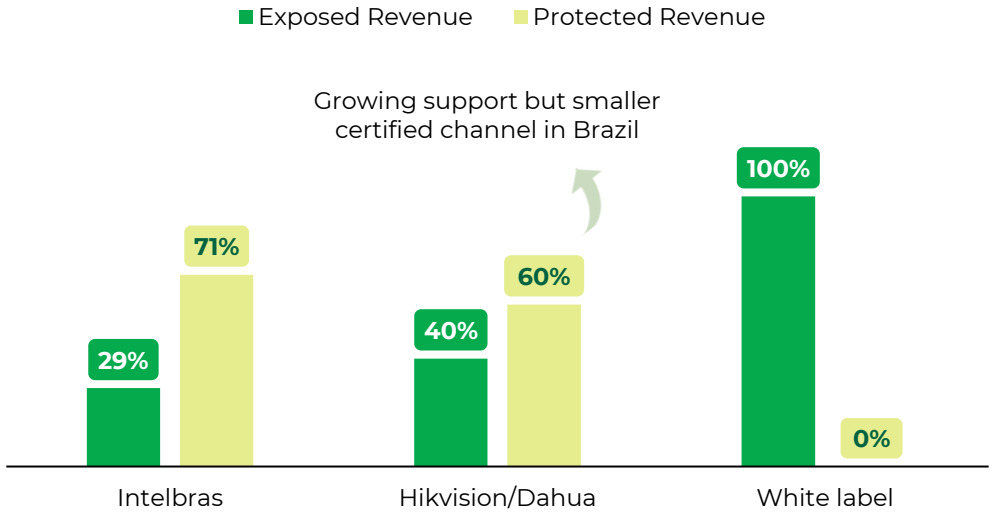

R$ 1.939mn protected, flows through 80k+ certified resellers serving professional segments

+

R$ 791mn exposed, DIY segment where white label R$89 competes vs. Intelbras R$289

...while competitors carry a higher exposure

Revenue exposure to white label competition; Intelbras vs. branded Chinese players

Renan Lopes on exposed revenue

Renan Lopes
Intelbras authorized resseler

"Intelbras carries the lowest white label exposure among all players, and the only one with a certified reseller network that structurally excludes white label from its core revenue base"

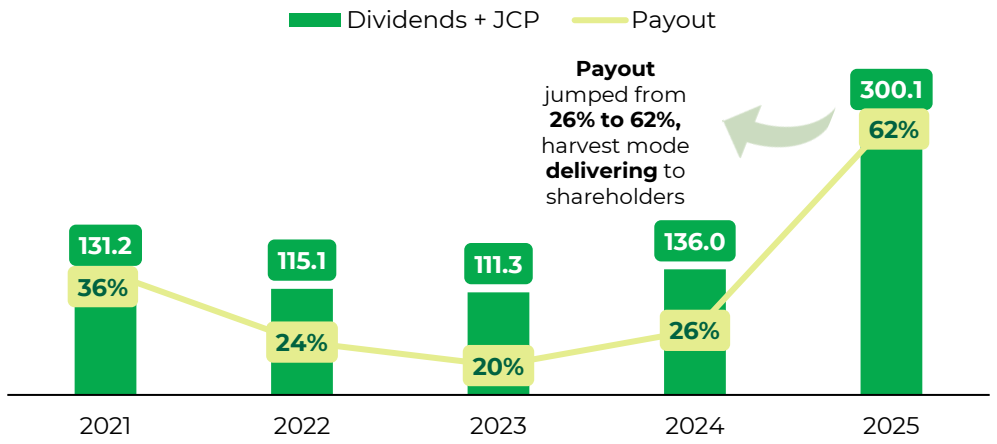

FCF allocation: returning value to shareholders

As harvest mode begins, R$821mi in FCF demands a clear capital allocation framework

The policy: minimum payout, disciplined by design

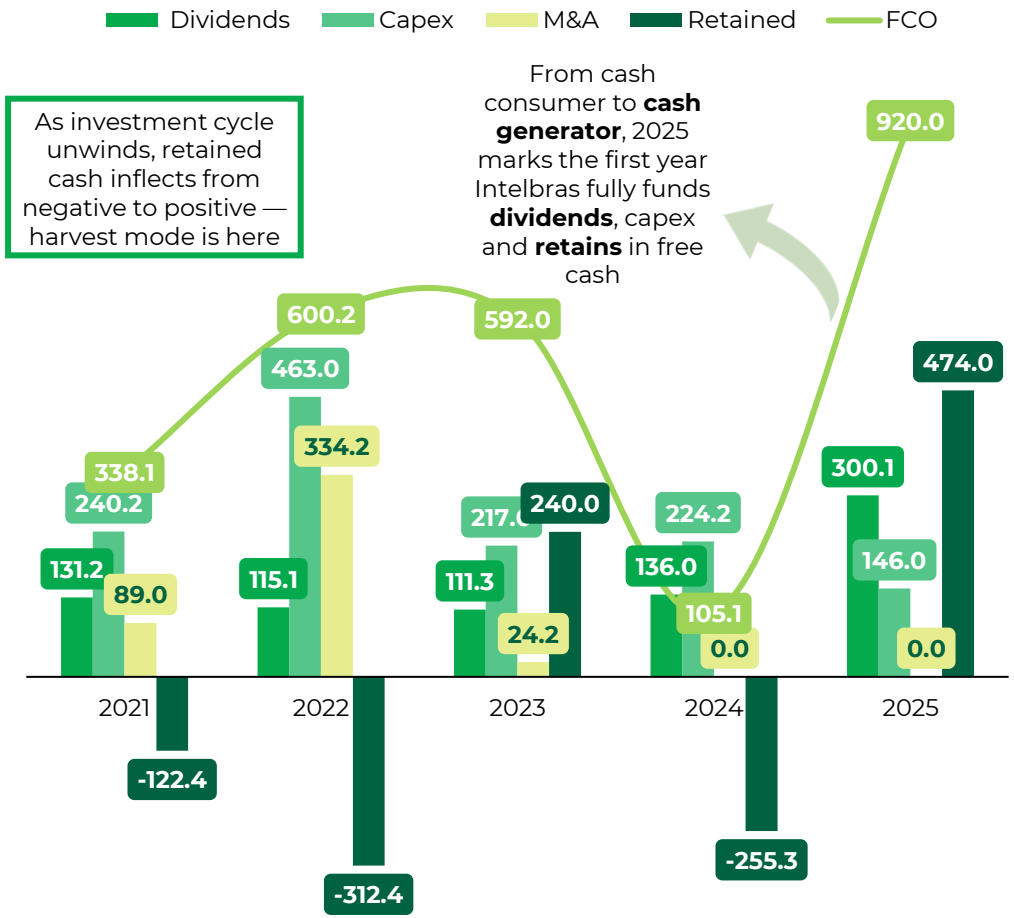

Dividend distribution policy , approved by Board in 2021, revised in 2023

- **Minimum payout**: **25**% of adjusted net income, statutory requirement embedded in bylaws
- **Payment form**: **dividends + JCP**, tax-efficient for Brazilian investors
- **Frequency**: **annual**, with possibility of **quarterly** or **semi-annual** interim distributions

The question: where does BRL 920mn in FCO go?

Three competing use for free cash flow dividends; M&A or buyback

Where the capital went and how it was funded

R$1.7bi deployed post-IPO, organic expansion and strategic M&A funded conservatively

Where the capital was deployed...

Organic capex by destination and M&A timeline (2021–2025)

2021 — **Manaus & MG** plants expanded, security manufacturing scale-up under SUFRAMA regime

2022 — **Tubarão/SC** new plant opened, dedicated fiber optic and UTP cable production

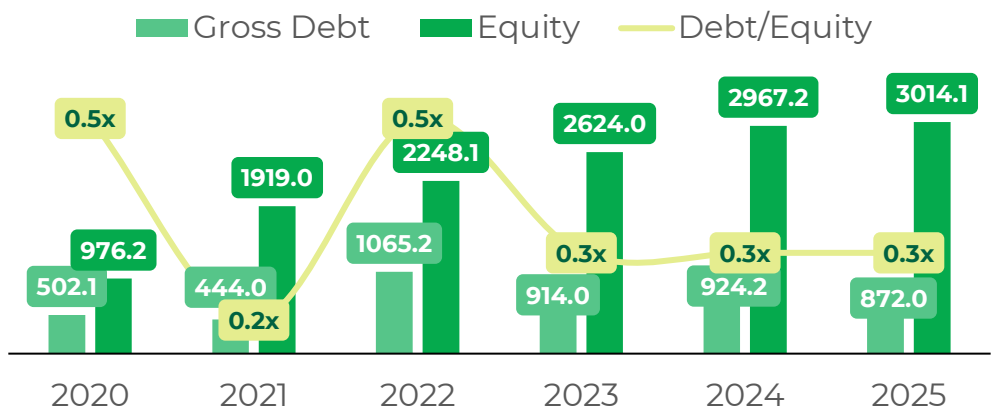

2022–2023 — **São José/SC** headquarters expanded, largest plant, produces all three BUs

2024 — New 44,000m² warehouse completed in **São José/SC**, main expansion capex of the year

2024–2025 — **ERP** implementation, digital infrastructure for the next growth cycle

...funded through three disciplined sources

Gross debt vs. equity (BRL mn) and leverage ratio (2020–2025)

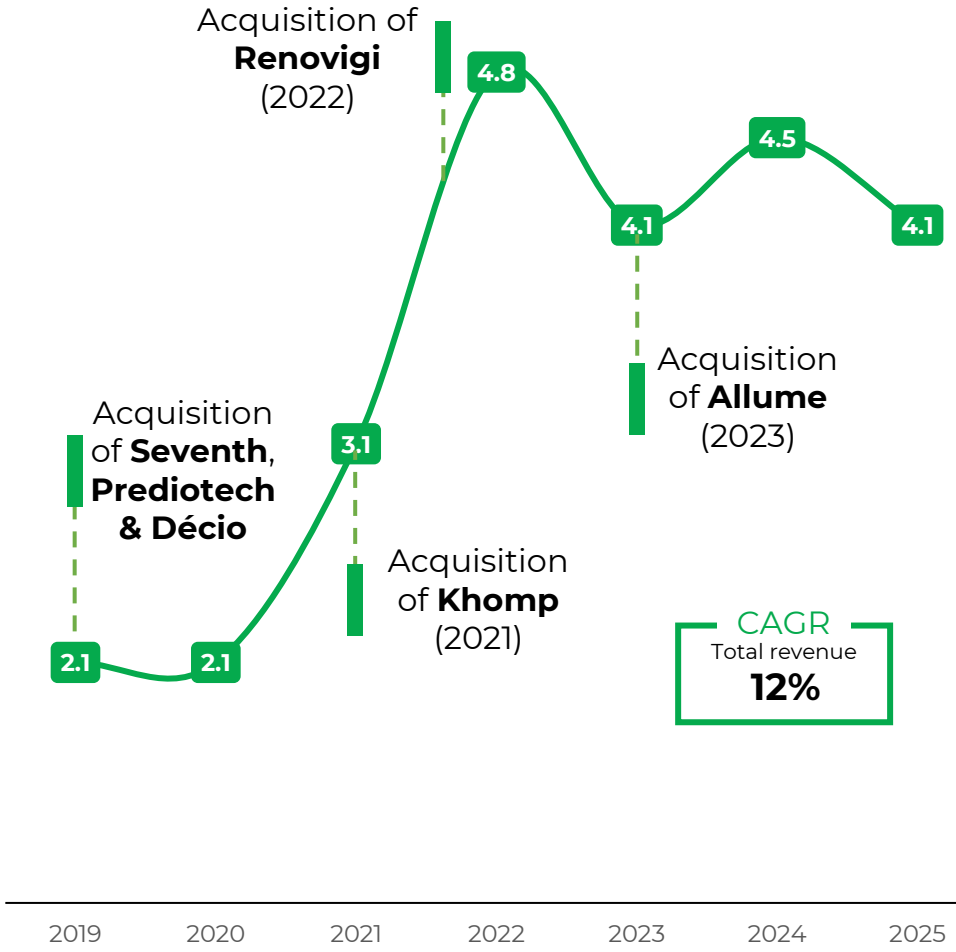

- ***IPO** (Feb/**2021**): BRL**725mn** raised, funded first M&A wave without stressing balance sheet*
- ***3rd debenture** issuance (Oct/**2022**): BRL**500mn** BNDES + FINEP subsidized rates complemented market debt*
- ***Cumulative FCO 2021–2025**: BRL**2.555bn**, operating cash covered the majority of total investment*

Intelbras' leverage

Net cash position absorbs BU-level stress across all segments

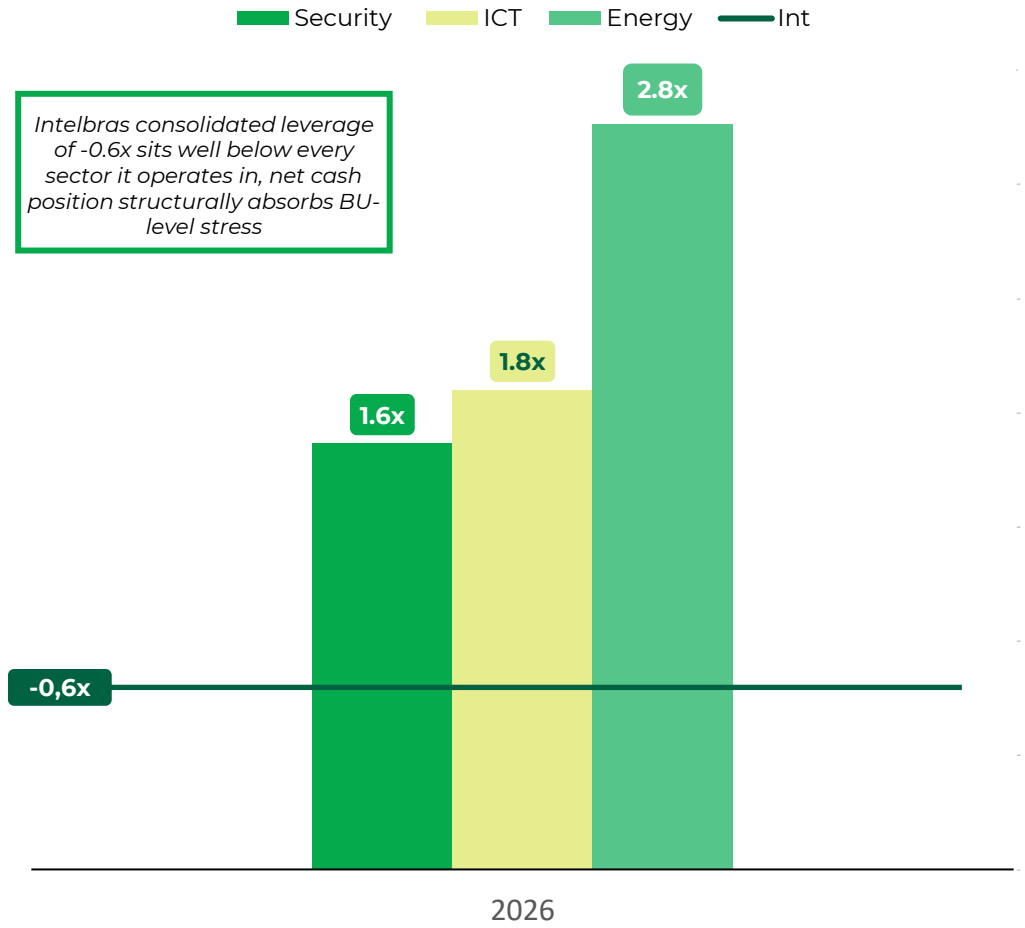

Consistent net cash position across the cycle

Net debt / EBITDA (2020–2025)

Intelbras consolidated well below all sector peers

Avg. Net Debt / EBITDA by sector vs. Intelbras consolidated (20-2025)

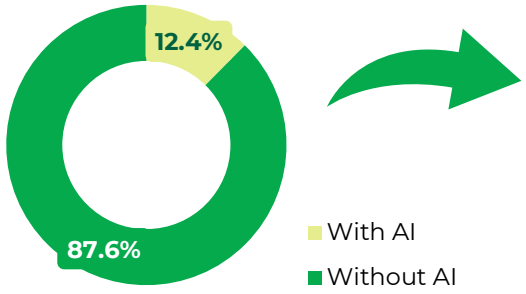

AI adoption is uneven across the Intelbras' portfolio

Security leads, while other segments lag due to lower core value

AI adoption in Intelbras is limited

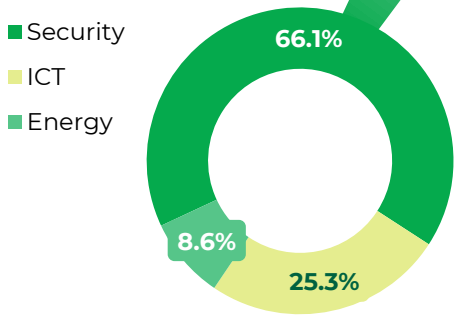

Products with and without AI in Intelbras' portfolio (%)

Only **~12%** of Intelbras' portfolio has **AI**, mostly concentrated in specific segments rather than across the entire product base

...and concentrated in specific segments

AI penetration by BUs'

Security integrates more AI because it relies on **interpreting complex visual data**, while other segments are **centered on infrastructure and hardware** where intelligence adds less core value

Security domain due to higher value creation

How the AI penetrates in the security sector

The use of AI in security is not uniform, with cameras being the main drivers of this change.

57,4% of security products with AI are cameras

Why?

This happens because cameras demonstrate a real gain in **efficiency** through **cost reduction, increased**

AI adoption is **slower** in **ICT and energy** because these segments rely on standardized hardware and infrastructure, where **intelligence adds limited core value**

Laws: “Lei das TICS” & “PPB”

Lei das Tics(Lei n° 13696/2019):

Grant tax incentives (IPI reduction) to companies that:

- Manufactures technology equipment in Brazil
- Invest in R&D
- Comply with industrial regulations (ex PPB)

PPB (Processo Produtivo Básico)

Establishes the **minimum** manufacturing steps in Brazil required to qualify for “Lei das TICS” incentives.

Requirements:

- Assemble and integrate the product in Brazil
- Test and internally validate quality
- Solder components onto printed circuit boards
- Install firm wall/ software
- Use domestically sourced components in accordance with required percentages

Benefits:

Benefits: financial **credit** to compensate federal taxes.

The incentives worth is calculated based on a multiplier applied to **R&D investments** made by Intelbras

The credit has a **limit of 4%** of gross revenue in ICT sales and services national market.

Intelbras:

2025:
35,5 Mn BRL of credit to use

During 2025:
123,3 Mn BRL of financial benefits utilized

Anti-dumping after 5 years

Efficiency X Re-entry:
In the 5 years of “buffer-zone”, the company should have successfully reduced its production cost to be able to fight with Chinese competitors.

Revenue Sustainability:
Intelbras aims to reach a fiber optics revenue of 3.33 Bn BRL. Maintaning this level post-2030 depends on locking in customers through integrated ecosystem.

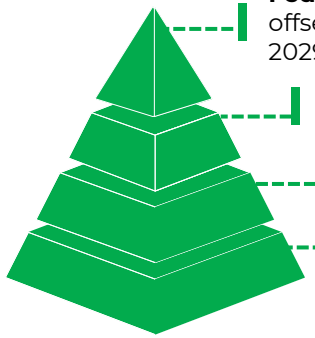

Market share consolidation:
With this 5-year gap and the market share projection of 30,7%, there’s already a good representation in the market, making it the incumbent player, even after barriers fall.

Tax incentives: a structural cost advantage

Five overlapping tax regimes reducing effective tax burden; a moat built on regulation, not luck

Four layers, one moat

Overlapping tax regimes, distinct legal basis, no point of failure

Federal IT Law Federal tax credits offset by mandatory 4% R&D — until 2029.

SUDAM 75% corporate tax cut on Manaus profits — through 2033.

State (SC · MG · PE) Presumed ICMS credits ~3% effective rate in SC, 0% in MG, through 2032.

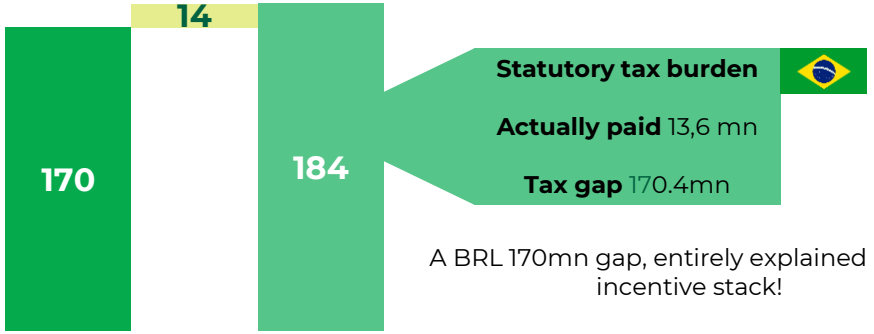

SUFRAMA (ZFM) IPI exemption + Import Tax reduction — constitutionally shielded until 2073.

Cost-benefit

Paying **R$47MM** to keep **R$507MM**
10.7x return on compliance

The financial impact

Fiscal benefits as % of net profit — incentives are not marginal, they are structural

A BRL 170mn gap, entirely explained by the incentive stack!

The geographic moat

Five plants, four tax regimes — redundancy by design

Filial São José, SC	SEFAZ-SC + Federal IT Law
Filial Manaus, AM	SUDAM + SUFRAMA + SEDECTI
Filial Minas Gerais, MG	SEFAZ-MG
Filial Nordeste, PE	SEFAZ-PE
Filial Tubarão, SC	SEFAZ-SC

The risk, and why it's manageable

Three structural threats, three structural answers

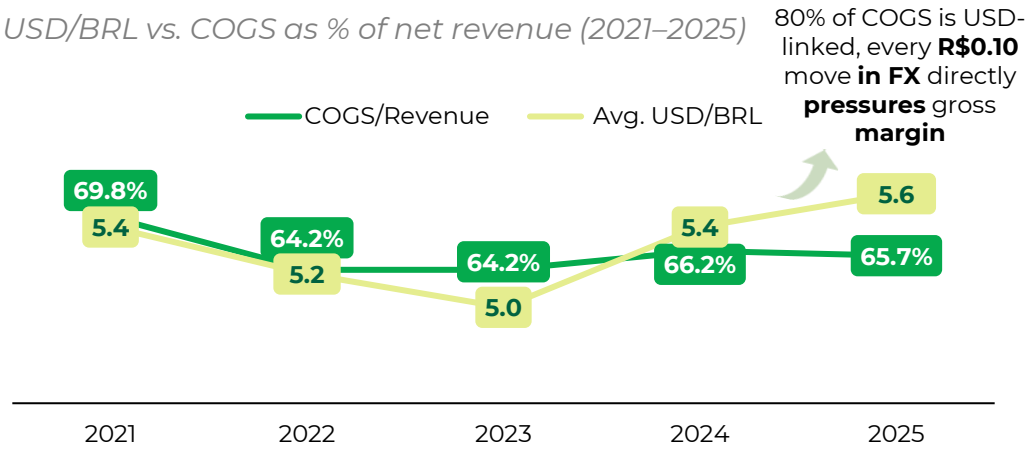

1	Federal IT Law expires in 2029	ZFM expansion offsets the exposure, shielded until 2073
2	State ICMS credits disappear with Tax Reform	LC 160/2017 buys time through 2032 for ZFM migration
3	Single regulatory shock could unwind the stack	No single regime accounts for the full benefit

Margin recovery is an execution story, not a macro one

High USD- linked costs create a structural lag, making inventory efficiency the true driver of margin recovery.

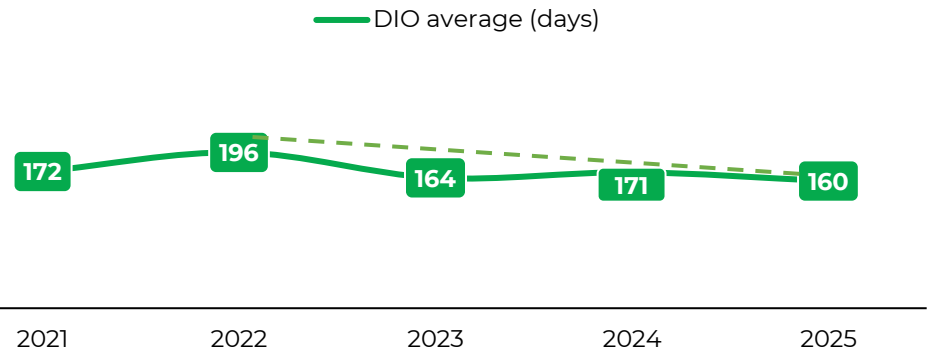

The FX exposure is structural

USD/BRL vs. COGS as % of net revenue (2021–2025)

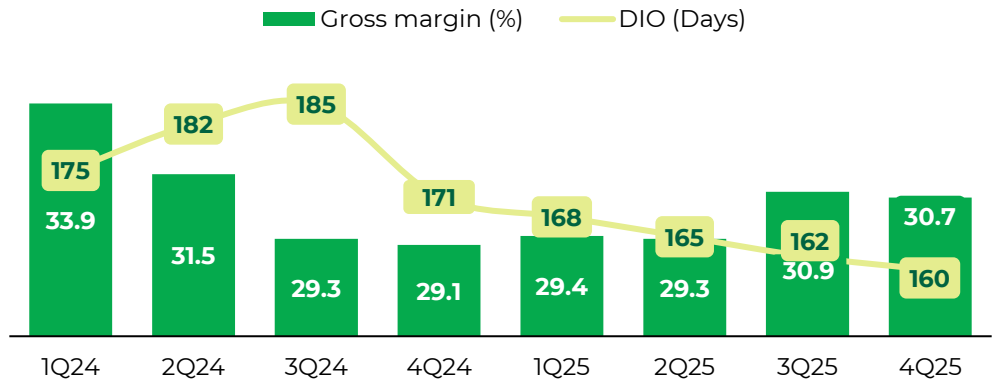

Inventory turns FX into a timing game

Intelbras DIO trend (2021-2025)

Costs react first, margins catch up

Gross margin lags USD/BRL depreciation by 3–4 quarters

The inflection is ahead

Three signals confirming the inflection

DIO declining from **185 to 160** days, inventory normalization underway

+

Gross margin recovering **+1.6 p.p**. from trough, Q3 to Q4 2025

+

FX stabilizing at **~R$5.4**, cost pressure no longer accelerating

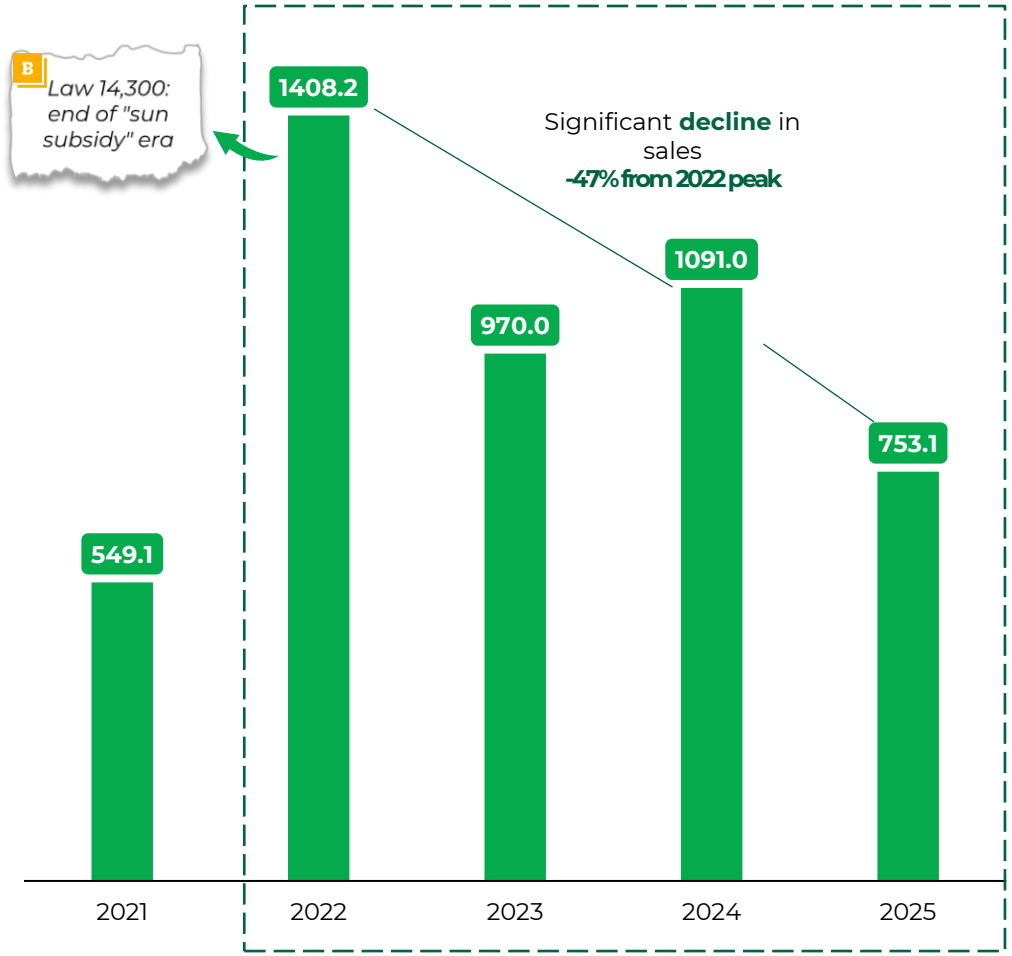

Execution**, **not FX**, drives the **recovery
the machine is already adjusting

Solar, a long-term bet facing short-term headwinds

Intelbras built a relevant position in a market that is now decelerating

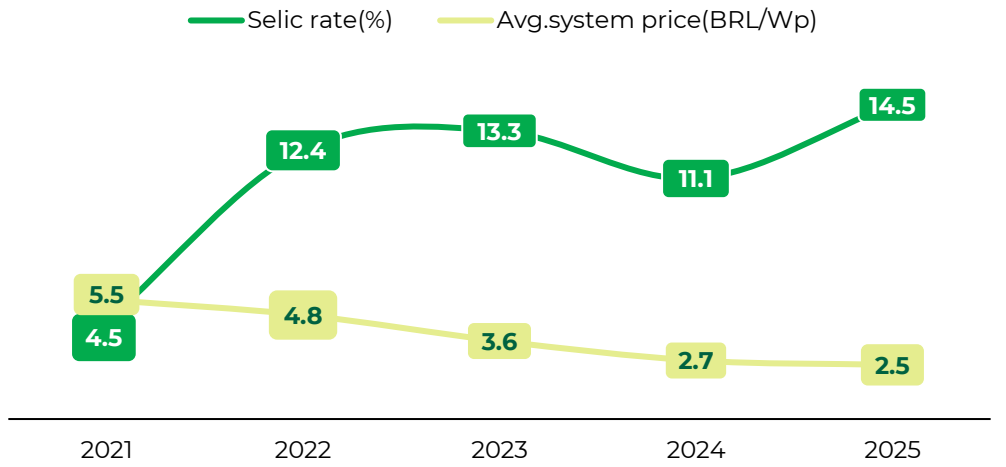

Rapid growth, then a setback...

Energy BU net revenue Intelbras (BRL mn)

...caught between a rising rates and falling prices

Annual average Selic rate(%) vs average PV system price (BRL/Wp)

Rodrigo Sauaia, CEO, ABSOLAR

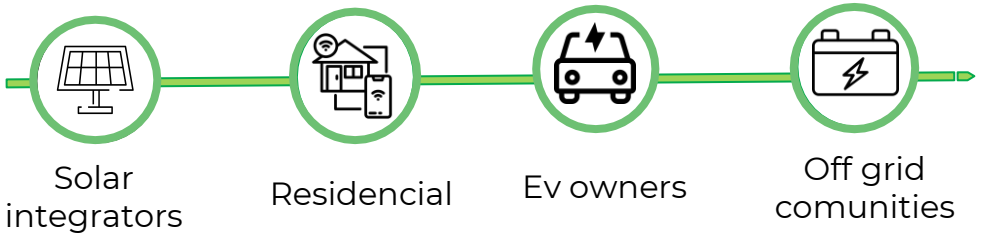

"The solar sector depends on financing. People don' t buy solar with cash"

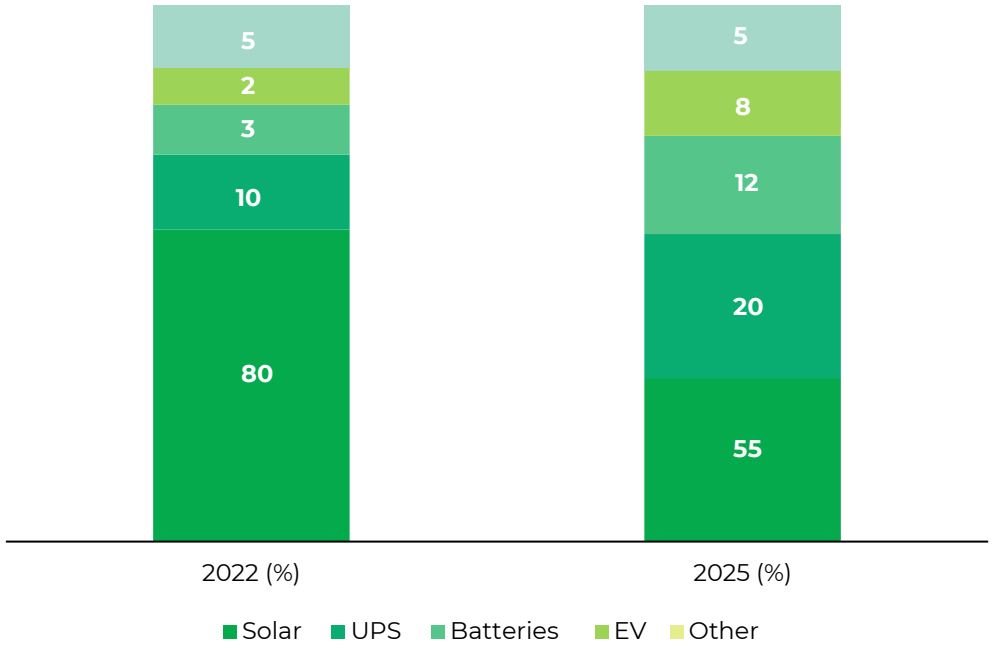

From solar dependency to a diversified energy platform

The revenue mix shift reveals a deliberate repositioning toward higher-margin, recurring demand

Shifting the revenue mix deliberately

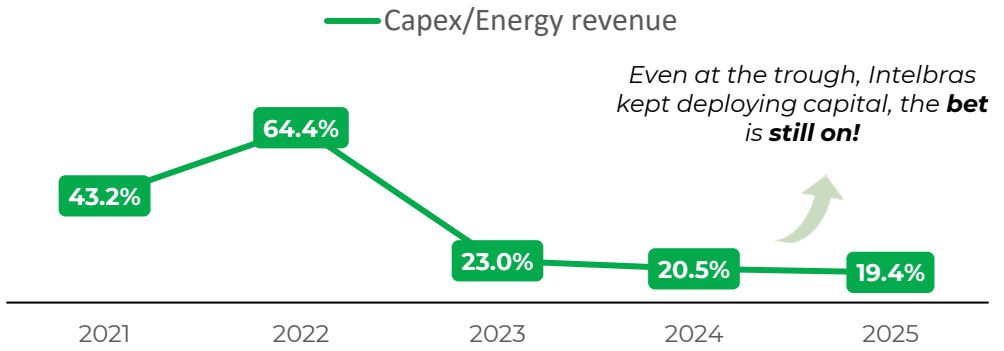

Energy BU revenue composition

...energy: a cyclical dip, not a strategic exit

Total capex vs. Energy BU revenue (R$mi) (2021–2025)

EV 170k EVs in circulation *Intelbras' core channel* + **Off-grid 10.6 GW** added in 2025 *2nd largest power source in Brazil* + **Storage Falling** battery costs *Higher avg. ticket per project*

Key Chinese players are repositioning

- SUNGROW Clean power for all • Global inverter leader
- GROWATT • Residential/commercial focus
- Deye • Fast growth in emerging markets

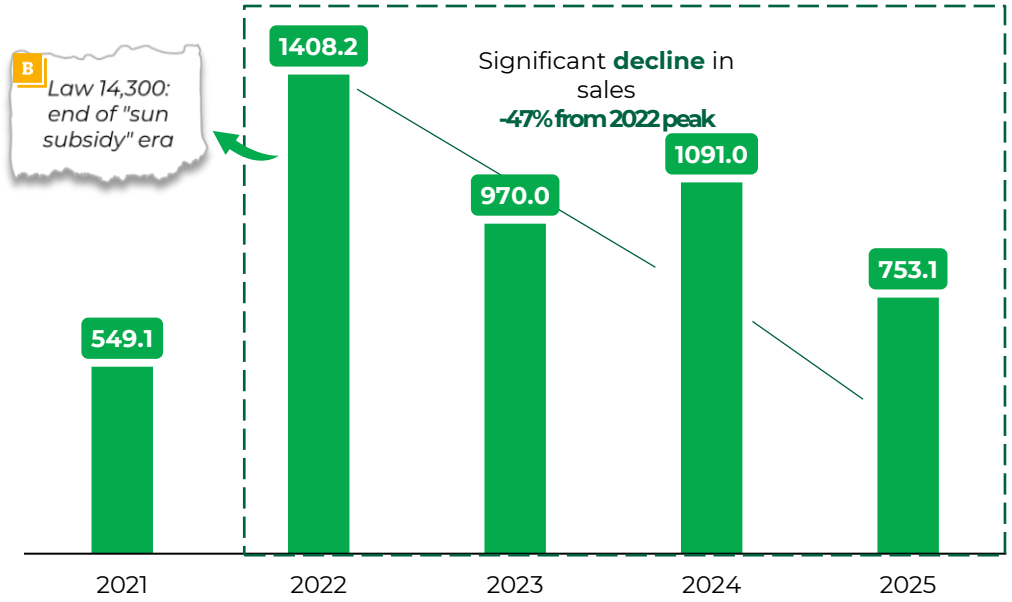

Energy: a cyclical headwind, not a structural threat

Regulatory and macro pressures are real, but Intelbras is structurally insulated

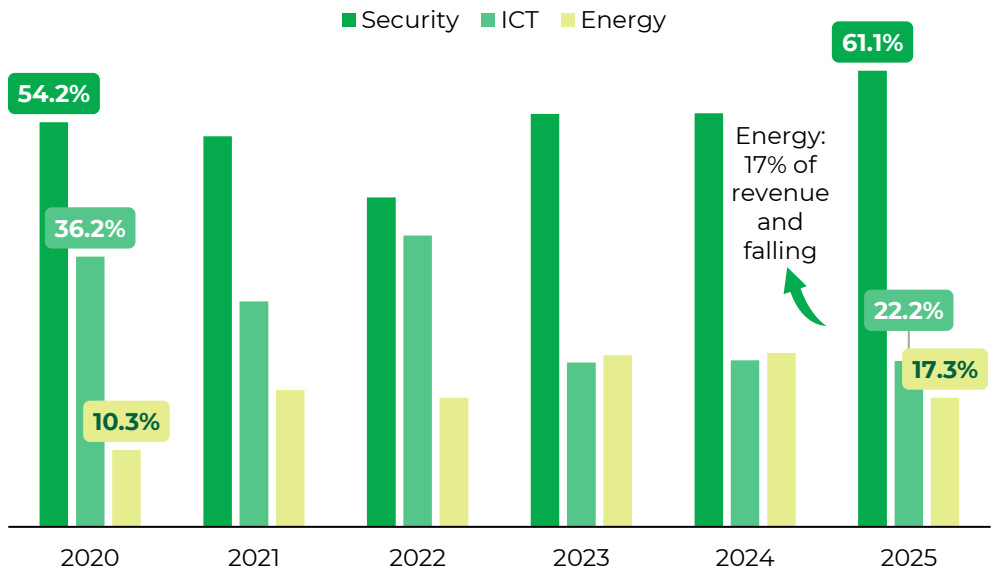

Rapid growth, then a setback...

Energy BU net revenue Intelbras (BRL mn)

...but Intelbras is not exposed

Energy BU as % of consolidated revenue and strategic response

Rodrigo Sauaia, CEO, ABSOLAR

"The solar sector depends on financing. People don' t buy solar with cash"

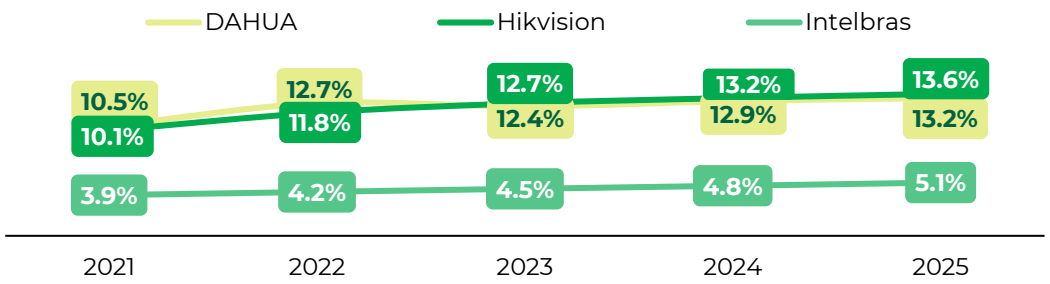

- SKU rationalization, focus on higher-margin solar-plus-storage
- *Decline is regulatory and macro, not competitive. Intelbras kept its installer base through the downturn*
- *Solar at 5% penetration, the cycle normalized, the opportunity did not disappear*

Neither the best price nor the best product

Intelbras's channel moat renders hardware and price gaps irrelevant

Structural issue: price and quality gap...

R&D/net revenue and câmera price comparison with peers

Intelbras cameras match or lag Chinese alternatives on hardware.

Bullet 2MP Full Color PoE:

Dahua R$439.59 < Intelbras R$696.89

Bullet 2MP Full Color PoE, IP67

Hikvision R$399.81 < Intelbras R$636.97

1000 VHL 1120 B

White label R$63.36 < Intelbras R$92.03

... channel as the real barrier

Relacionamento com cana como barreira

Competitors are unable to copy Intelbras' channel:

- Years in the market have built generational relationships and a reputation.
- High switching costs, both financial and intellectual, for distributors and resellers.
- Technical support better than its peers
- Market fragmentation and saturation as a barrier

As long as Intelbras has a **solid channel**, it doesn't need an advantage in either **price** or **quality**!

Turning macro volatility into distributed resilience

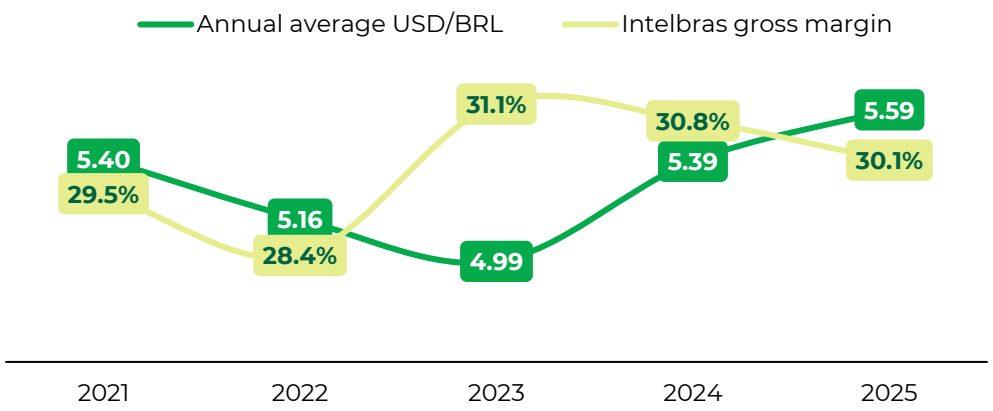

Intelbras absorbs FX and demand shocks through hedging, distribution and end-market diversification

Where macro hits first

Rates pressure demand, while FX pressures dollar-linked costs

Macro pressure hits through demand and margins

- High Selic tightens demand and working capital
- Weaker domestic consumption delays discretionary purchases
- BRL depreciation compresses gross margins
- 80% of COGS is dollar-linked, increasing FX sensitivity

The channel as a shock absorber

Each layer of the ecosystem mitigates a different macro risk

intelbras

FX hedge
Protects the timing mismatch between dollar-linked imports and BRL channel repricing

Distributors

Commercial buffer
Reduce fixed selling costs and support price pass-through

Resellers

Last-mile buffer
Absorb installation, support and local service

End customers

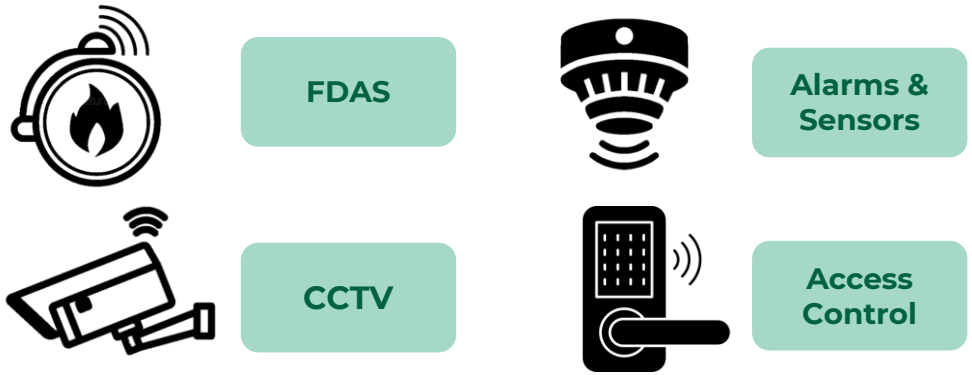

Diversification buffer
Broad end-market exposure dilutes dependence on household consumption

Resilient leadership with nationwide reach

Strong security position, supported by capillarity and full portfolio

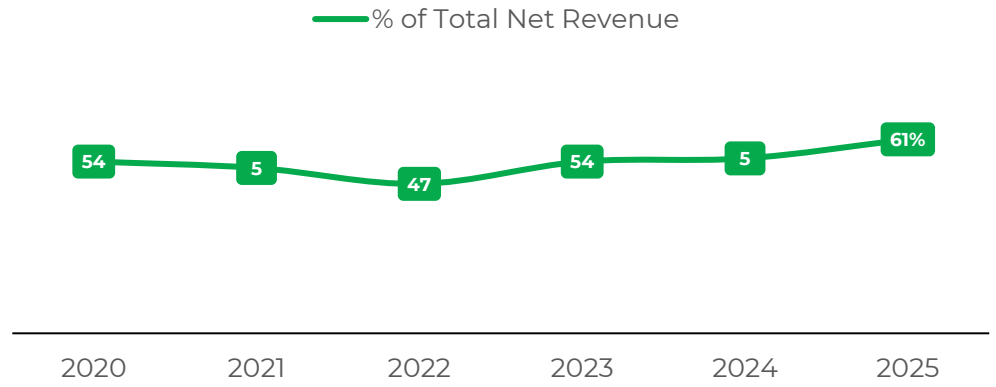

A full-stack security offering

Intelbras covers the full security value chain

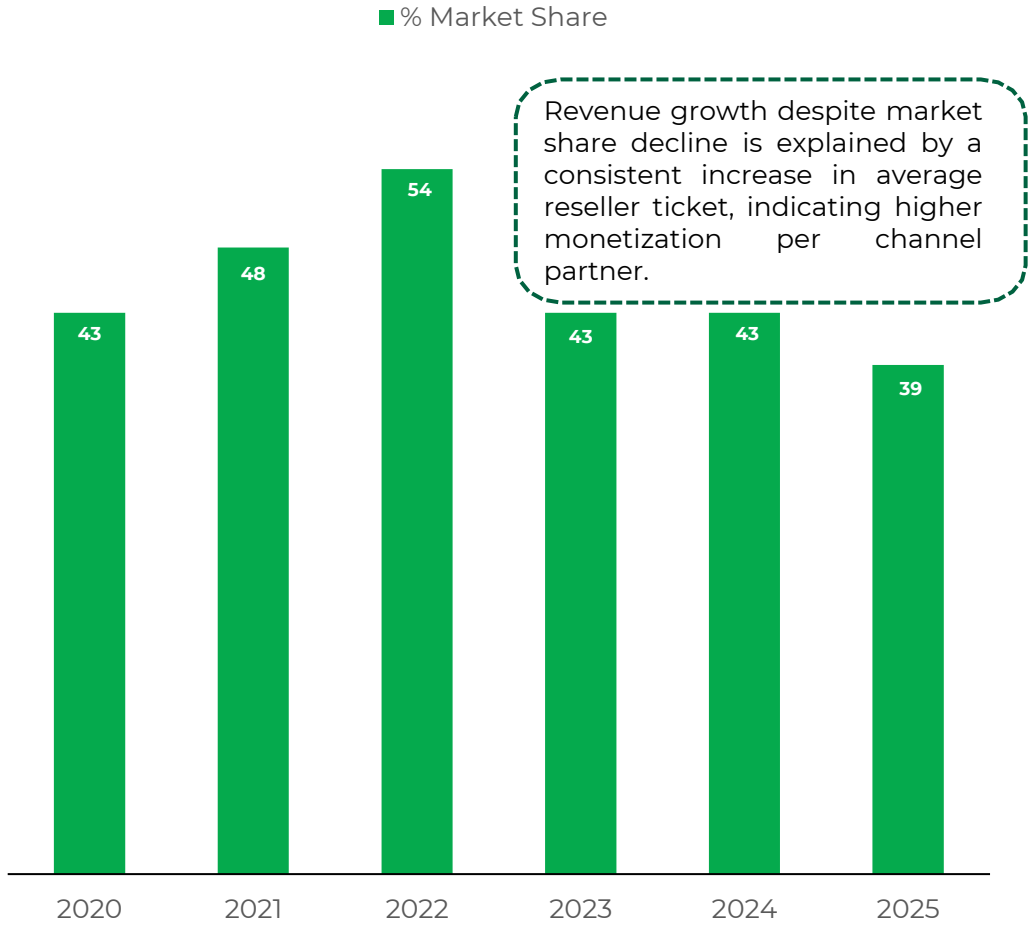

Security drives Intelbras

Largest segment by revenue, representing most part of net revenue

Strong market share, despite recent decline

Market share (%) x Average annual ticket per reseller (in R$ mi)

Fighting giants on uneven ground

Navigating global competition through brand popularity and supply-side cooperation

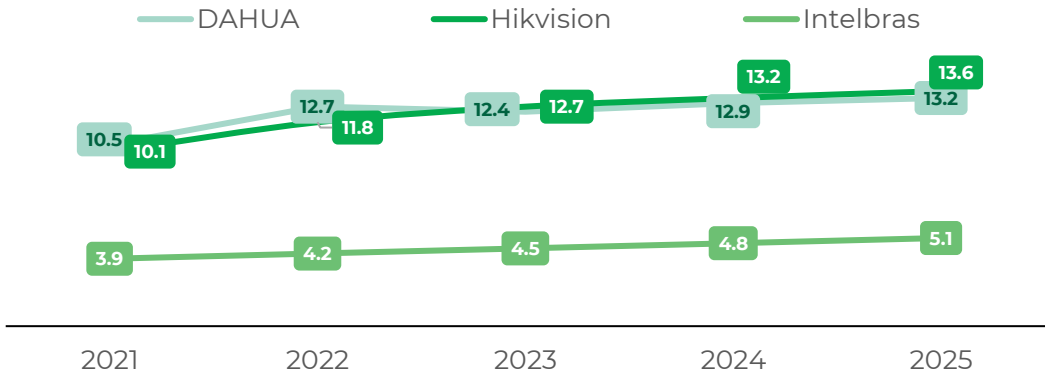

Facing a fragmented landscape...

From global to local, each player cheallenges Intelbras uniquely

CCTV	FDAS	Alarm & sensors	Access control
HIKVISION	Honeywell	JFL ALARMES	Honeywell
dahua TECHNOLOGY	GAREN	POSITIVO	Segurimax

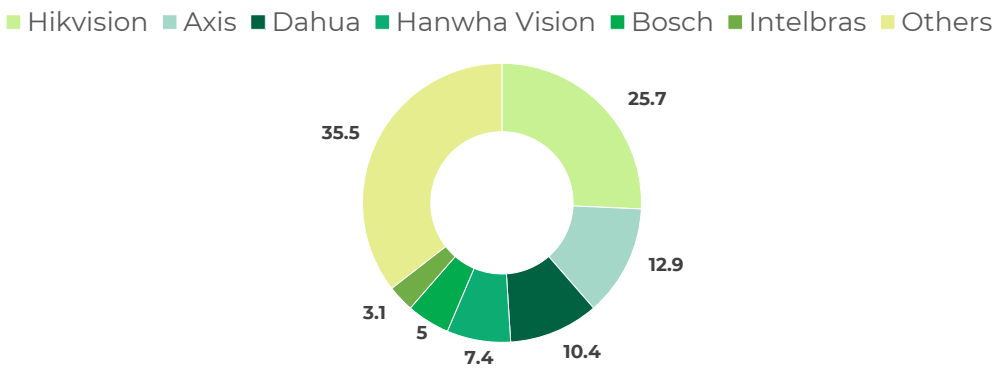

... while competing without the same firepower...

Comparisson of R&D / net revenue (in %)

... Leveraging global brand reach...

Popularity statisticsm of CCTV câmera brands (2025)

...but supported by foreign suppliers.

Dahua case: A Paradox of Competition and Cooperation

- Dahua holds a **7.56% equity stake** in Intelbras
- Acts as the **exclusive supplier** of CCTV systems
- And accounts for **31,1% of total expenses** with suppliers

Supports product **quality** while operating**below-peer R&D intensity**...

...while **competing head-to-head** in l**arge-scale**, project-based deployments.

Risk: High **supplier concentration** exposes Intelbras to **supply chain disruptions**

The Visible and the Invisible

ICT competitive landscape, Chinese cost asymmetry, and the threat MIDI doesn't measure

A layered and fragmented competitive landscape

Key players by product category within the ICT segment

intelbras

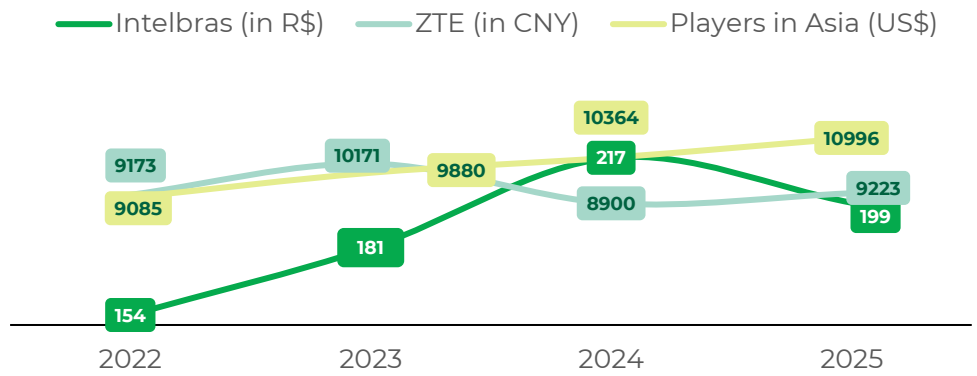

20% of all players are **Chineses**

Networks	cisco, tp-link
Optical Fibers	FiberHome, HUAWEI
Cables	FURUKAWA ELECTRIC
USB Adapters	logitech, Multi
Wifi	tp-link, ZTE
Software & Apps	Multi, xiaomi

Competing on unequal terms

Sales and marketing expenses (in mn)

Scale advantages favor Chinese competitors over Intelbras.

The Invisible Competitor: White-Label Imports

Unbranded imports are invisible to market metrics

- MIDI tracks only registered players – unbranded imports are invisible to the metric
- Intelbras ICT share fell from 16% to 9% between 2022 and 2024
- Resselers face direct margin incentives to import unbranded hardware directly

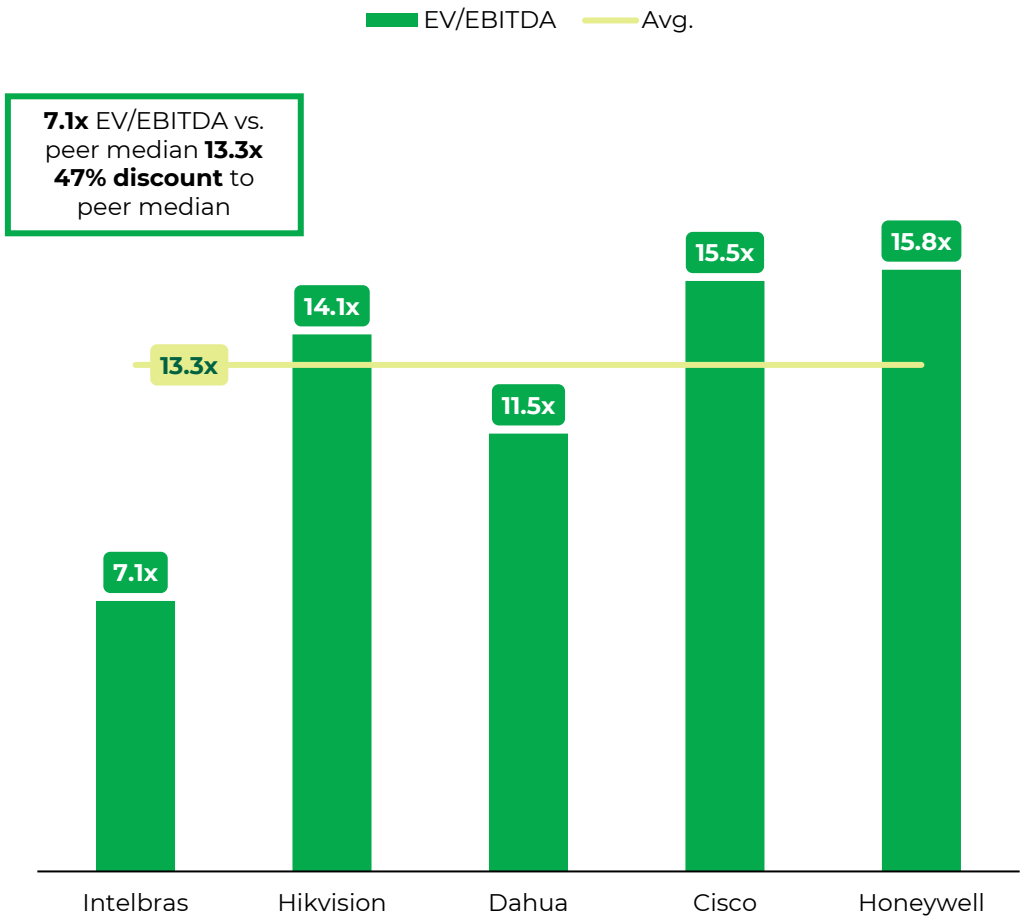

Whats MIDI doesn´t measure is what is eroding the channel

Multiple analysis: a compelling entry point

Intelbras trades at a significant discount to peers across every metric, fundamentals do not justify the gap

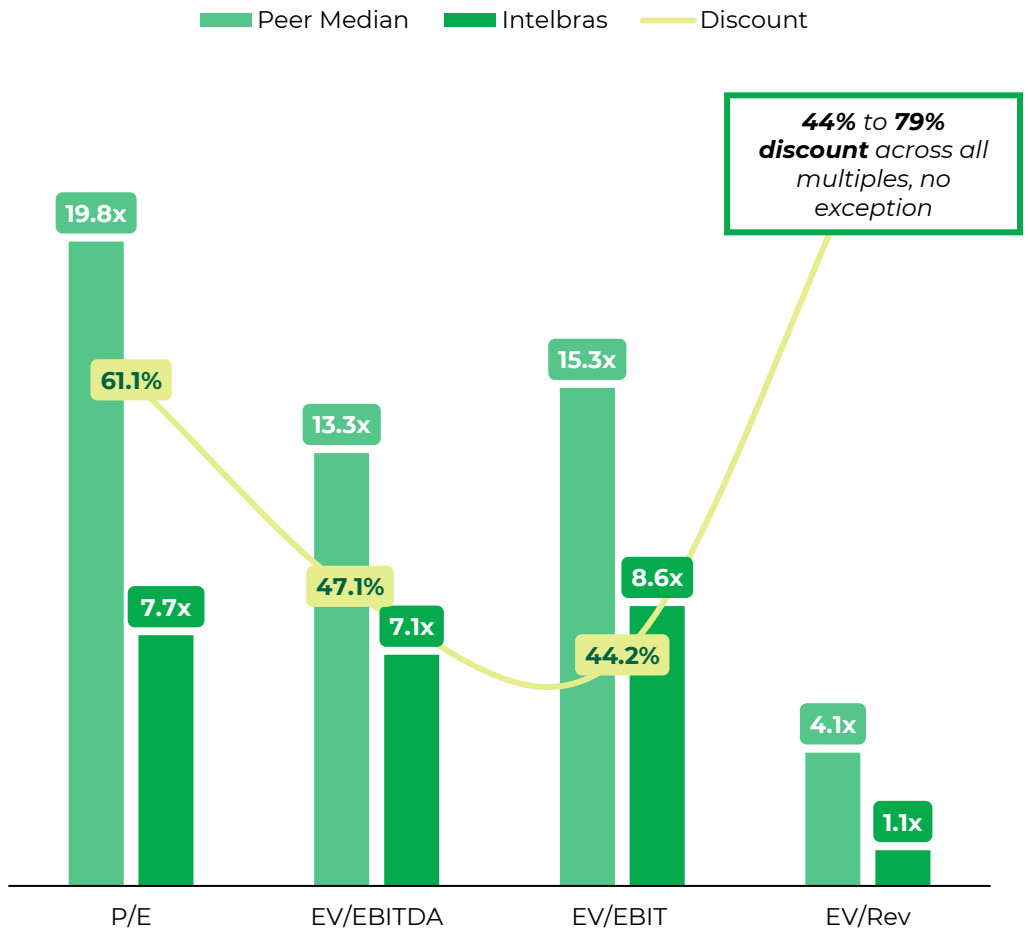

Cheaper than every quality peer...

EV/EBITDA by company

...across every single metric

Intelbras vs. peer median — indexed multiples (peer median = 100)

Intelbras total channel-derived economy

Logistics & Sales Assumption: Based on Brazilian retail benchmarks (25–35% SG&A; 4–6% PDA), we adopted conservative estimates of 30% for SG&A and 5% for PDA for Intelbras.

Operational economy	Sales channel	Direct model
Net revenue (BRL bn) 2025	4,5bi	4,5bi
Sales expenses (SG&A) (BRL mi)	531,4mn (11,8%)	1,35bi (30% est.)
Operational economy (BRL mn) (A)	R$	819.000.000,00
loss of credit avoided	Sales channel	Direct model
Net revenue (BRL bn) 2025	4,5bi	4,5bi
PDA (provision for doubtful accounts)	36mn (0,8%)	225mn (5% est.)
loss of credit avoided (BRL mn) (B)	R$	197.400.000,00
Total economy from channel (A+B)	R$	1.016.400.000,00

Cost of aquiring the resseling points (average SMEs costs)	
Store renovation	80000
Forniture/display fixtures	40000
Equipment/IT	20000
Initial inventory	120000
initial working capital	70000
launch marketing	15000
Legal/setup cost	5000
Total (A)	350000
Numer of stores (B)	80000
Total capex economy from resseling	28bn

Channel Margin Assumption: We assume ~27% of revenue is captured by distributors and resellers, reflecting Intelbras' outsourced channel structure.

Margin "loss" from channel = $\frac{4,5}{1-0,27} - 4,5$ = **1,66bn**

How many years would it take for channel insourcing to become profitable?

Liquid gain 1,66bn – 1,016bn = **644mn**

28bn/644mn = **43,5 years**

In-housing channel logistics: With na estimated **CAPEX of R$ 28.0** billion with additional **annual OPEX of R$ 1.02 billion,** Intelbras would take **43,5 years** profit over channel insourcing!

Average AC turnover: Intelbras, Dahua and Hikvision

AC turnover = net revenue / Avg Accounts receivables

Intelbras				AVG. AC turnover
Year	**Net Revenue**	**Avg Accounts Receivable**	**AC turnover**	4,60267315x
2021	3000182	569892	5,26447467x	
2022	3772934	692271,5	5,45007847x	
2023	3792130	835181	4,54048883x	
2024	4462988	1056170,5	4,22563213x	
2025	4109559	1163294	3,53269165x	

DAHUA				AVG. AC turnover
Year	**Net Revenue**	**Avg Accounts Receivable**	**AC turnover**	1,88355393x
2021	32800	17072	1,9212746	x
2022	35200	21123	1,66642996	x
2023	38400	21787	1,76251893	x
2024	42100	20640	2,03972868	x
2025	46800	23079	2,0278175	x

Hikvision				AVG. AC Turnover
Year	**Net Revenue**	**Avg Accounts Receivable**	**Ac turnover**	2,493805x
2021	81400	28532	2,852937x	
2022	83100	31870	2,607468x	
2023	89300	37172	2,402346x	
2024	96500	41013	2,352912x	
2025	104200	46242	2,253363x	

Intelbras' accounts receivable turnover is approximately **twice as fast as that of its competitors!**

FCF / net income calculations

Potencial revenue increase with SMEs

SMEs	100%	6,4	BRL Mn
SMEs no monitoring systems	49%	3,136	BRL Mn
Intelbras penetration	10%	of SMEs with no monitoring systen	
		313,6	BRL thsd

ICT average ticket	3	thsd
Potencial incremental revenue	940,8	BRL MI

Intelbras SMEs common locations:

Northeast and Midwest mid-country:
mid sized cities undergoing rapid digitalization

Industrial belts:
Urban expansion areas within metropolitan regions (outskirts of são Paulo, Belo Horizonte and Curitiba)

Anti- dumping calculations

Consider ICT margin = fiber optics margin

2025

ICT margin = **25,66%**

Imported fiber cable ~ **$0,04 ***
National production fiber cable cost: ~ **$ 0,10/ m**
Sell price fiber cable (Brazil-base) **~ $ 0,1345 / m**
GAP price national x imported: **$ 0, 094/ m**

Anti- dumping aliquot $ 2,42/ kg

Cable weight proxy ~ 20kg/ m – 0,02 kg/m

Additional costs: $ 2,42 * 0,02 = $ 0, 0484/ m

Imported price after AD: $ 0,04 + $0,0484 = $ 0,0884/m

Competitive Advantage factor: $\frac{\text{Additional cost}}{\text{Gap price}}$ **= 51,22%**

Calculating Intelbras possible future market share:

Fiber Optics market share = ICT market share

Chinese brands: **~70% of fiber optics**

Intelbras market share : **~9%**

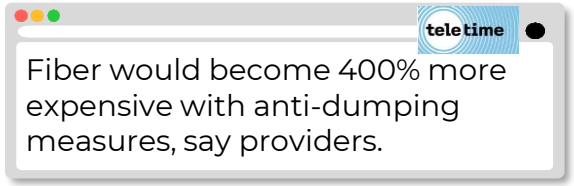

Future Intelbras market share : **(60% * 51,22%) + 9% = 30,7%**

Revenue growth: ~**241%**

ICT revenue = fiber optics revenue

2025 ICT revenue = R$ 977.190.000 — **9%**

2026E ICT revenue = R$ 3.333303666 — **30,70%**

Wifi 6 market size projection

	Yahoo Finance WIFI market size (USD bn)
