RD Saúde

Final Analysis

João Ruiz | João Santiago | Kaian Matos

Head: Pedro Bennecke

RD Saúde at a Glance

RD is the **largest** pharmaceutical retail company in the **country**, present in all 26 states and the federal district

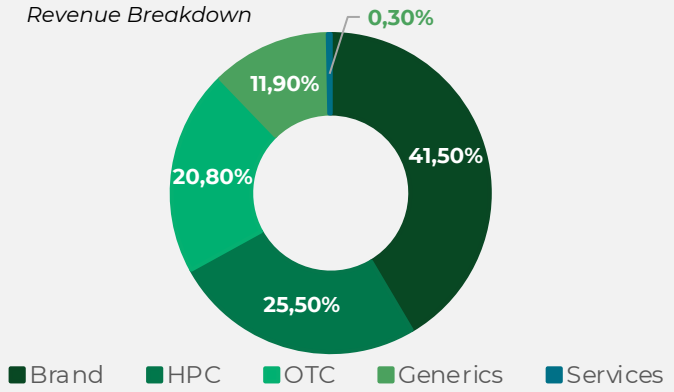

Company Overview

Raia Drogasil is a Brazilian company that operates in the **drugstore market**, as well as in the services and special medications industries. It was founded in 2011 as a result of a **merger** between two well-established companies: Droga Raia, **founded in 1905** in Araraquara, São Paulo, and Drogasil, **founded in 1935** in São Paulo city.

- **1905** — Droga Raia Foundation in Araraquara-SP
- **1935** — Drogasil Foundation in São Paulo- SP
- **2011** — Drogasil and Droga Raia Merge
- **2015** — 4bio Acquisition
- **2024** — Identity Visual changed to RD Saúde

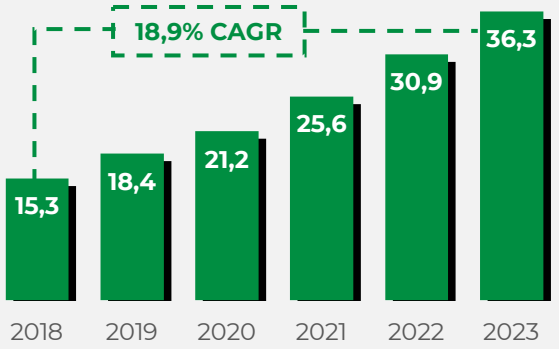

Business Segments

Revenue Breakdown

Gross revenue growth

*The sector is **highly resilient**, as the demand for its products has **low elasticity***

Operation Distribution

Market consolidation

*RD is currently focusing on **expanding its presence nationwide** and is working to establish itself as the **biggest player.***

Investment thesis

Sector in excellent growth conditions

The aging population boosts drugstore demand and spending, making the sector highly resilient to economic crises and less dependent on macro conditions, resulting in high competition

RD Saúde business: the power of Scale

How will the company become bigger in new areas like 4Bio and e-commerce in the future, and decrease the costs of SG&A, gaining margin and more profit, benefitiating from its competitive advantages, such as capilarity and scale.

Good business, but well-priced

Even having a very solid and strong business, with the expectation to improve even more, the stock price is already to high compared to the target price.

Porter Forces: Unveiling competitive advantages

A competitive industry with little identified long-term benefits for the participating companies, despite significant growth.

Not a Walk in the park

The presence of limited bargaining power and minimal differentiation between competitors intensifies the level of rivalry in the market.

How were these forces built?

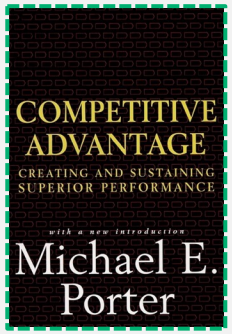

Threat of new entrants: 3 New players are restrained due to low product differentiation, capital requirements, switching costs, favorable locations, government subsidies, and economies of scale.

Rivalry: 4 High industry growth reduces competition, but low differentiation and **various competitors** increase it

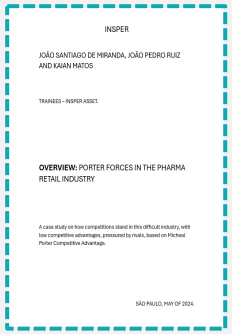

Substitutes: 2 Pharmacies are essential to the economy, but there is a risk of being partially substituted by supermarkets and other locations for OTC and HPC products.

Bargain power from buyers: 4 Buyers have access to vast amounts of information and represent a significant portion of consumer spending.

Bargain power from suppliers: 4 Due to the concentration of the industry, as well as the high demand for specific products, branding has become increasingly important.

"Rivalry occurs because one or more competitors either feel the pressure or see the opportunity to improve position." - Michael Porter

Porter Forces: Unveiling competitive advantages

A competitive industry with little identified long-term benefits for the participating companies, despite significant growth.

Not a Walk in the park

The presence of limited bargaining power and minimal differentiation between competitors intensifies the level of rivalry in the market.

How were these forces built?

Threat of new entrants: 3 New players are restrained due to low product differentiation, capital requirements, switching costs, favorable locations, government subsidies, and economies of scale.

All that was said only partially explains RD's growth, as other players also benefit. What sets RD apart from competitors and the market average?

"Rivalry occurs because one or more competitors either feel the pressure or see the opportunity to improve position." - Michael Porter

Proprietary study on competitive advantages

Investment thesis

Sector in excellent growth conditions

The aging population boosts drugstore demand and spending, making the sector highly resilient to economic crises and less dependent on macro conditions, resulting in high competition

RD Saúde business: the power of Scale

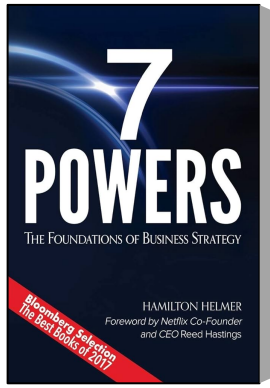

How will the company become bigger in new areas like 4Bio and e-commerce in the future, and decrease the costs of SG&A, gaining margin and more profit, benefitiating from its competitive advantages, such as capilarity and scale.

Good business, but well-priced

Even having a very solid and strong business, with the expectation to improve even more, the stock price is already to high compared to the target price.

The power of scale

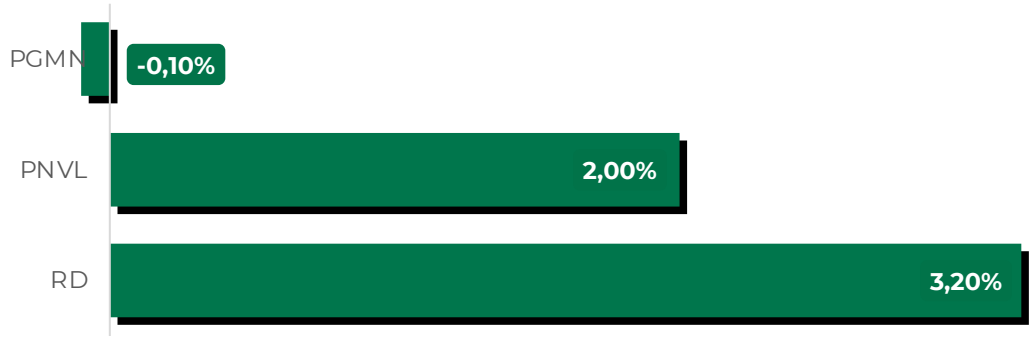

How RD Saúde uses its **scale** to have a **competitive advantage** in the pharmaceutical retail sector.

The Scale Economies chapter on "7 Powers" examines how businesses can lower unit costs with increased production, leveraging factors like spreading fixed costs, specialization, and bargaining power. It showcases how scaling up can yield significant competitive advantages and profitability across various industries.

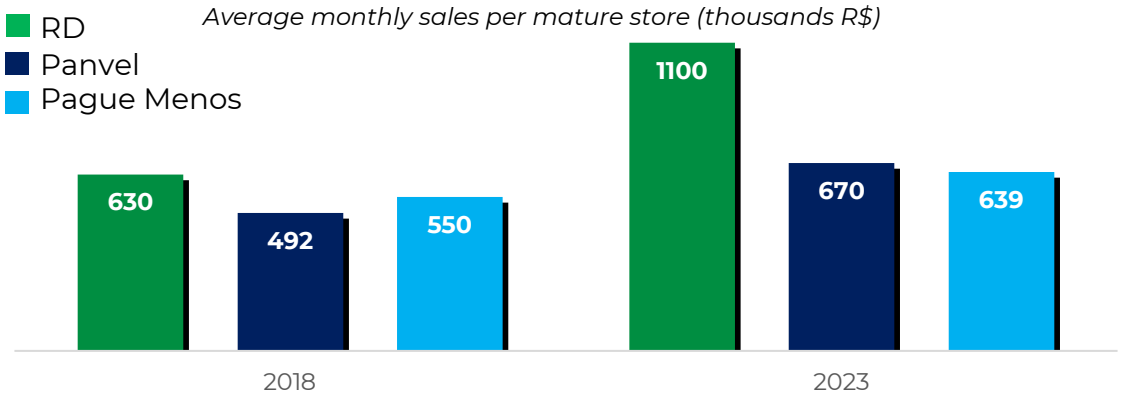

1st scale advantage: better margins

Net margin %

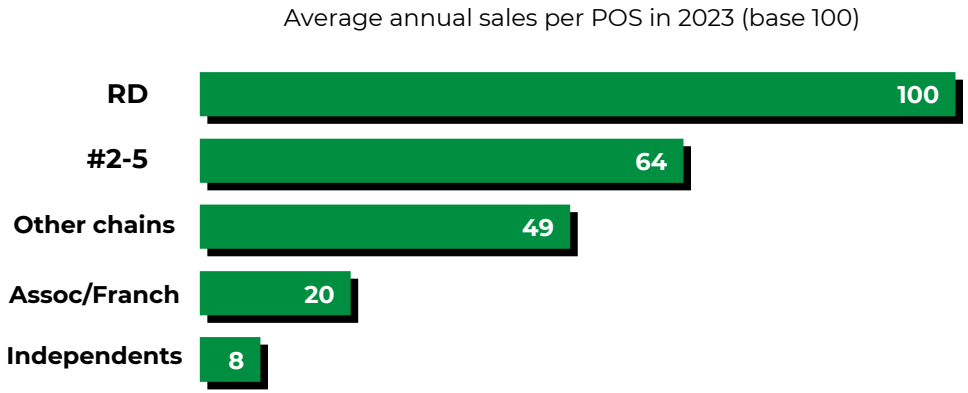

High productivity, low costs

*The **high productivity** per store of RD Saúde is a big advantage of scale that the company have to the other players*

RD Saúde as a reference of the market

*RD Saúde is the **biggest player** of the pharmaceutical retail in Brazil*

The advantages of being the bigger one

*The success of RD Saúde can be attributed to its **extensive scale**, making it the **leading** player in the industry*

First Mover advantage

*Droga Raia and Drogasil are **much older** than their competitors*

The primary way to justify the **competitive advantages** of RD is by examining their early adoption of **scale economics**, which hindered other players from entering the market.

Foundation of **Panvel**, a **merger** between Panits and Velts

Drogasil **IPO,** accelerating its growth

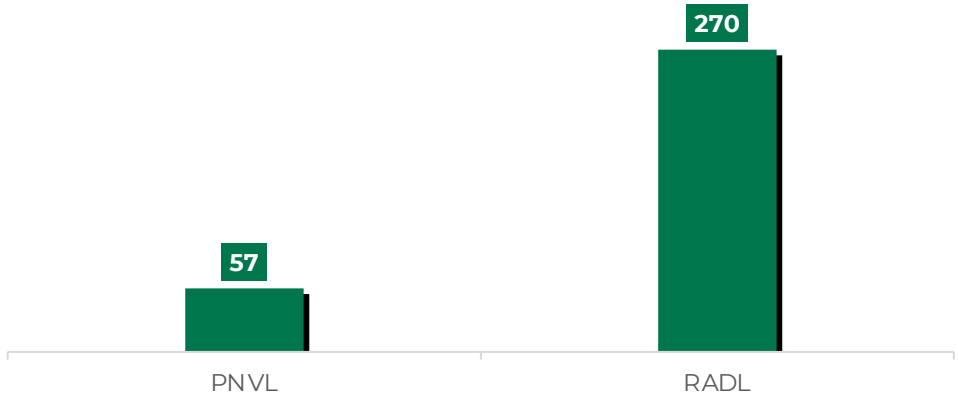

Foundation of **Pague Menos**

While the competitors were being founded, RD was offering investment opportunities by opening up its capital to investors and expanding its operation

Five times more openings...

RD Saúde opened 270 stores in one year, while Panvel only opened 57

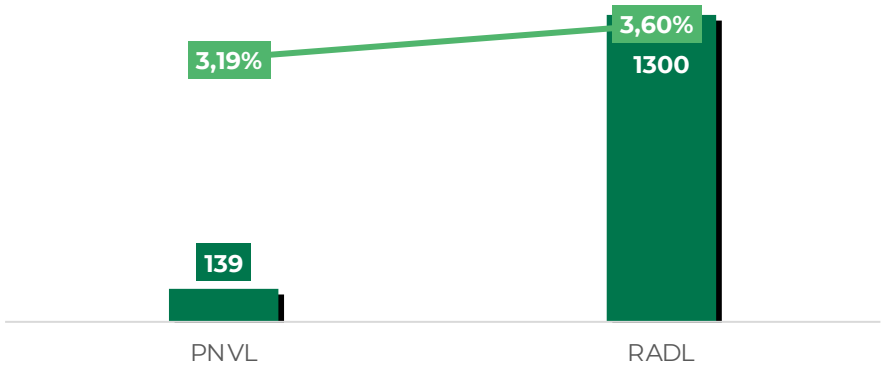

Number of openings

More capex, similar investment

*How the **difference of capex with the same %** of investment show the scale of RD Saúde*

Total capex (in millions) x % of Capex in the revenue

Capillarity: one of the strongest features of RD Saúde

*RD Saúde is **expanding** its stores across the **country**, increasing its **capillarity** more than its competitors.*

RD Saúde: a national brand

*They have a **strong brand** in all parts of Brazil, making them the only company with such a widespread presence.*

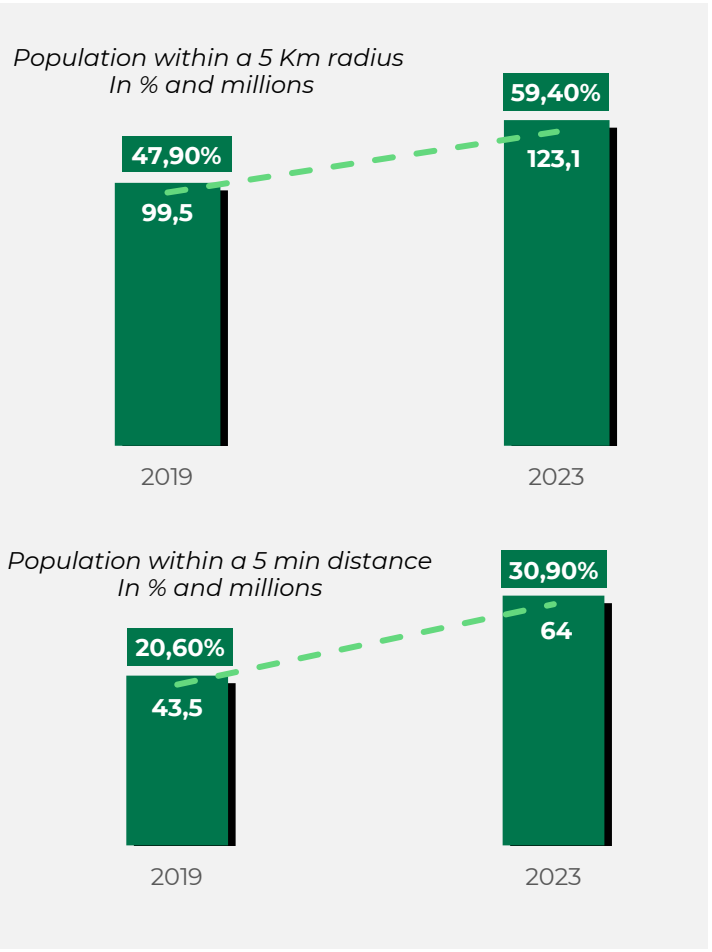

RD Saúde

- 2953 Stores
- 574 Cities
- 26 States
- 14 Distribution Centers
- Presence of 96,24% in +100k pop. cities

Close to everyone

*RD Saúde has a strong advantage since the **biggest motivation** for people to choose a drugstore is **proximity.***

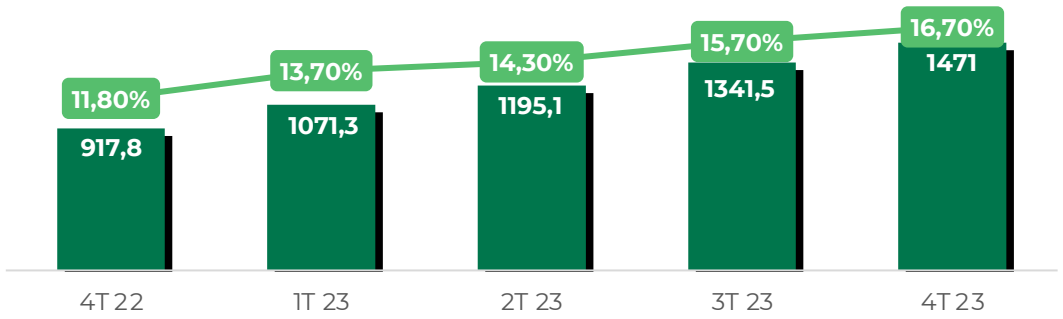

Stores as distribution centers: the pearl of RD e-commerce

Capilarity and scale gives RD an advantage, since their stores are overnight reloaded and are the main driver for digital sales

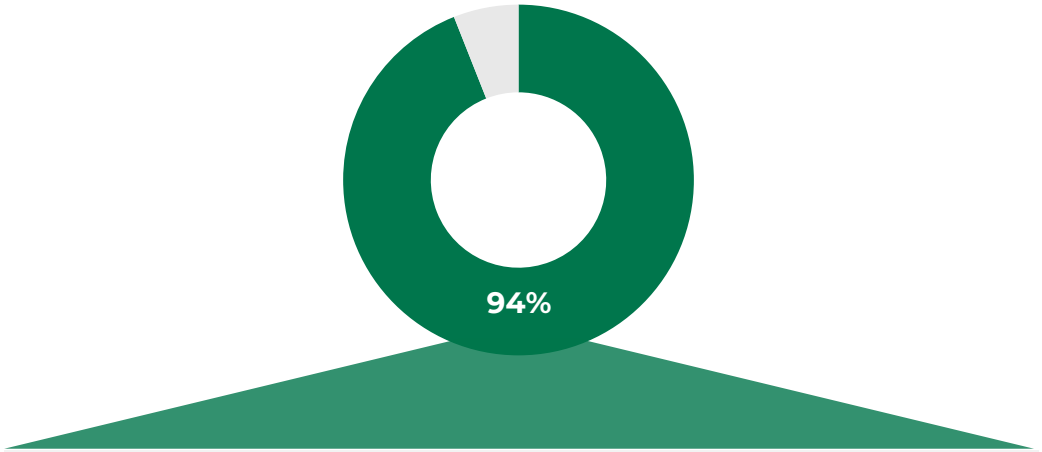

E-commerce becoming relevant faster

Sales e-commerce (in millions) x % Revenue

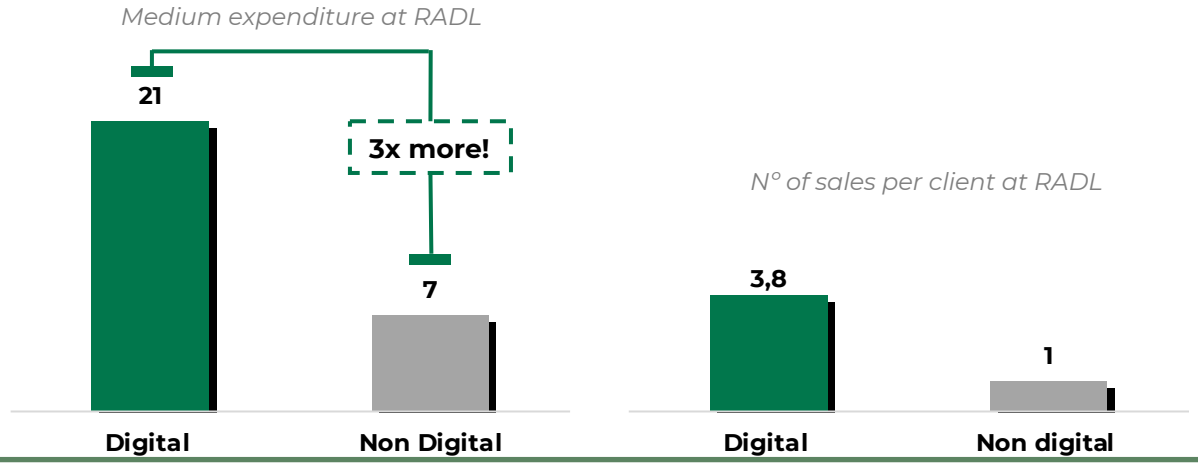

Most of deliveries are made by stores

% of deliveries departured from RD stores

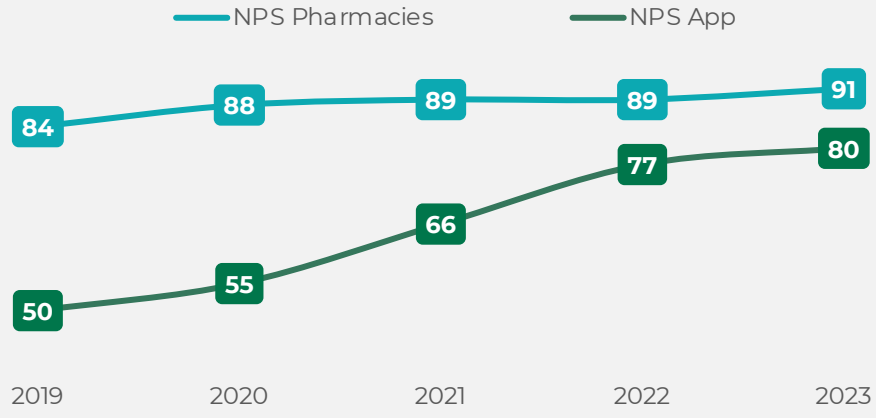

Why digital is importante: customer loyalty

Medium expentidure and No of sales per clients, respectively

Improving its Costumer experience (Cx)

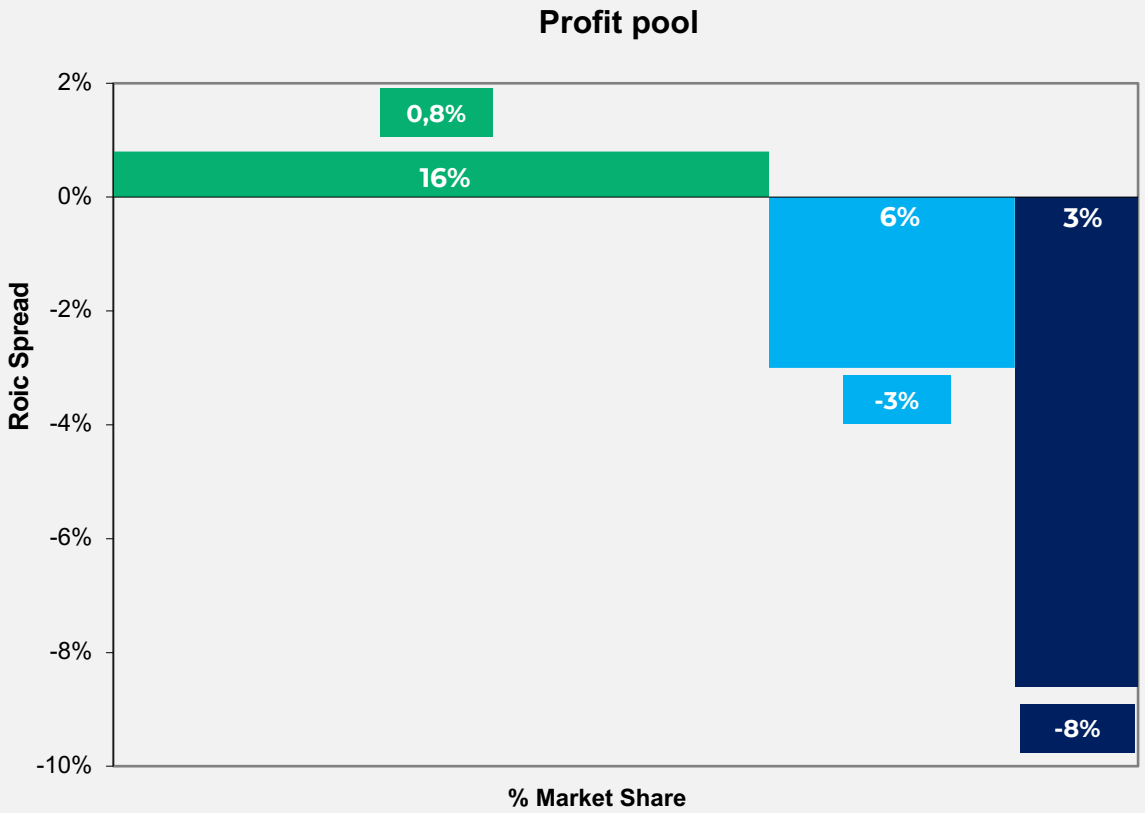

The Roic: how RD wins the profitability game

*RD's larger market share and **higher spread** of ROIC evidence its **scale advantage and domination***

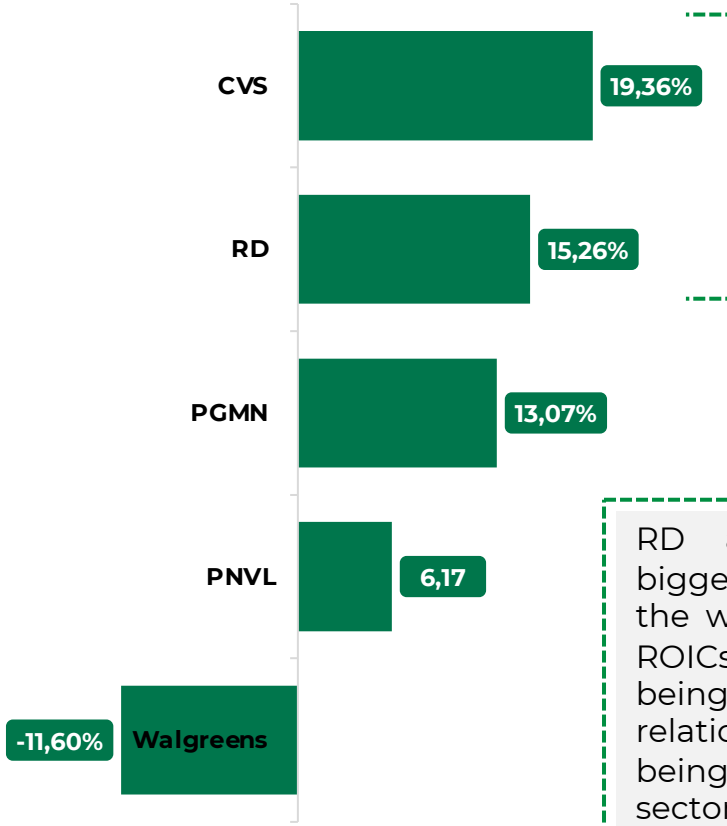

RD Saúde huge dominance

*RD currently holds a dominant market share that is almost **three times larger** than that of its closest competitor.*

Big players, big results: CVS on the lead

Roic 2023 comparison

RD and CVS are the biggest in each country, by the way, both have better ROICs than their peers, being possible to do a relationship between being big and win in that sector.

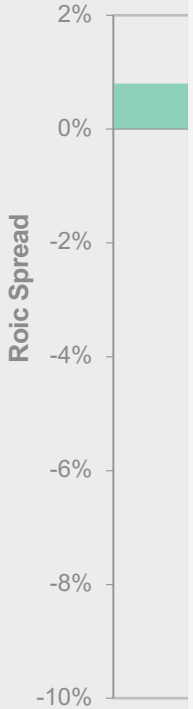

The Roic: how RD wins the profitability game

*RD's larger market share and **higher spread** of ROIC evidence its **scale advantage and domination***

The winner doesn't take all, but almost

RD and CVS, the major companies in its countries are the leaders in margins, not so in sales, demonstrating the importance of scale. **Margins** are the key here!

X

Maturation curves

Detailing the company revenue

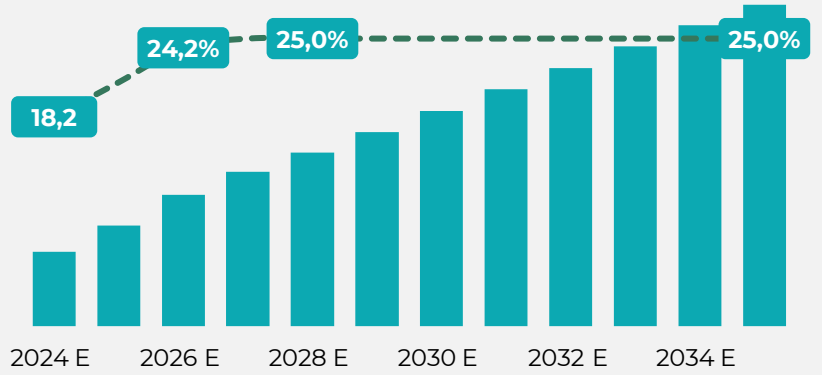

How will RD Saúde **increase and diversify** its revenue for the next years

RD Saúde is expanding in the digital sector and using this to its **capillarity advantage** to grow more.

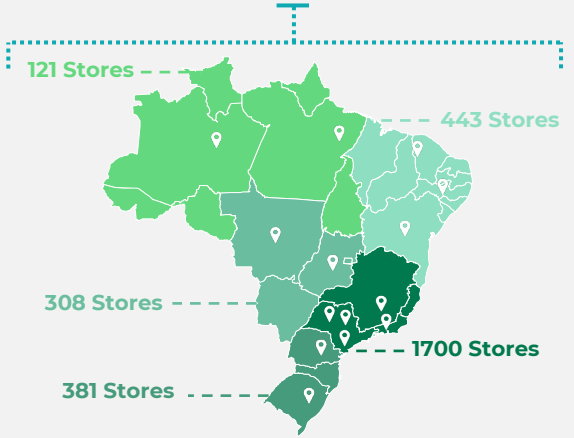

E-commerce Revenue

% of E-commerce revenue in total revenue

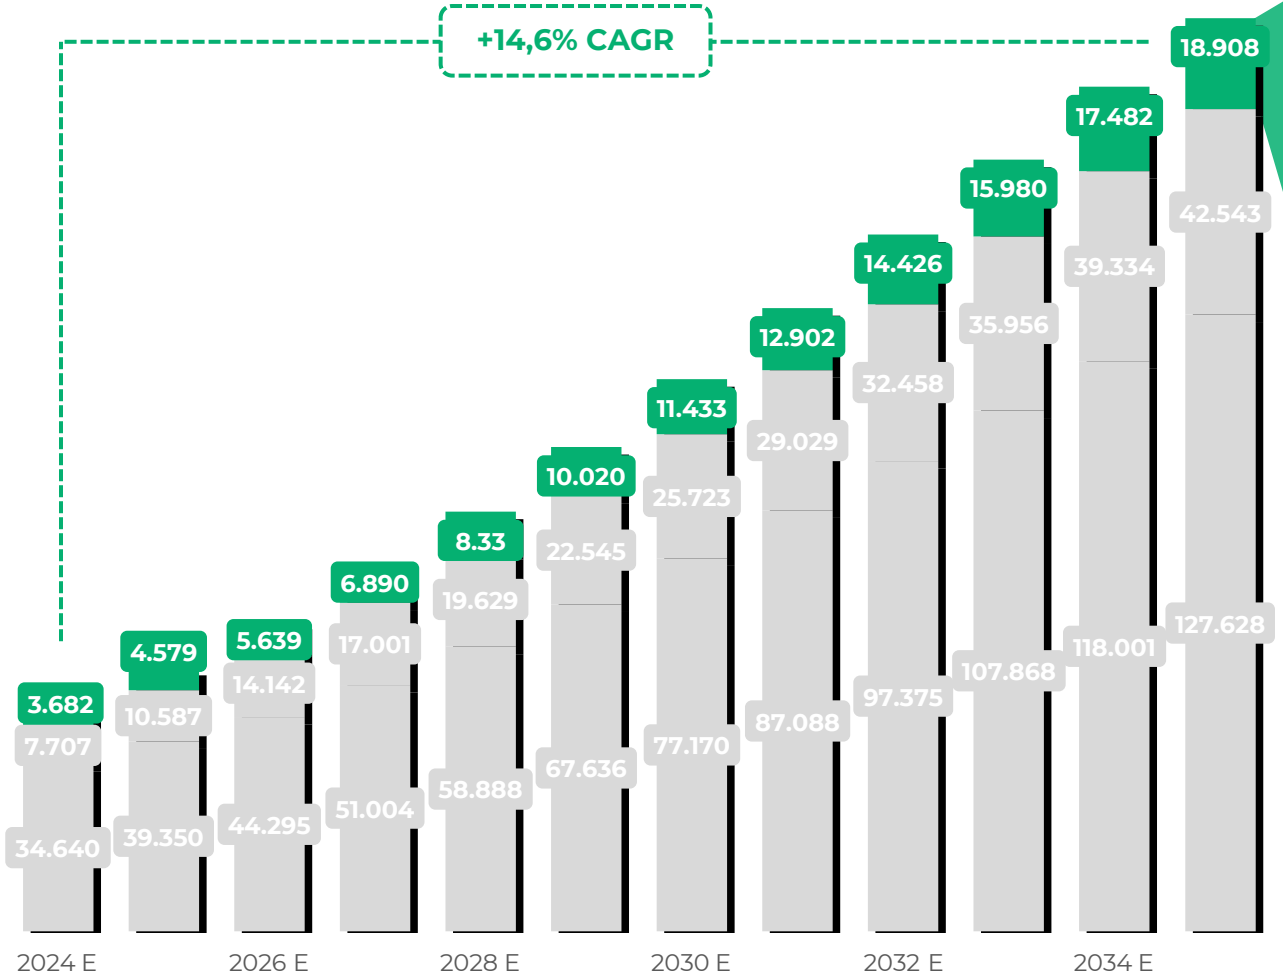

RD has advantages in the digital segment as stores are used as distribution centers.

Detailing the company revenue

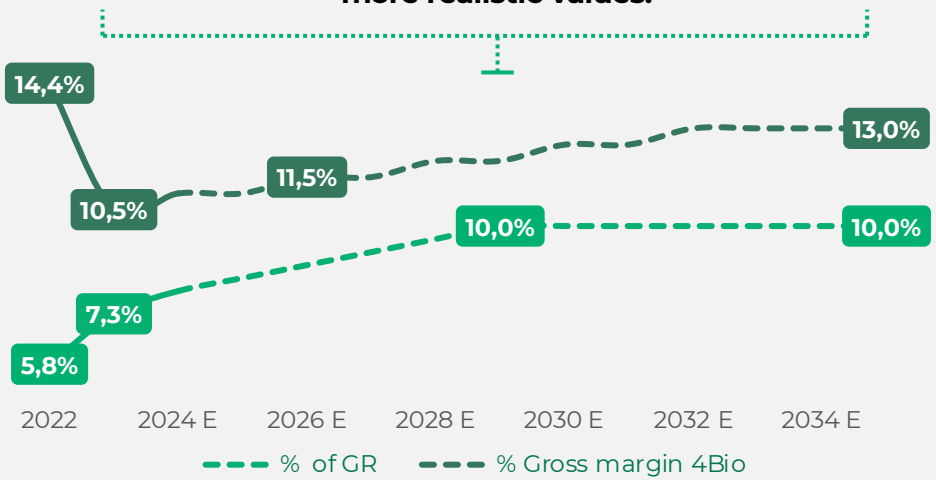

How will RD Saúde **increase and diversify** its revenue for the next years

4Bio will become more representative in the revenue to the top of 10%, even with **worse margins**

4bio Revenue

Due to fiscal benefits, 4bio used to have better margins. However, we adjusted our projections to more realistic values.

NEOFEED

RD will finish buying 4bio and acquire 100% of control

Fev24

Increasing its value in the future

How the company's growth will be reflected in **its revenue** and **market share** over the years.

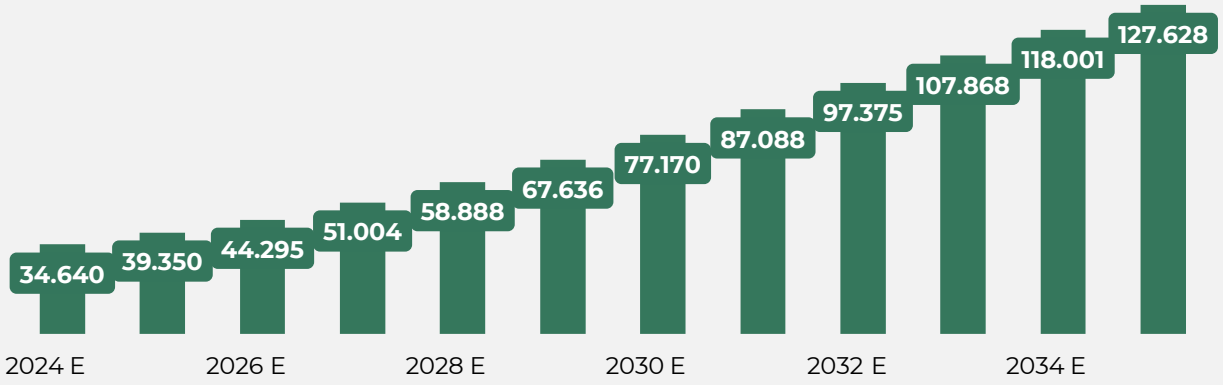

A growing market

Brazillian Pharmaceutical Retail Market (R$ Millions) x % of Growth per year

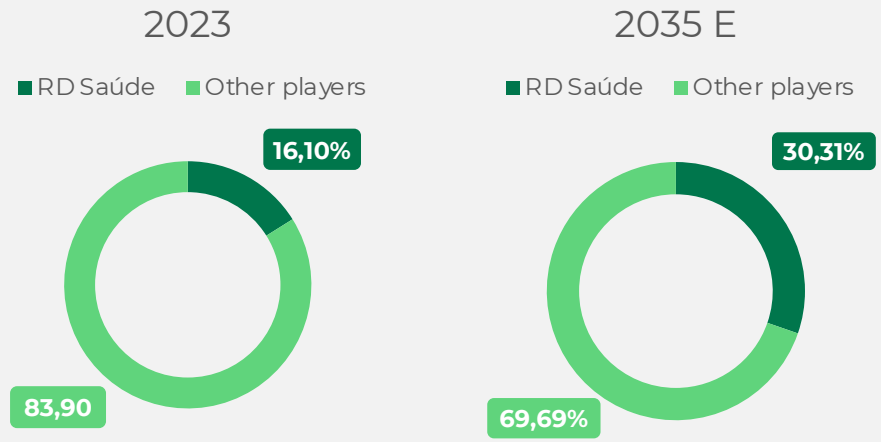

Gaining more, **dominating** more

Expected total RD drugstores revenue in the next years (million BRL)

Expected % of RD Saúde Market Share in the future

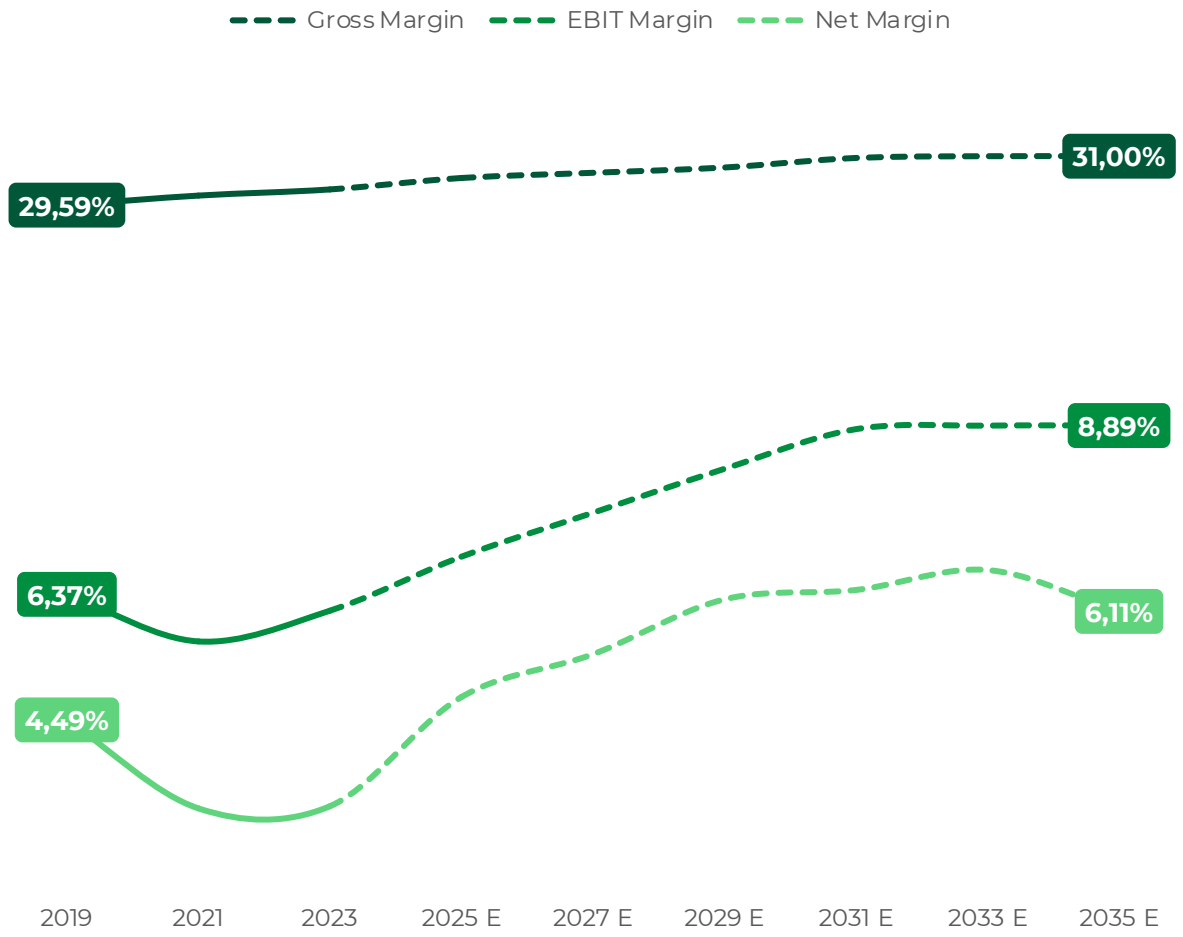

Margins Trajectory

*We expect RD Saúde to **slightly increase its margins**, despite operating in a sector with tight margins.*

Looking at the margins

Gross, EBIT, and Net Margins during our projection

COGS

In projections, the gross margin is expected to slightly improve due to increased bargaining power and stabilized prices in new areas

Sales

Due to its effective business model, there will be an increase in productivity per store and consequently, the proportion of sales expenses will decrease

G&A

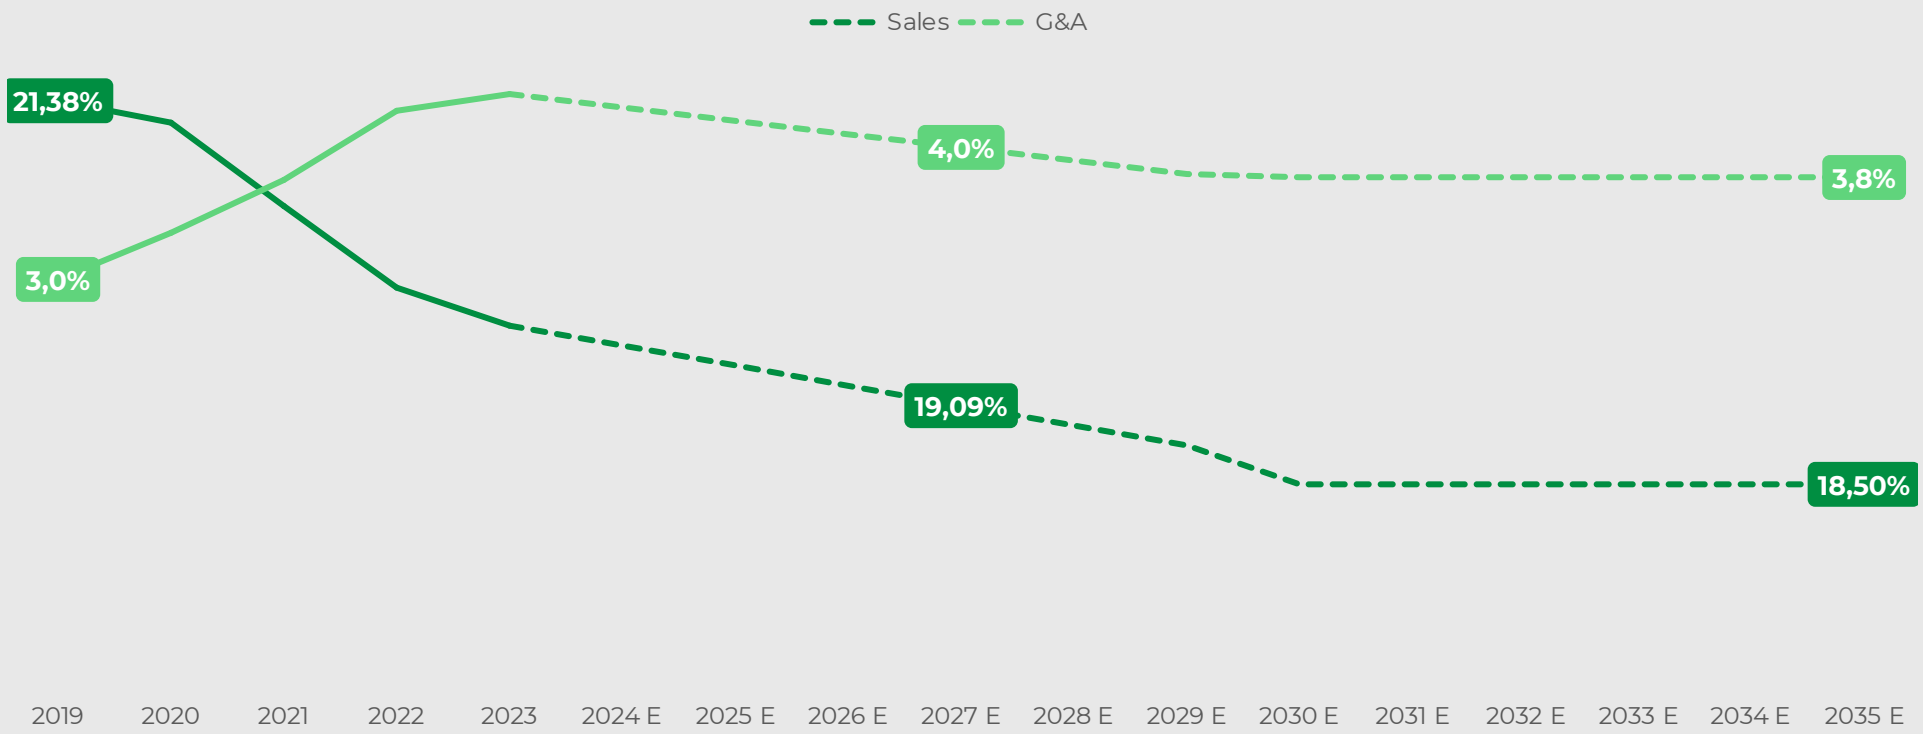

RD IR states that G&A expenses will likely decrease as a percentage of revenue in the next years

Margins Trajectory

We expectate that RD Saúde may slightly increase its margins, despite operating in a sector with tight margins.

A better look at SG&A

SG&A expenses as a percentage of revenue

Getting the **D&A bigger** in the future

Depreciation and Amortization Expenses (R$ Millions)

Looking at the **IR closer**

IR Expenses (R$ Millions)

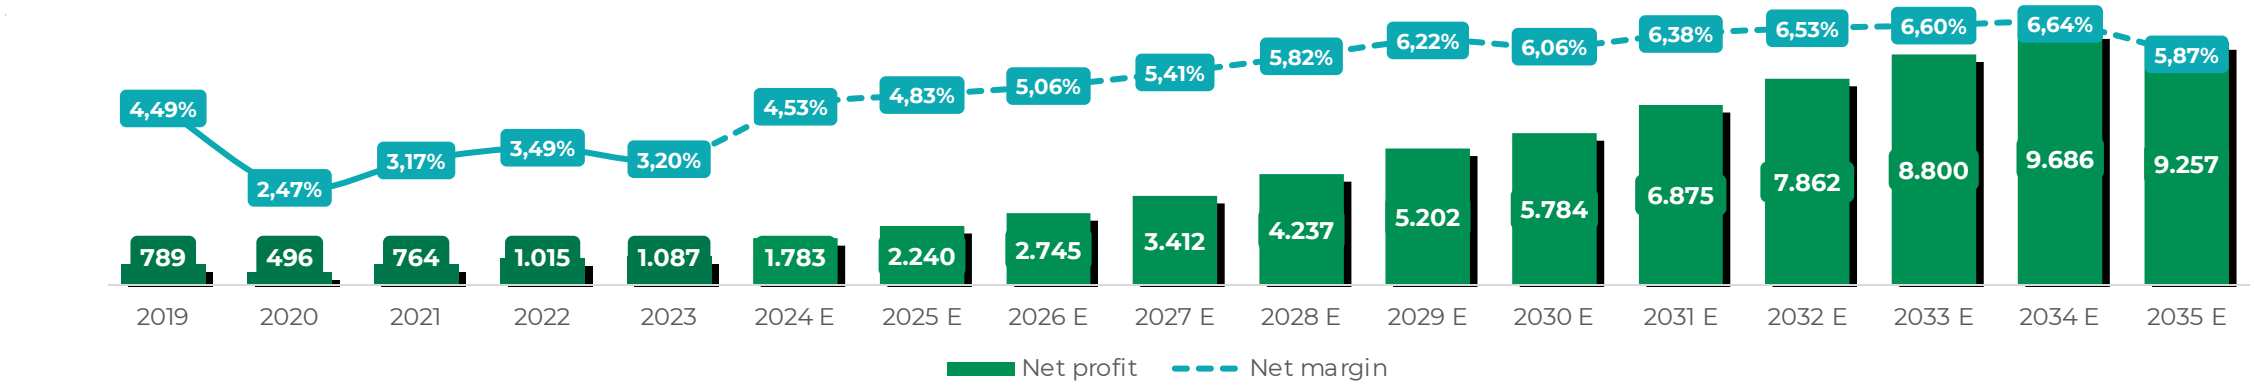

The results: increasing profits and better margins

We believe that RD will be able to increase its payments to keep the equity estructure and benefit the families involved

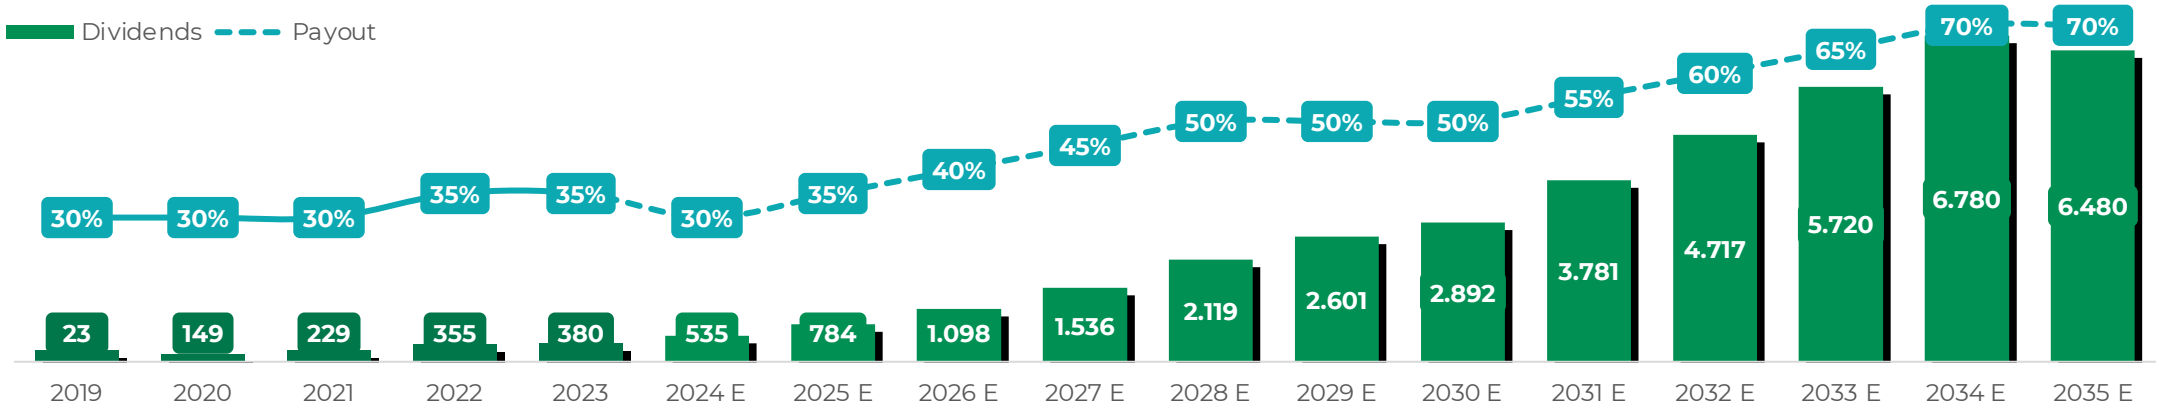

Scale Advantage: **RD scale economies will benefit its margins**

Net profit x Net margin

Increasing dividends: RD will increase its payout so they can maitain its capital structure

Total dividends value x Payout

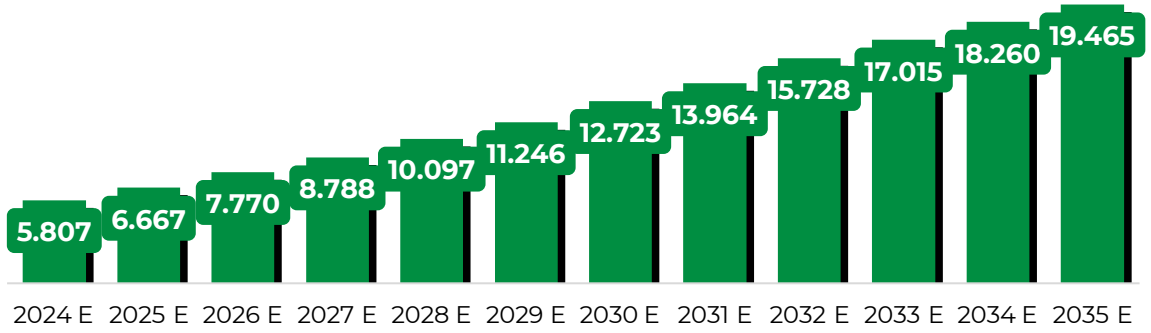

Cash Cycle and Working Capital

*A cash-requiring company in the short term, **due to the nature of its operation**, but a cash cow in the long run*

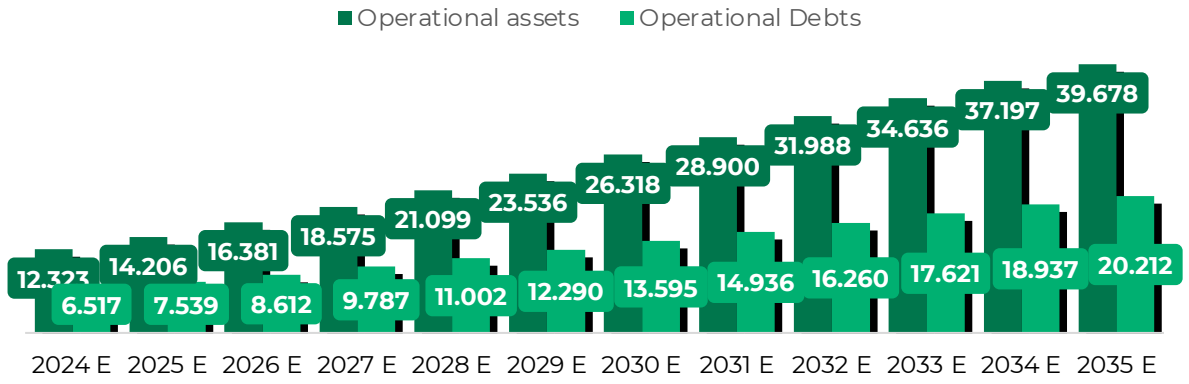

Growing revenue, so as cash necessity

RDs working capital in millions (BRL)

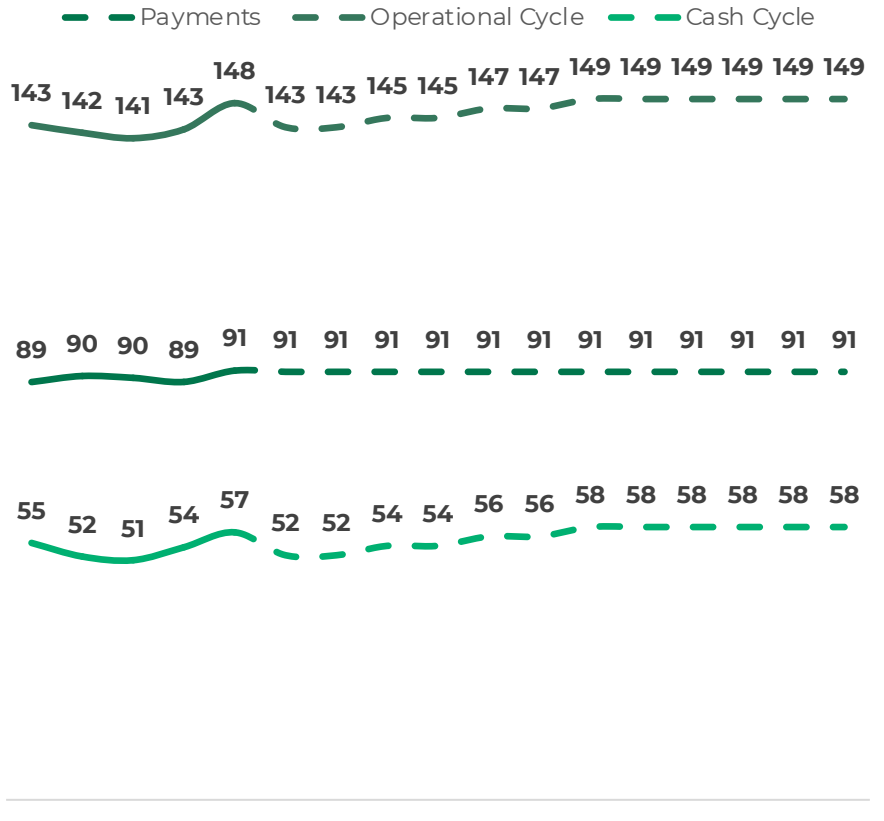

Consistently **increasing** its operational **assets**

Operational assets x Operational Debts (in millions BRL)

We see a constant cash cycle in the long run

RDs cash cycle, in days

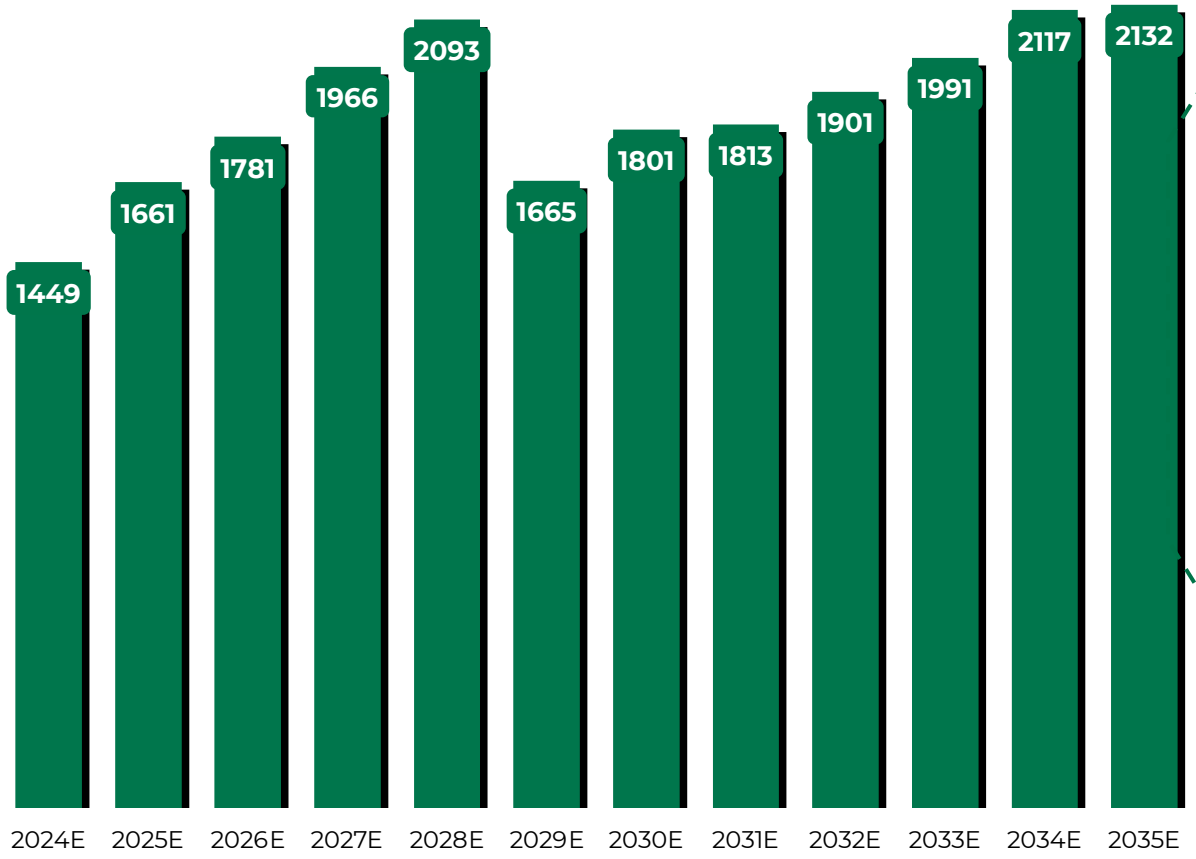

Breaking down the CAPEX

*What is the **cost of opening a new store** and keeping it running*

Huge expansion needs investments on Capex

Total CAPEX Expenses projections during the next years

Total CAPEX Expenses in million BRL

CAPEX Premises

Logistics

Due to recent years' values, we decided to maintain **it as 0,5%** of the revenue trending to 0,3% on the perpetuity, looking for scale gains.

Maintenance

Due to its constancy in cost proportionate to the revenue, we decided to **maintain it as 0,5%** of the revenue for the next years.

Technology

After considering its consistent **cost relative to revenue**, we have decided to maintain it as 1% of the revenue for the next 5 years, and then reduce it to 0.5%, **given the significant investment already made.**

Subsidiaries

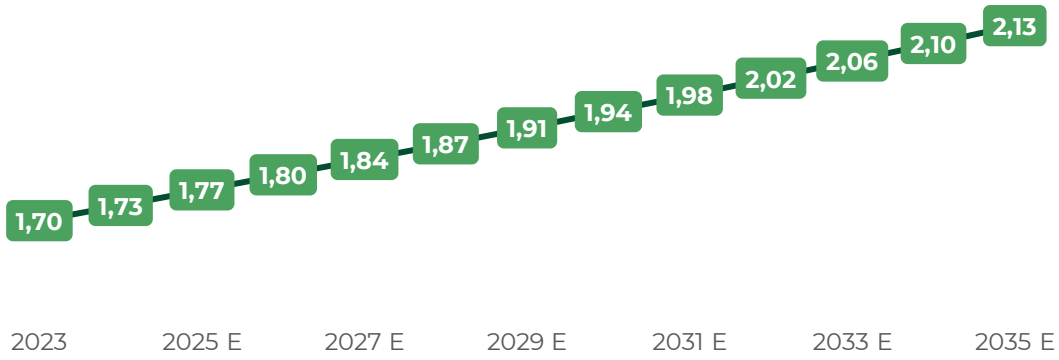

Due to its close values in cost proportionate to the revenue, we decided to take de average and **maintain it as 0,5%** of the revenue for the next 5 years and then **reduce it to 0,2%**

Looking closer to the Expansion CAPEX

We **adjusted** the capex per store to the **expected inflation.** Its **cash flow** can **finance** most of **its expansion**

More capex per store

Capex of opening a new store (R$ Millions)

Total Expansion CAPEX calculate

Opening cost of one drugstore

X

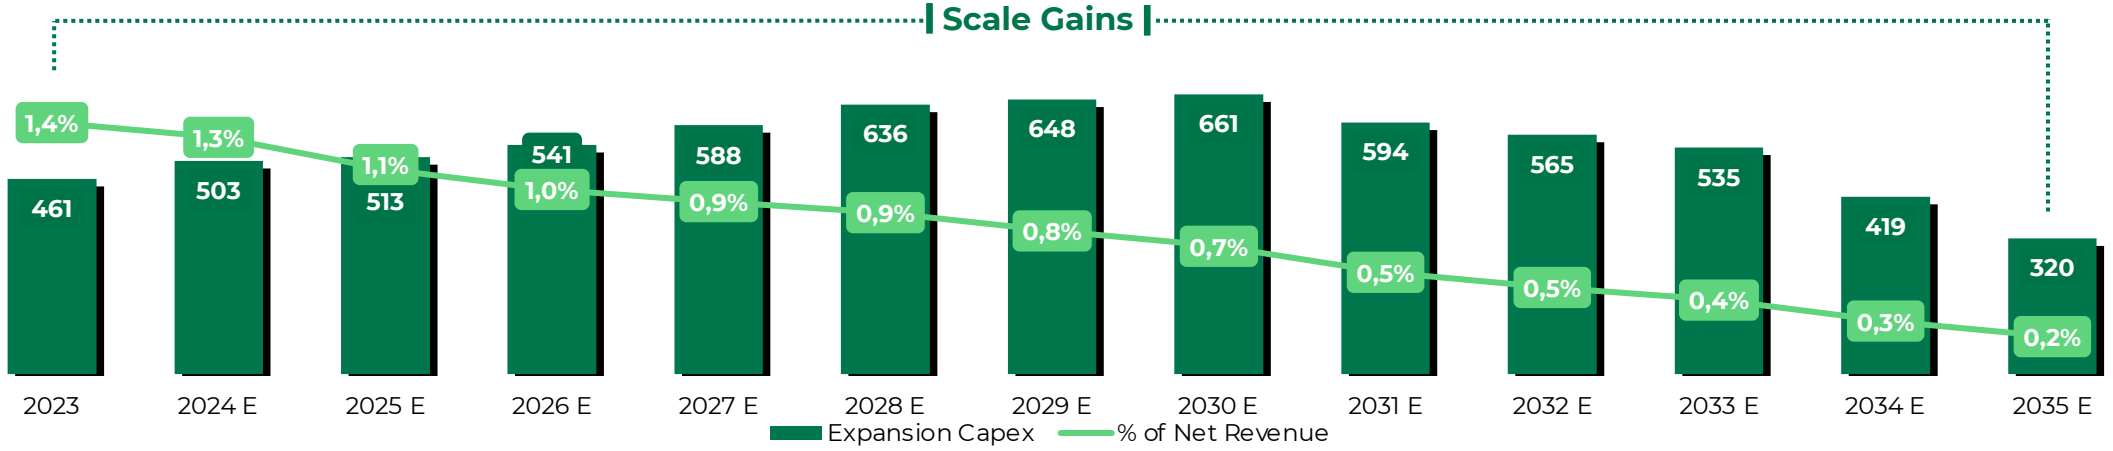

Quantity of drugstores opened in that year

=

Total Expansion CAPEX in each year

Proportionally reducing expansion costs in the future

7202,40	17,99%	19,20%	20,34%	21,43%	22,47%	23,47%	24,43%

Dealing with uncertainty: Playing dice in Monte Carlo

We did a Monte Carlo simulation to stress some variables that we' weren't certain of, to see the results of it, such as Wacc, G and the gross margin, which are the most sensitive to our company evaluation

Premisses

Wacc: 12% - 17%
Taking into riskier situations

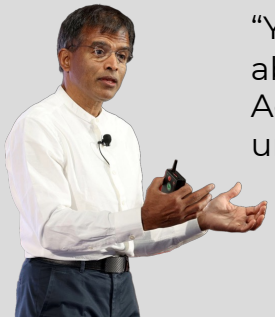

G: 2% - 6%
Dealing with different IPCA Scenarios

Gross Margin: 29% - 34%
Considering changes in pricing power

Results

There are very few cases with inconsistent results, so there isn't a clear margin of safety, even with uncertainty.

Only **10%** of the cases with more than **25% of upside**

"You will never be certain about your expectations: Accept risk and uncertainty"

- Aswath Damodaran, Professor at Stern NYU

Sources: RD IR

Stressing multiples: clearly, we stick with HOLD

RD is very sensible to key variables and we don't see a clear upside on it. But, we can't state a Sell, since the **quality of the business!**

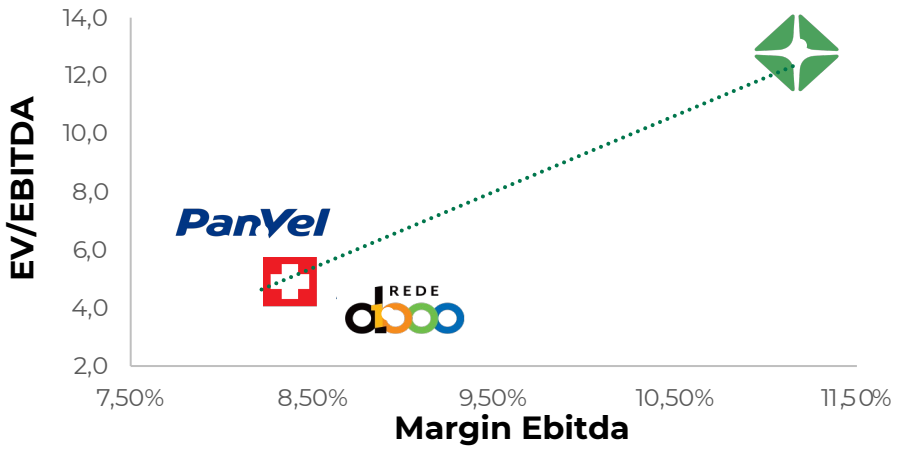

Wacc and G can change the upsides significantly

Sensitivity table for WACC and Perpetuity growth

WACC \ G	2,5%	3,0%	3,5%	4,0%	4,5%	5,0%	5,5%

RD in line with its price. DVFM the cheapest.

The tendency for EV/EBITDA and margins

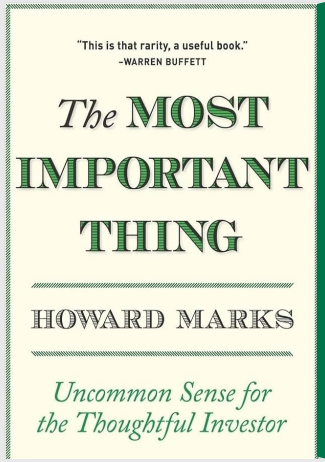

Football Field

We don't see a good risk x return here

Stressing multiples: clearly, we stick with HOLD

We would be shareholders! But not at this price

"First level thinkers looks for simple formulas and answers, When the second level ones do know that investing is the antitheses of simplicity."

- Howard Marks, Oaktree capital founder.

When we think about RD, clearly might be a sell. But other factors made we stick with **HOLD.**

i) Always "expensive" - 2nd level thinking – "It's expensive and might stay that way"

ii) Good Governance and capability to execute – Always surprising positively

iii) Liquidity and foreign investor shareholders - The Only Pharma retail company which international investors can allocate their capital, having 50% of its capital with them

Risks Matrix

Despite the longevity and lack of cyclicality of the sector, there are some risks that can affect the revenue and development of players.

Expansion Risks

E1 **Growing Pains:** the company relies on an impeccable management to grow with sustainable margins, a good number of store openings and an increasing productivity per store.

E2 **Stronger Competition:** The majority of the players were in a dificult financial situation, except for Raia Drogasil and Panvel, but they can improve its management and became more competitive. Furthermore players like CVS and Wallgreens can come to the brazillian market.

Sectorial Risks

S1 **Reduction of Subsidies:** With the MP 1185, all the sector may face na increase of the tax rate, affecting margins, that are already low and hard to manage

S2 **Slower market growth:** the market consistenly grew at a 12% rate, but that might change in the future, as the demografic Pyramid changes. Increasing competition

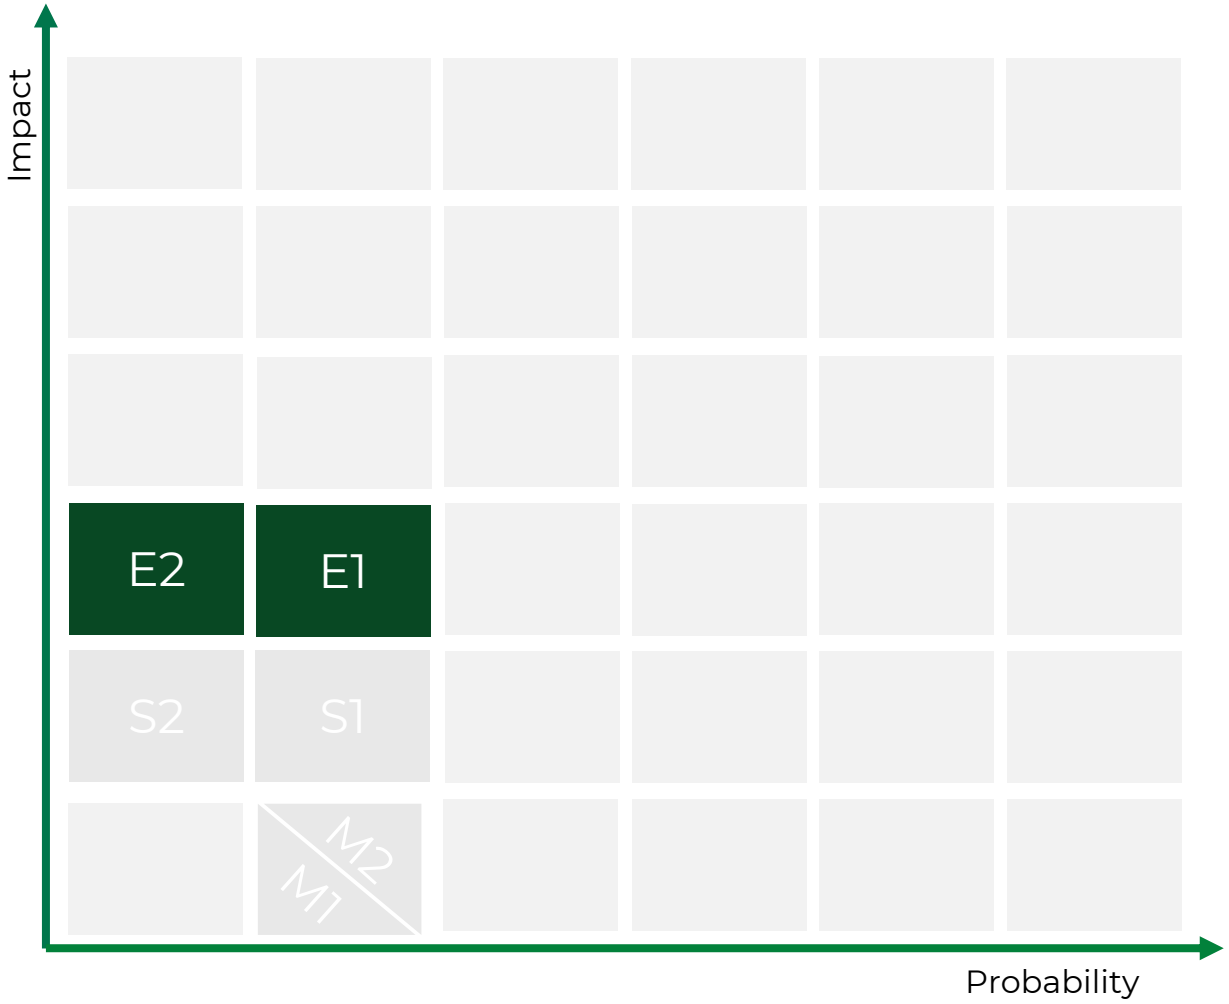

Macroeconomics Risks

M1 **Interest rates:** A higher level of interest rates for a long time can reduce the store openings pace and the company growth, or a higher cost to expand, elevating its financial expenses.

M2 **Inflation**: More variation on IPCA rates might affect the margins in the short term and change the product mix

Risks Matrix

Despite the longevity and lack of cyclicality of the sector, there are some risks that can affect the revenue and development of players.

Expansion Risks

E1 **Growing Pains:** the company relies on an impeccable management to grow with sustainable margins, a good number of store openings and an increasing productivity per store.

Risks Matrix

Despite the longevity and lack of cyclicality of the sector, there are some risks that can affect the revenue and development of players.

Expansion Risks

E1 **Growing Pains:** the company relies on an impeccable management to grow with sustainable margins, a good number of store openings and an increasing productivity per store.

E2 **Stronger Competition:** The majority of the players were in a dificult financial situation, except for Raia Drogasil and Panvel, but they can improve its management and became more competitive. Furthermore players like CVS and Wallgreens can come to the brazillian market.

Sectorial Risks

S1 **Reduction of Subsidies:** With the MP 1185, all the sector may face na increase of the tax rate, affecting margins, that are already low and hard to manage

S2 **Slower market growth:** the market consistenly grew at a 12% rate, but that might change in the future, as the demografic Pyramid changes. Increasing competition

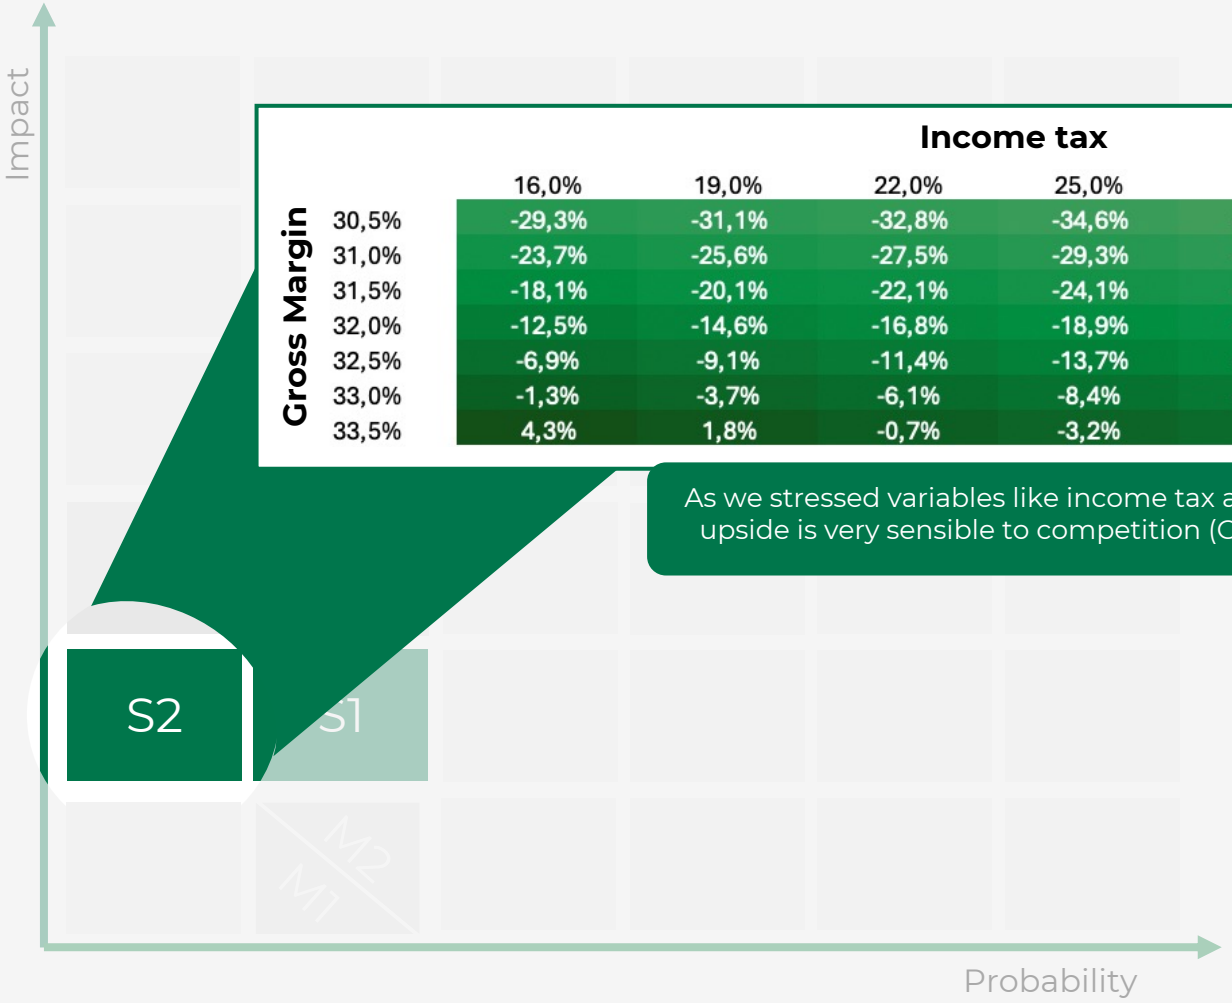

Macroeconomics Risks

M1 **Interest rates:** A higher level of interest rates for a long time can reduce the store openings pace and the company growth, or a higher cost to expand, elevating its financial expenses.

M2 **Inflation**: More variation on IPCA rates might affect the margins in the short term and change the product mix

Risks Matrix

Despite the longevity and lack of cyclicality of the sector, there are some risks that can affect the revenue and development of players.

Income tax

Gross Margin	16,0%	19,0%	22,0%	25,0%	28,0%	31,0%	34,0%
30,5%	-29,3%	-31,1%	-32,8%	-34,6%	-36,3%	-38,1%	-39,8%
31,0%	-23,7%	-25,6%	-27,5%	-29,3%	-31,2%	-33,1%	-35,0%
31,5%	-18,1%	-20,1%	-22,1%	-24,1%	-26,1%	-28,1%	-30,1%
32,0%	-12,5%	-14,6%	-16,8%	-18,9%	-21,0%	-23,2%	-25,3%
32,5%	-6,9%	-9,1%	-11,4%	-13,7%	-15,9%	-18,2%	-20,5%
33,0%	-1,3%	-3,7%	-6,1%	-8,4%	-10,8%	-13,2%	-15,6%
33,5%	4,3%	1,8%	-0,7%	-3,2%	-5,7%	-8,3%	-10,8%

As we stressed variables like income tax and gross margin we could see that the upside is very sensible to competition (Gross margin) and less to the subsidies

Expansion Risks

E1 **Growing Pains:** the company relies on an impeccable management to grow with sustainable margins, a good number of store openings and an increasing productivity per store.

he majority of the players were in a dificult Raia Drogasil and Panvel, but they can became more competitive. Furthermore ts can come to the brazillian market.

Dirt cheap: the rise of generics

*Brazil **structurally struggles to become a rich** country and the generic pharma is the solution to provide accessibility*

Industry overview

*The **generic industry** consists in producing drugs with the same active ingredient as the so called reference medicines, but for a **lower price** and without a brand.*

"Profitability with accessability"

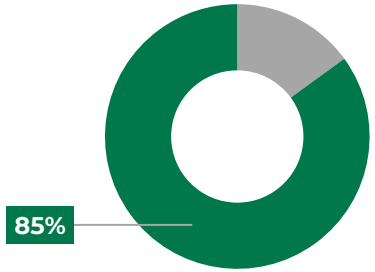

CIMED

– João Adibe Marques, CEO of CIMED, the 4th largest generic pharmaceutical industry in Brazil

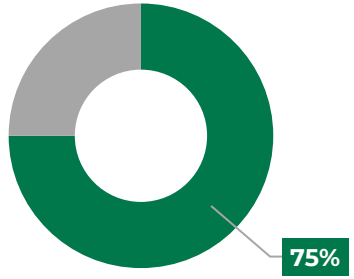

Government spending and adoptability increasing

"Farmácia Popular" drives the generics sales and the population is adopting more

% of the type of medicines provided by "Farmácia Popular"

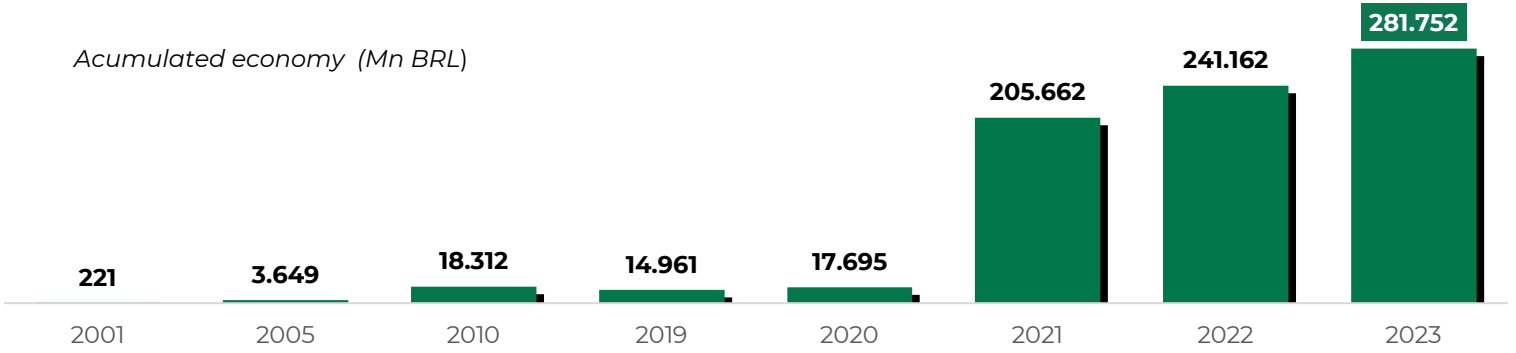

% of the population that bought or frequently buys a generic

Value Generation to the consumers

The accumulated economy reached 280bn, revealing the **significance to the pocket** of Brazilians

Acumulated economy (Mn BRL)

RD Ads: A new way to monetize pharma

RD Saúde has increased its efforts in this segment as an opportunity to expand revenue.

RD Saúde sent you a message:
"RD Ads began in 2017, but we only intensified our efforts in 2021."

RD ADS

RD Ads is the retail media project that helps advertisers (and itself) connect with their target audience intelligently.

There are two types of advertising

Digital: which includes messages, emails, and online ads.

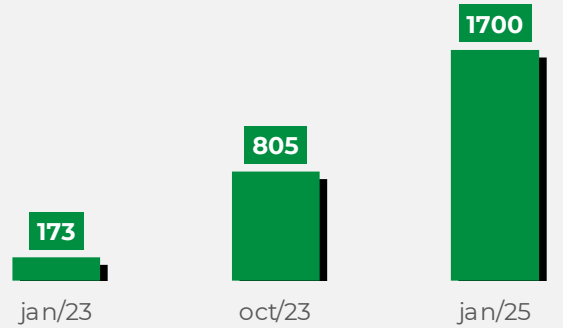

Physical: which appears on screens in drugstores

Diaper Case

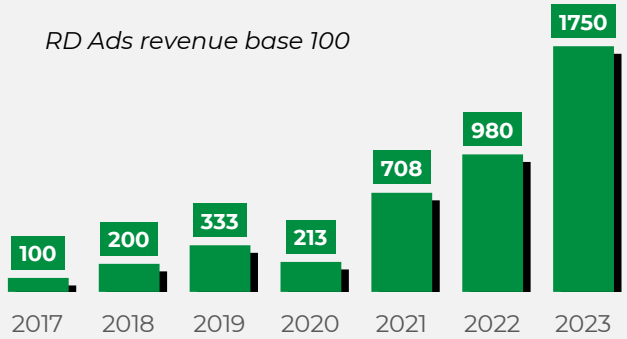

RD targeted potential diaper customers and sent them offers via email and messages.

Customers: 11k
Investment: R$ 70k
Revenue: R$ 841k

Number of pharmacies with RD Ads Screens

RD Ads revenue base 100

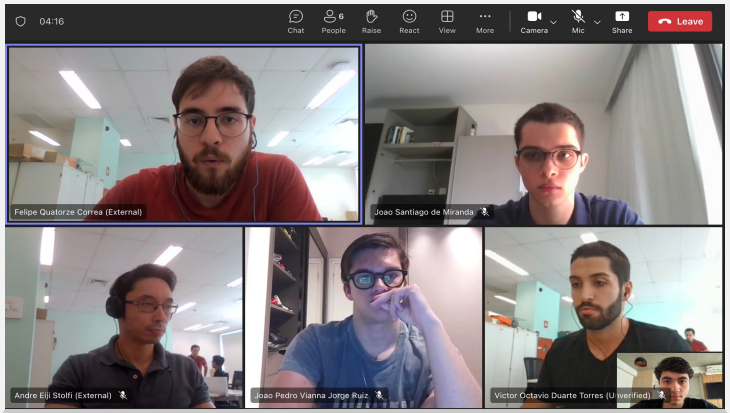

The rebrand of RaiaDrogasil to RD Saúde

How the company changed its name to align with its new goal of becoming a healthcare hub

Sticking to the plan

RD Saúde plans to transform drugstores into health hubs by expanding their services portfolio with more exams and tests.

"By 2030, we want to be the group that contributes most to a healthier society in Brazil".

- IR RD Saúde

RD Saúde rebranding

After the merger of Droga Raia and Drogasil, the company aims to expand its portfolio and improve customer relationships by offering more services at its drugstores.

Droga Raia

DROGASIL

RaiaDrogasil S.A.

RDsaúde
por uma sociedade mais saudável.

"At RD Saúde, the plan is to show that the customer journey goes far beyond the pharmacy. Our focus is to transform pharmacy into a **healthcare ecosystem**."

Marcílio Pousada, CEO of RD Saúde

How prices are modeled in drugstores

The government, through the CMED, controled by Anvisa, **dictates the prices**, so as in the rest of the world.

Price Barriers: limits retail and industry gains

CMED is the Regulation comitee of the medicines market and PVMP = percentual variation of the price of the medicines

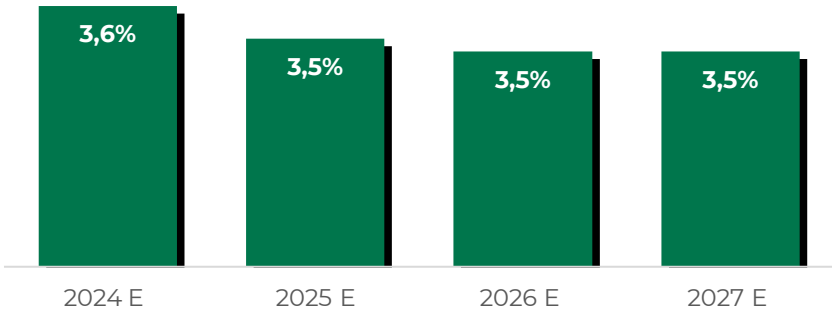

IPCA – X + Y + Z = PVPM

- **Intrasector** relative **ajustments**
- **Sector** relative **ajustments**
- Estimated gains of **productivity**
- Last year **inflation**

Less inflation means less variation on margins

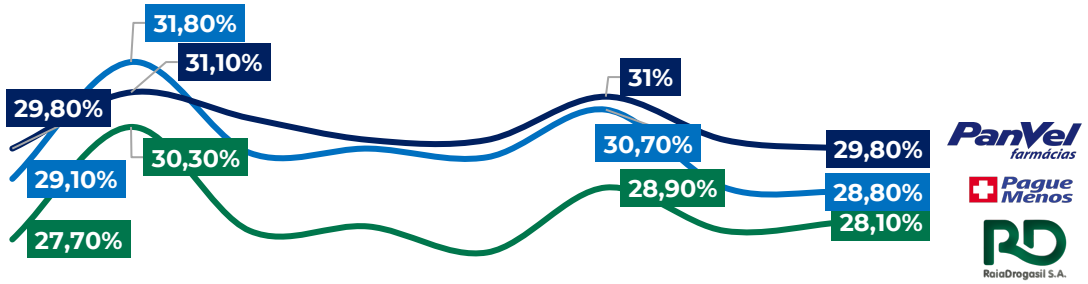

With a smaller inflation projected, the industry will have less margin variation

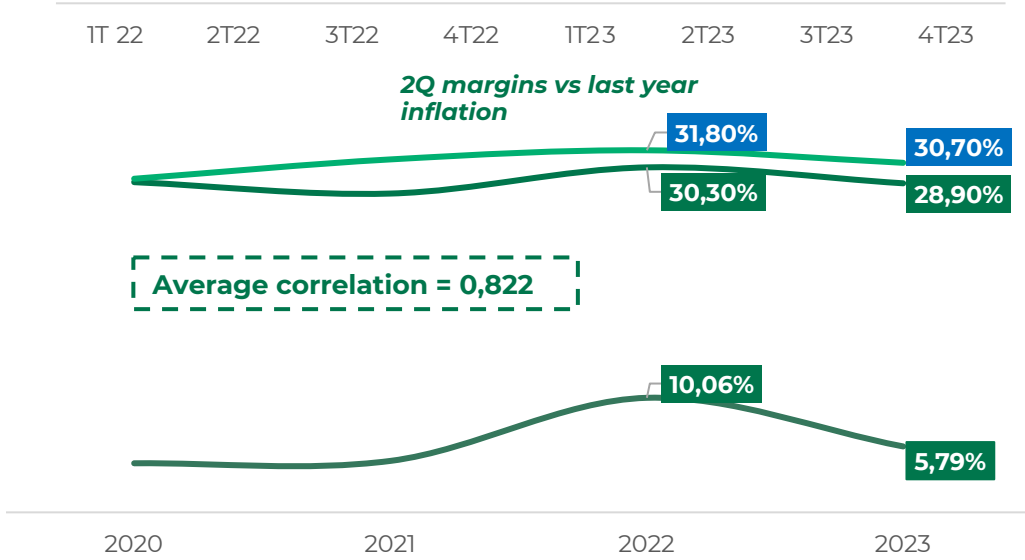

Expected inflation of the next years

Pharma prices dynamics:

The CMED adjustments have a significant impact and correlation with the margins of the **2nd quarter**

More than just a common pharmacy

How the Pharmaceutical industry are diversifying its product portfolio and becoming healthcare centers

2009 — Pharmaceutical services legislation

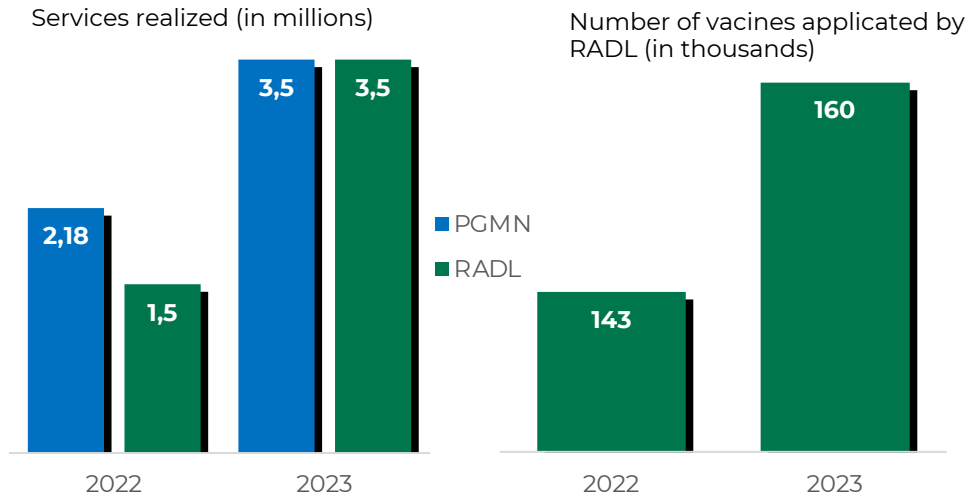

2017 — Vaccination in pharmacies

2020 — Covid tests in pharmacies

2022 — Teleinterconsulation

2023 — Health Hubs in pharmacies

The number of services is growing quickly

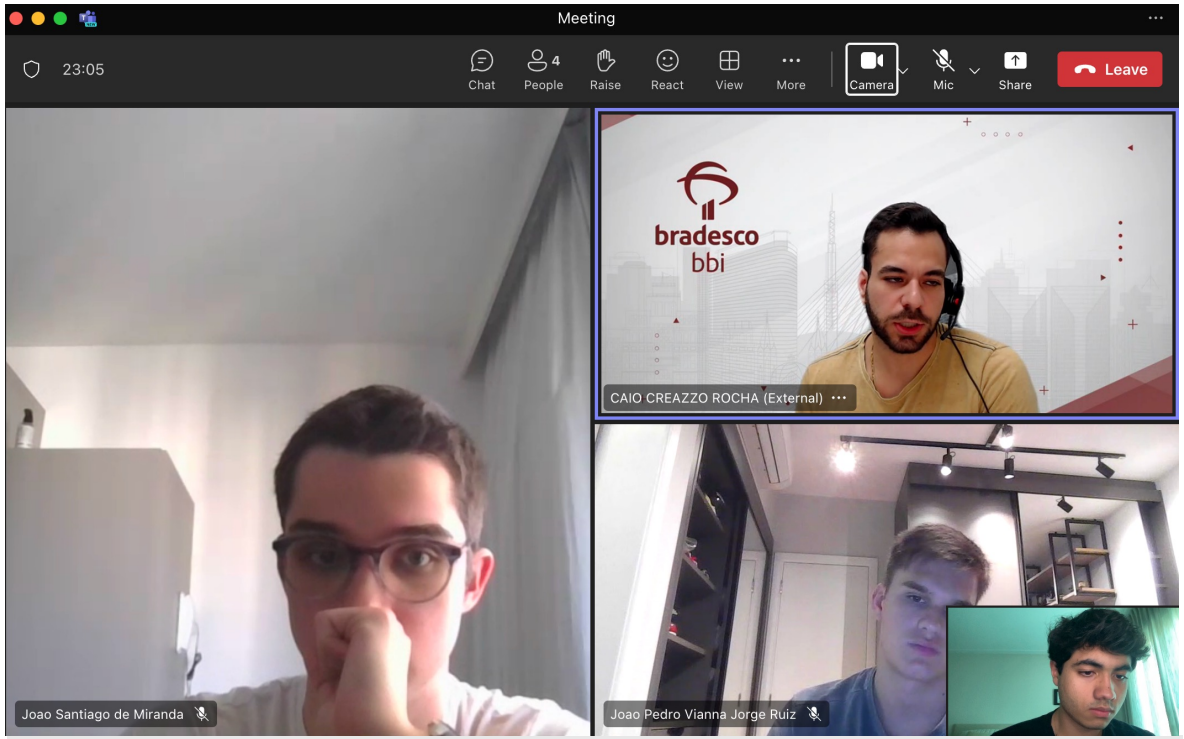

"Our focus is to transform pharmacy into a **healthcare ecosystem**"

Marcilio Pousada, CEO Raia Drogasil.

Analyst calls

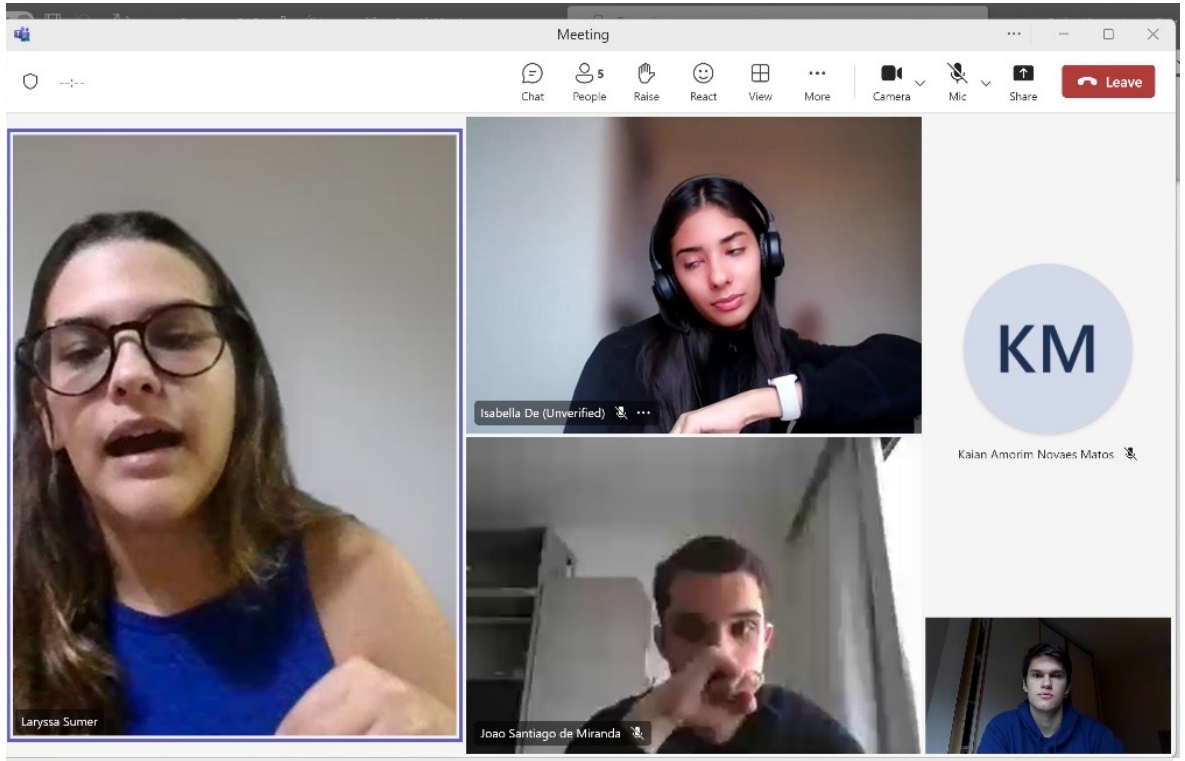

We did some calls with different analysts of the market to understand more the retail pharma and RD Saúde Business

Caio Rocha – BBI Associate

Insights: "RD is a better option than PGMN because of its superior stock management. RD is better than small drugstores due to its wider geographical reach, larger scale and better logistics. RD also has an edge over Panvel in terms of its brand reputation, albeit slightly. It's difficult to estimate the impact of new products on RD's main revenue. Finally, foreign investors tend to prefer RD due to its better liquidity."

Laryssa Sumer – XP retail analyst

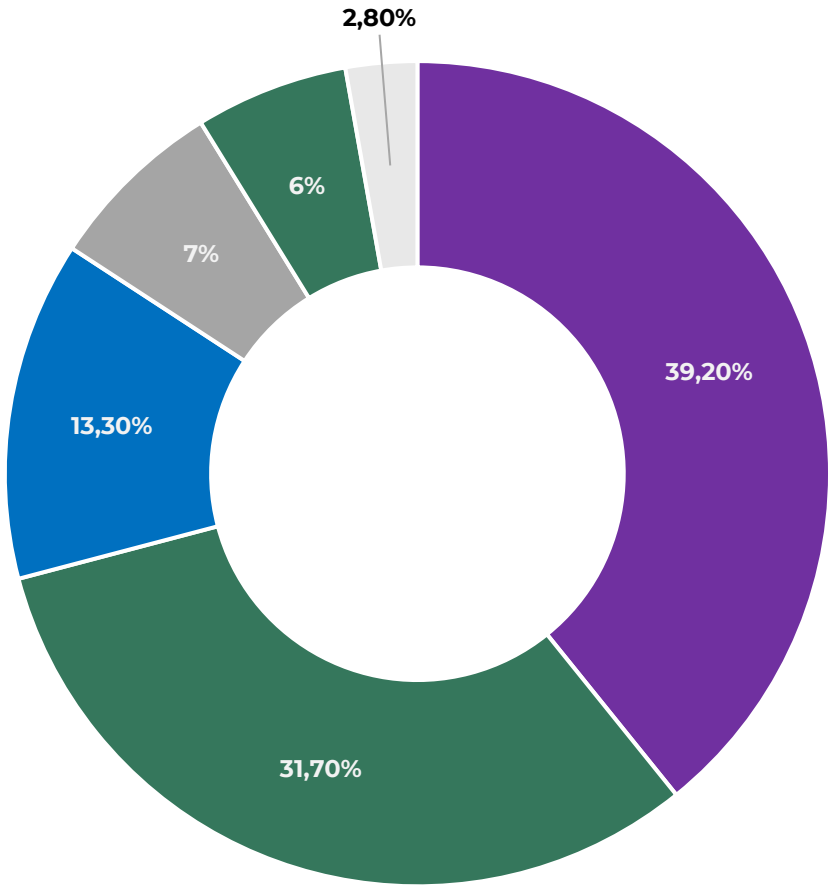

Insights: "The service margins are around 50%. The main barrier is the localization of the stores. It's visible when Pague Menos tried to penetrate São Paulo. Also, there is a mix change with the GDP."

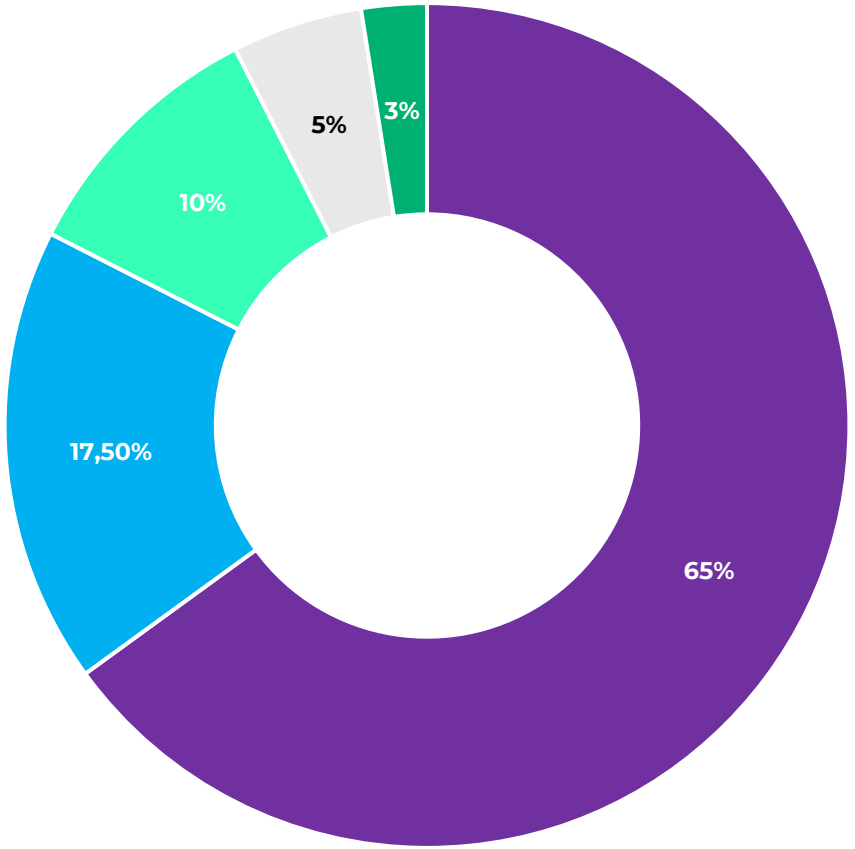

Field Research

We did a field research with more that 200 people to understand more about the retail pharma consumer opinions

Preferences

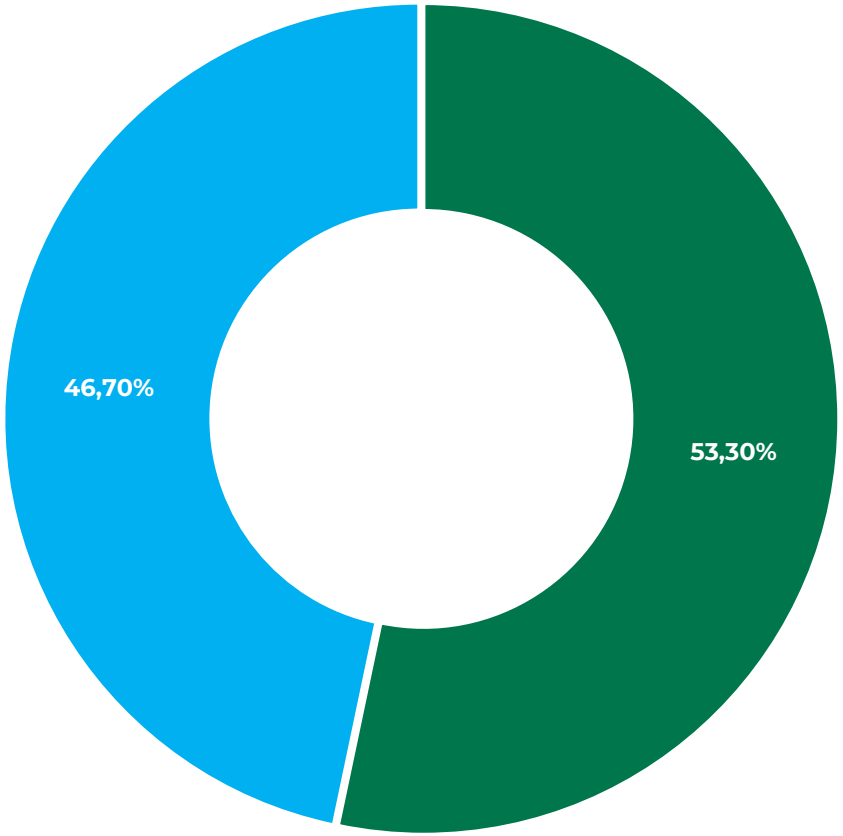

What is the most importante factor for consumers?

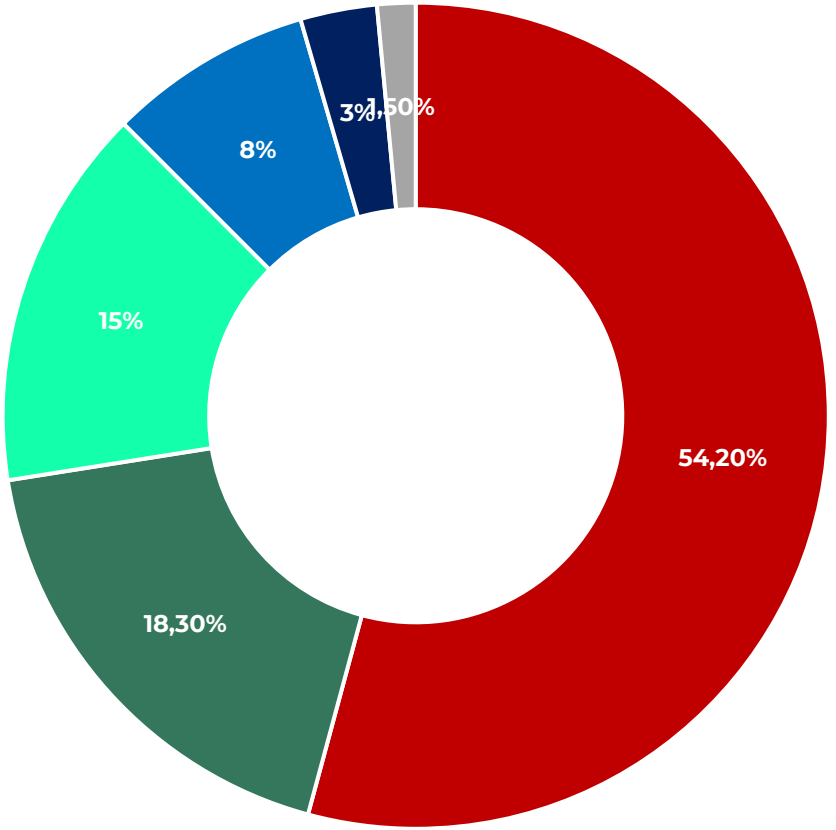

Field Research part 2

This second part of our research shows that RD Saúde have more than 70% of the consumer best quality service opinion

Region

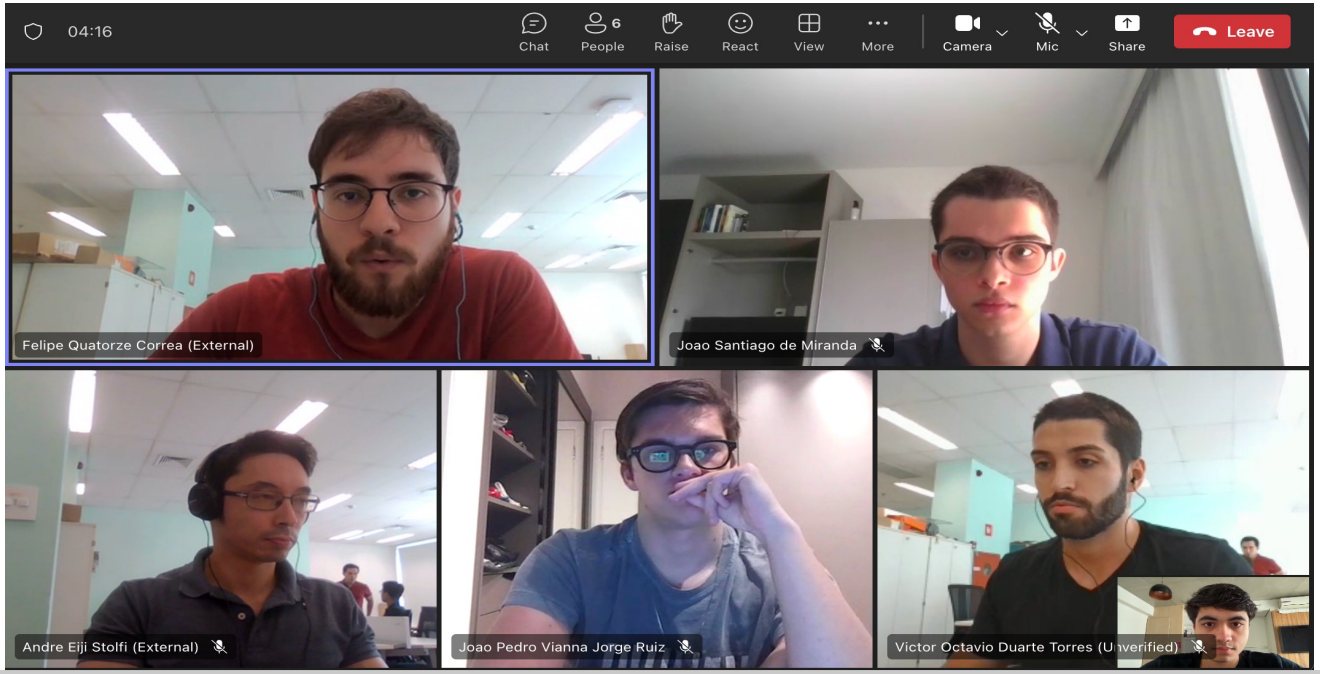

Quality of services

Franchises

We asked the IR of RD Saúde to understand more about why not is a good strategy to have franchises

"We do not work with franchises mainly because of 2 aspects: i) we want to maintain the quality of the stores so we can keep our brand strong and ii) the margins are low, so wouldn't make much sense for the franchises."

Other brands

All the brands that are part of the RD Saúde group

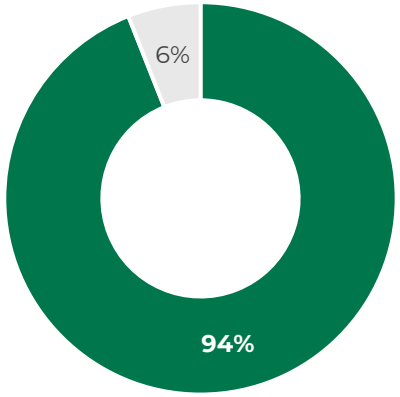

Looking more at the e-commerce advantage

Expanding the vision of the RD Saúde dominance in the digital platforms

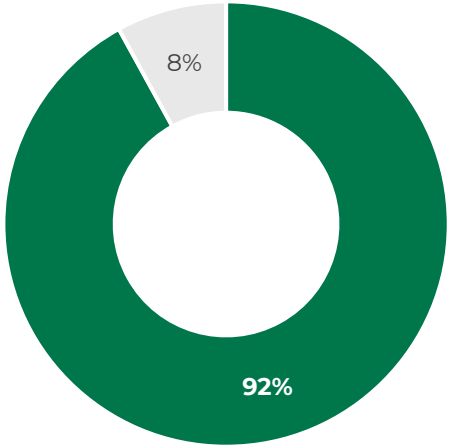

Gaining the digital world

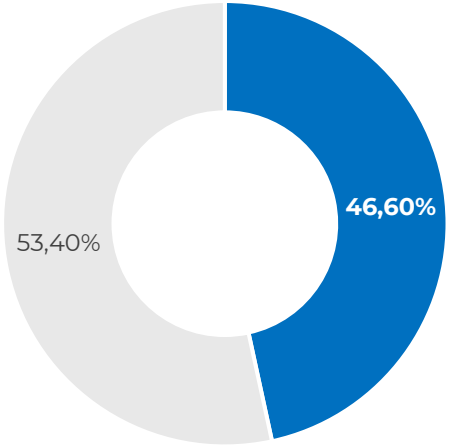

Deliveries made by RD Pharmacies

Better that the rival

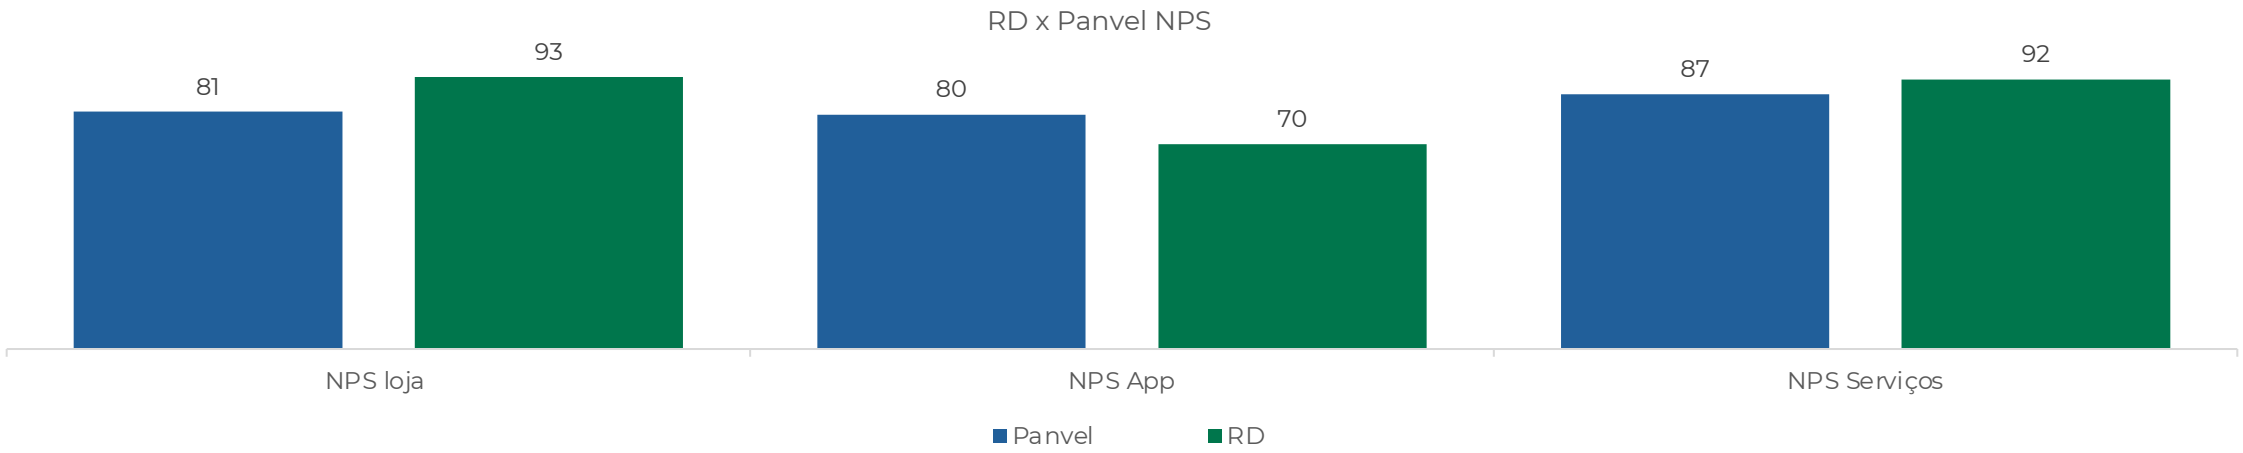

Deliveries made by RD and Panvel in 60 minutes or less

Better Service, more customers...

RD has better NPS than Panvel, but can still improve

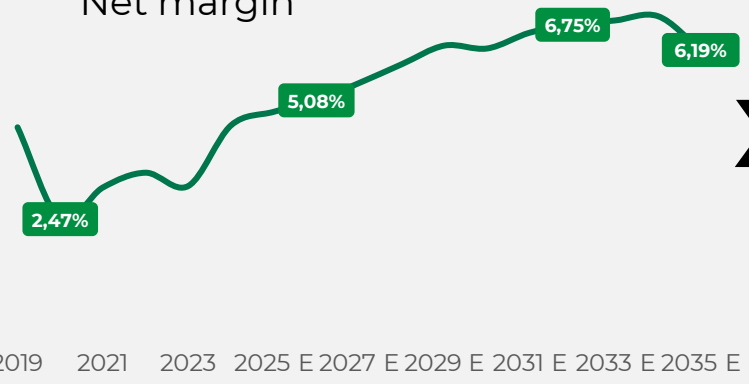

Return on Equity breakdown: Dupont Analysis

RD has increased its return due to **better margins** and **turnover** and will keep its growth in the future. **Always ahead** of competitors

Porter Forces:

Product differentiation: 2

In the drugtores segment, there's low to no product differentiation, once the most determinant factor is the proximity of the stores from the final customer. We can state that the quality of the stores might be a differentiation and change some customers preferences but aren't so relevant considering the whole sector.

Capital Requirements: 1

Even large companies can have some capital advantages with higher credit ratings, and, in consequence, lower cost of debt, the sector is no capital intensive, meaning that there're no big financial barriers to someone open a pharmacie. A Data that proves this is that 50% of the brazillian market is controlled by independent players.

Switching costs: 1

Very low, once a customer can just buy somewhere else. Due to that, pharmacies are trying to develop loyalty programs to create a switching cost, but it isn't relevant yet.

- Favorable locations: 4

Locations are fundamental here. Established firms have a competitive advantage over others, once they have the best stores. Case study: Pague Menos trying, unsuccessfully, to enter in the São Paulo market, losing to DPSP and RD.

- Government subsidies: 4

Large companies, such as Panvel, RD and Pague Menos, have important subsidies, gaining margin on small players.

Numerous or equally balanced competitors: 4

The rivalry is intense and there are multiple competitors, in multiple areas. It's only not worse because of the size and growth of the market. There're more than 100.000 pharmacies in Brazil.

Slow industry growth: 1

Since the industry grows a lot, as cited before, competition is a little lighter.

High fixed or Storage costs: 1

This is related to having difficulty to store, which is not applicable, since most of the products sold by the industry are of simple storage, except for services and vaccines, that aren't so relevant yet.

Lack of differentiation or switching costs: 5

There is little differentiation between players, since there isn't high customer experience advantages and the costs of going to another store is low, depending just on convenience and price.

"The product or service is perceived as a commodity or near commodity, choice by the buyer is largely based on price and service, and pressures for intense price and service competition result."

Porter: Buyers and Suppliers

4) **Buyers – Bargaining power of Buyers (Final customer): 4**

It is concentrated or purchases large volumes relative to seller sales: 1

No. In retail, in general, a single buyer has little or no significance over the total of sales.

The product it purchases from the industry represents a significant fraction of the buyer's costs or purchases: 3.

Yes, medical expenses are relevant to most people's pockets, so the clients are willing to dedicate more time to that purchase, and, in consequence, look for better price and quality.

The products it purchases from the industry are standard or undifferentiated: 4

Mostly, yes. They go to buy a different product, but that's available in any pharmacy, or at least in most of them.

It faces few switching costs: 5

Yes! Very important here, there is little or no cost of buying in a pharmacy or in another.

Buyers pose a credible threat of backward integration: 4

No, nobody produces medicines at home or are threatening to play medical roles at home.

The industry product is unimportant to the quality of the buyer's product or services: 2

No, most consumers are preoccupied with the quality of the medicine they're buying. Credibility matters here.

The buyer has full information:

Absolutely. The buyers can easily compare prices, by just going to a store close by. It's

5) **Suppliers – Bargaining power of suppliers (Pharmaceuticals): 3/4**

It is dominated by a few companies and is more concentrated than the industry it sells to: 3/4

The pharmaceutical market it's not fully concentrated, with the largest player having 10% of the market share, but it's far more concentrated than retail.

It is not obliged to contend with other substitute products for sale to the industry: 2

They do compete with substitute products once some medicines might be discontinued or others may arise.

The industry is not an important customer of the supplier group: 2

No, there is no pharma without pharma retail and vice-versa. But when we think about generics and HPC, main pharmacies aren't so special. The generic companies rather work with smaller distributors than the large drugstore chains, and the HPC companies sell more to supermarkets, that is why the grade.

The suppliers' product is an important input to the buyer's business: 4

Yes. They need each other to survive.

The supplier group's products are differentiated, or it has built up switching costs: 5

Yes! The pharmaceutical companies have strong competitive advantages, mainly because of the brand of their products and the patents they have to produce. So, they have a lot of power over the drugstores, once they have to buy from them because of the high demand.
